# PROGRAMME OUTCOME, PROGRAMMESPECIFIC OUTCOMES AND COURSEOUTCOMES OF ALL DEPARTMENTS-2022-23(CRITERIA- 2)

2.6.1 Program outcomes, program specific outcomes and course outcomes

## **Department of Civil Engineering**

#### Program Outcomes (PO's)

- **PO 1:** To apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems
- **PO 2:** To identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- **PO 3:** To design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO 4:** To use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
- **PO 5:** To create, select and apply appropriate techniques, resources, and modern engineering and IT tools including predictions and modeling to complex engineering activities with an understanding of limitations.
- **PO 6:** To apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice
- **PO 7:** To understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development
- **PO 8:** To apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice
- **PO 9:** To function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO 10:** To communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO 11:** To demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO 12:** To recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### Program Specific Outcomes (PSO's)

**PSO1:** Capable to study, plan, analyse and design the civil engineering structures required for the professional demands.

**PSO2:** Utilize the appropriate software and related modern tools to develop skills to plan, produce detailed drawings, write specifications, and prepare cost estimates of civil engineering structures.

**PSO3:** Offer engineering services with professional, environmental and ethical responsibility.

Coarse	STRENGTH OF MATERIALS – BCV301
Code	
CO1	Evaluate the simple stresses, strains and compound stresses
CO2	Calculate the Bending moments, shear force and draw BMD, SFD for various types of beams and loadings
CO3	Calculate the Bending moments, shear force and draw BMD, SFD for various types of beams and loadings
CO4	Calculate the Bending moments, shear force and draw BMD, SFD for various types of beams and loadings
CO5	Evaluate the behaviour and strength of structural elements under the action of compound stresses and stresses in thin and thick cylinders.
Coarse Code	ENGINEERING SURVEY- BCV302
CO1	Summarize various types of surveying and carry out distance measurement using various equipment's
CO2	Illustrate the use and applications of levelling and theodolite
CO3	Plot contours, longitudinal and cross sections for construction projects.
CO4	Set curves for construction works and carry out estimation of areas and volumes.
CO5	Demonstrate the necessary skills to carry out GPS and DRONE Surveying
Coarse	ENGINEERING GEOLOGY-BCV303
Code CO1	Apply geological knowledge in different civil engineering practice.
CO2	Acquire knowledge on durability and competence of foundation rocks, and will be able to use the best building materials.
CO3	Students will become competent enough for the safety, stability, economy and life of the structures that they construct
CO4	Able to solve various issues related to ground water exploration, build up dams, bridges, tunnels which are often confronted with ground water problems
CO5	Students will become Intelligent enough to apply GIS, GPS and remote sensing as a latest tool in different civil engineering for safe and solid construction.
Coarse Code	WATER SUPPLY AND WASTEWATER ENGINEERING- BCV304
CO1	Estimate the average and peak water demand for a community
CO2	Evaluate water quality and environmental significance of various parameters and plan suitable treatment system.
CO3	Design the different units of water treatment plant
CO4	Design the various units of wastewater treatment plant.
CO5	Design of various AOPs and low cost treatment units.
Code Code	COMPUTER-AIDED BUILDING PLANNING AND DRAWING – BCV305
CO1	Prepare, read and interpret the drawings in a professional set up.
CO2	Know the procedures of submission of drawings and Develop working and submission drawings for building.
CO3	Plan and design of residential or public building as per the given requirements.
Coarse Code	SOCIAL CONNECT AND RESPONSIBILITY- BCV307
CO1	The course will introduce social context and various players in the social space, and present approaches to discovering and understanding social needs. Social immersion and inspiring conversional will culminate in developing an actual, idea for problem-based intervention, based

	on an in-depth understanding of a key social problem.
Coarse	FIRE SAFETY IN BUILDINGS – BCV306D
Code	
CO1	Understand types of fire, combustion process and fire resistance
CO2	Plan for fire safety and design of lifts
CO3	Design flow network in buildings
CO4	Design of electrical systems and maintenance
CO5	Perform health evaluation of buildings and suggest remedies
Coarse Code	PERSONALITY DEVELOPMENT FOR CIVIL ENGINEERS – BCV358D
CO1	Use English as a medium of communication in interviews and in any professional working environment proficiently
CO2	Develop necessary skills to Answer common interview questions, express confidence in body language and present with clarity
Coarse Code	ANALYSIS OF STRUCTURES- BCV401
CO1	identify the different forms of structural systems and analyse the trusses
CO2	Evaluate the slope and deflections in beams, frames and trusses by using moment area method and energy principle
CO3	Analyse and determine the stress resultants inarches and cables
CO3	Analyse the indeterminate structures and construct BMD AND SFD using slope deflection methods.
CO3	Analyse the indeterminate structures and construct BMD AND SFD using Moment Distribution Method.
Coarse Code	FLUID MECHANICS AND HYDRAULICS – BCV402
CO1	Explain the fundamental properties of fluids and solve problems on fluid pressure and hydrostatics.
CO2	Apply the principles of kinematics and dynamics of fluid flow to solve problems on velocity and pressure.
CO3	Compute the discharge through pipes, notches and weirs.
CO4	Design the turbines and open channels of different sections and to estimate the energy loss in hydraulic jump.
CO5	Able to interpret the experimental results of discharge, efficiency based on the test conducted in the laboratory.
Coarse	TRANSPORTATION ENGINEERING-BCV403
Code	
CO1	Explain the basic principles of geometric design in the context of transportation engineering and planning
CO2	Select the appropriate pavement materials for construction and design the pavement as per standard practices.
CO3	Conduct traffic studies and analyse traffic data for practical applications.

CO4	Identify the Commonants newto of Deilyyey Treely and design the switchle manyyey for an
CO4	. Identify the Components parts of Railway Track and design the suitable runway for an Airport
005	
CO5	Able to interpret the experimental results of highway materials based on laboratory tests and design the pavement as per IRC guidelines.
Coarse	EARTH RESOURCES AND ENGINEERING LABORATORY – 21BE45
Code	EARTH RESOURCES AND ENGINEERING LABORATORT - 21DE45
CO1	Elucidate the basic biological concepts via relevant industrial applications and case studies
CO2	Evaluate the principles of design and development, for exploring novel bioengineering
	projects.
CO3	Corroborate the concepts of biomimetics for specific requirements.
CO4	Think critically towards exploring innovative biobased solutions for socially relevant
	problems
Coarse	BUILDING MATERIALS LABORATORY- BCV404
Code	
CO1	Analyze the physical characteristics, and behavior of common building materials.
CO2	Reproduce the basic knowledge of mathematics and engineering in finding the strength in tension,
CO3	compression, shear and torsion for steel  Evaluate the impact of engineering solutions on the society and also will be aware of
COS	contemporary issues regarding failure of structures due to unsuitable materials.
CO4	Recognize the importance of ethical conduct, integrity, and accuracy in materials testing and
	reporting
Coarse Code	BUILDING INFORMATION MODELLING IN CIVIL ENGINEERING – CV405A
CO1	Interpret the basic principles of BIM evolution and concept of BIM in lifecycle of project
CO2	Understand the workflows of Design authoring followed in industry during creation of 3D model
CO3	Analyze the engineering analysis and the process followed in industry to check and resolve clashes
CO4	Evaluate the integration of schedule and cost in 3D model using 4D and 5D BIM
CO5	Illustrate the various emerging trends of BIM & concept of digital twin
Coarse Code	FINANCE FOR PROFESSIONALS- BCV456A
CO1	Understand how their work and effort contribute to organizational financial performance
CO2	Comprehend financial acumen and tools to optimize outcomes

Course Outcomes	OPTIMIZATION TECHNIQUES- 22CSE11
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of optimization.
CO3	Design and develop analytical skills.
CO4	Summarize the Linear, Non-linear and Geometric Programming
CO5	Understands the concept of Dynamic programming
Course Outcomes	MATRIX METHODS OF STRUCTURAL ANALYSIS- 22CSE12
CO1	Formulate force displacement relation by flexibility and stiffness method
CO2	Analyze the plane trusses, continuous beams and portal frames by transformation approach
CO3	Analyse the structures by direct stiffness method
Course Outcomes	Advanced design of RC structures - 22CSE13
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of Structural Design
CO3	Design and develop analytical skills.
CO4	Summarize the principles of Structural Design and detailing
CO5	Understands the structural performance.
Course	MECHANICS OF DEFORMABLE BODIES - 22CSE14
Outcomes	
CO1	Achieve Knowledge of design and development of problem solving skills
CO2	Understand the principles of stress-strain behaviour of continuum
CO3	Design and develop analytical skills
CO4	Describe the continuum in 2 and 3- dimensions
CO5	Understand the concepts of elasticity and plasticity.
Course Outcomes	STRUCTURAL DYNAMICS – 22CSE15
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of Structural Dynamics
CO3	Design and develop analytical skills.
CO4	Summarize the Solution techniques for dynamics of Multi-degree freedom systems
CO5	Understand the concepts of damping in structures.
Course Outcomes	Structural engineering lab 1 -22CSEL16
CO1	Achieve Knowledge of design and development of experimenting skills.
CO2	Understand the principles of design of experiments
CO3	Design and develop analytical skills.
CO4	Summarize the testing methods and equipments.
Course	RESEARCH METHODOLOGY AND IPR -22RMI17
Outcomes	
CO1	Discuss research methodology and the technique of defining a research problem  Explain the functions of the literature review in research, carrying out a literature search, developing
CO3	Explain various research designs and their characteristics.
CO4	Explain the art of interpretation and the art of writing research reports

CO5	Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading International Instruments concerning IPR
Course	ADVANCED DESIGN OF STEEL STRUCTURES - 22CSE21
Outcomes	
CO1	Able to understand behavior of Light gauge steel members
CO2	Able to understand design concepts of cold formed/unrestrained beams
CO3	Able to understand Fire resistance concept required for present days.
CO4	Able to analyze beam column behavior
Course Outcomes	FINITE ELEMENT METHOD OF ANALYSIS - 22CSE22
CO1	Explain the basic theory behind the finite element method.
CO2	Formulate force-displacements relations for 2-D elements
CO3	Use the finite element method to analyze real structures.
CO4	Use a Finite Element based program for structural analysis
Course Outcomes	EARTHQUAKE RESISTANT STRUCTURES (Elective 1) - 22CSE233
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of engineering seismology.
CO3	Design and develop analytical skills.
CO2	Understand the concepts of earthquake resistance of reinforced concrete buildings.
CO4	Summarize the Seismic evaluation and retrofitting of structures.
Course Outcomes	DESIGN OF MASONRY STRUCTURES (Elective 2) - 22CSE243
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of design and construction of masonry structures
CO3	Design and develop analytical skills
CO4	Summarize the masonry Characteristics
CO5	Evaluate the strength and stability of the masonry structures
Course Outcomes	STRUCTURAL ENGINEERING LAB-2 -22CSEL26
CO1	Achieve Knowledge of design and development of programming skills.
CO2	Understand the principles of structural analysis and design
CO3	Design and develop analytical skills
CO4	Summarize the performance of structures for static and dynamic forces.
Course Outcomes	DESIGN OF BRIDGES - 22CSE31
CO1	Describe historical growth, select ideal site and bridge, calculate values of design parameters of slab culvert at critical section as per IRC, design and detailing required for the execution of the project.
CO2	Carry out analysis of box culvert as per IRC to obtain the values of design parameters and to design and detail the components following IS code procedure.
CO3	Demonstrate the use of Pigeauds Method and Courbon's Methodin the analysis of T beam bridge as per IRC, design to obtain the safe dimensions various components, optimum reinforcement required following IS code procedure.

CO4	Display the use of Courbon's Methodin the analysis of PSC bridge as per IRC, design to obtain the safe value of pre stressing force, obtain the dimensions of various components to keep the stresses within codal provisions following IS code procedure.
CO 5	Analysis a balanced cantilever bridge as per IRC and to obtain the safe values of design parameters and to design and detail the components as per IS code procedure
Course Outcomes	DESIGN CONCEPTS OF SUBSTRUCTURES (Elective- 1) - 22CSE321
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of subsoil exploration.
CO3	Design and develop analytical skills.
CO4	Identify and evaluate the soil shear strength parameters.
CO5	Understand the concepts of Settlement analysis.
Course	RETROFITTING AND REHABILITATION OF STRUCTURES (Elective 2) - 22CSE333
Outcomes	
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the cause of deterioration of concrete structures.
CO3	Design and develop analytical skills.
CO4	Summarize the principles of repair and rehabilitation of structures.
CO5	Understands the concept of Serviceability and Durability.
Course	PROJECT WORK PHASE -2 - 22CSE41
0	
Outcomes	
CO1	Demonstrate a sound technical knowledge of their selected project topic.
CO1 CO2	Undertake problem identification, formulation, and solution.
CO1	Undertake problem identification, formulation, and solution.  Design engineering solutions to complex problems utilising a systems approach.
CO1 CO2	Undertake problem identification, formulation, and solution.

Coarse Code	CALCULUS, FOURIER SERIES AND NUMERICAL TECHNIQUES - 21MAT31
CO1	To solve ordinary differential equations using Laplace transform.
CO2	Demonstrate the Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory.
CO3	To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z-Transform techniques to solve difference equations
CO4	To solve mathematical models represented by initial or boundary value problems involving partial differential equations
CO5	Determine the extremals of functionals using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.
Coarse Code	GEODETIC ENGINEERING - 21CV32
CO1	Execute survey using compass and plane table
CO2	Find the level of ground surface and Calculation of area and volumes
CO3	Operate theodolite for field execution
CO4	Estimate the capacity of reservoir
	1 0
CO5	Interpret satellite imageries
Coarse Code	STRENGTH OF MATERIALS - 21CV33
CO1	Evaluate the behavior when a solid material is subjected to various types of forces (namely Compressive, Tensile, Thermal, Shear, flexure, Torque, internal fluid pressure) and estimate stresses and corresponding strain developed. (L3)
CO2	Estimate the forces developed and draw schematic diagram for stresses, forces, moments for simple beams with different types of support and are subjected to various types of loads (L3).
CO3	Evaluate the behavior when a solid material is subjected to Torque and internal fluid pressure and estimate stresses and corresponding strain developed. (L3)
CO4	. Distinguish the behavior of short and long column and calculate load at failure & explain the behavior of spring to estimate deflection and stiffness (L3)
CO5	Examine and Evaluate the mechanical properties of various materials under different loading conditions
Coarse Code	EARTH RESOURCES AND ENGINEERING - 21CV34
CO1	Apply geological knowledge in different civil engineering practice.
CO2	Students will acquire knowledge on durability and competence of foundation rocks, and confidence enough to use the best building materials.
CO3	Competent enough to provide services for the safety, stability, economy and life of the structures that they construct
CO4	Able to solve various issues related to ground water exploration, build up dams, bridges, tunnels which are often confronted with ground water problems
CO5	Intelligent enough to apply GIS, GPS and remote sensing as a latest tool in different civil engineering for safe and solid construction.
Coarse Code	COMPUTER-AIDED BUILDING PLANNING AND DRAWING - 21CV35
CO1	Prepare, read and interpret the drawings in a professional set up.
CO2	Know the procedures of submission of drawings and Develop working and submission drawings for building.
CO3	Plan and design of residential or public building as per the given requirements.

Coarse Code	SOCIAL CONNECT AND RESPONSIBILITY- 21SCR33
CO1	The course will introduce social context and various players in the social space, and present approaches to discovering and understanding social needs. Social immersion and inspiring conversional will culminate in developing an actual, idea for problem-based intervention, based on an in-depth understanding of a key social problem.
Coarse Code	FIRE SAFETY IN BUILDINGS - 21CV385
CO1	Understand types of fire, combustion process and fire resistance
CO2	Plan for fire safety and design of lifts
CO3	Design flow network in buildings
CO4	Design of electrical systems and maintenance
CO5	Perform health evaluation of buildings and suggest remedies
Coarse Code	COMPLEX ANALYSIS, PROBABILITY AND STATISTICAL METHODS- 21MAT41
CO1	Use the concepts of an analytic function and complex potential to solve the problems arising in electromagnetic field theory. Utilize conformal transformation and complex integral arising in aerofoil theory, fluid visualization and image processing
CO2	Obtain series solution of ordinary differential equation.
CO3	Make use of the correlation and regression analysis to fit a suitable mathematical model for the statically data.
CO4	Apply discrete and continues probability distribution in analyzing the probability model arising in the engineering field.
CO5	Construct joint probability distribution and demonstration the validity of testing the hypothesis
Coarse Code	FLUID MECHANICS AND HYDRAULICS - 21CV42
CO1	Understand fundamental properties of fluids and solve problems on Hydrostatics
CO2	Apply Principles of Mathematics to represent Kinematics and Bernoulli's principles
CO3	Compute discharge through pipes, notches and weirs
CO3	Design of open channels of various cross sections
CO3	Design of turbines for the given data and understand their operation characteristics
Coarse Code	PUBLIC HEALTH ENGINEERING – 21CV43
CO1	Estimate average and peak water demand for a community.
CO2	Evaluate water quality and environmental significance of various parameters and plan suitable treatment system.
CO3	Design the different units of water treatment plant
CO4	Understand and design the various units of wastewater treatment plant
CO5	Acquire capability to conduct experiments and estimate the concentration of different parameters and compare the obtained results with the concerned guidelines and regulations.
Coarse Code	ANALYSIS OF STRUCTURES - 21CV44
CO1	Evaluate slope and deflections in beams using geometrical methods.
CO2	Determine deflections in trusses and frames using energy principles.
CO3	Analyse arches and cables for stress resultants.

CO4	Apply slope defection method in analysing indeterminate structures and construct bending moment diagram
CO5	Analyse continuous beams, frames and trusses using stiffness matrix method of analysis.
Coarse Code	EARTH RESOURCES AND ENGINEERING LABORATORY – 21BE45
CO1	Elucidate the basic biological concepts via relevant industrial applications and case studies
CO2	Evaluate the principles of design and development, for exploring novel bioengineering projects.
CO3	Corroborate the concepts of biomimetics for specific requirements.
CO4	Think critically towards exploring innovative biobased solutions for socially relevant problems
Coarse Code	EARTH RESOURCES AND ENGINEERING LABORATORY - 21CVL46
CO1	Comprehend the relations between minerals and rocks based on their physical properties
CO2	Assessthe suitability of materials used in building construction
CO3	Differentiate geological investigations necessary for the construction of dams, bridges, and tunnels
CO4	Describe the groundwater investigation using resistivity methods
CO5	Understand the applications of Geospatial technology in Civil Engineering
Coarse	CONSTITUTION OF INDIA AND PROFESSIONAL ETHICS (CIP) -
Code CO1	21CIP47  Have constitutional knowledge and legal literacy.
CO2	Understand Engineering and Professional ethics and responsibilities of Engineers.
Coarse Code	GREEN BUILDINGS - 21CV485
Coarse	UNIVERSAL HUMAN VALUES-II: UNDERSTANDING HARMONY and
Code	ETHICAL HUMAN CONDUCT- 21UHV49
CO1	Holistic vision of life
CO2	Socially responsible behaviour
CO3	Environmentally responsible work
CO4	Ethical human conduct
CO5	Having Competence and Capabilities for Maintaining Health and Hygiene
CO6	Appreciation and aspiration for excellence (merit) and gratitude for all
Coarse Code	HYDROLOGY AND WATER RESOURCE ENGINEERING- 21CV51
CO1	Provide a background in the theory of hydrological processes and their measurement
CO2	Estimate runoff and develop unit hydrographs.
CO3	Find the water requirement and frequency of irrigation for various crops.
CO4	Find the canal capacity and compute the reservoir capacity.
CO5	Analyse floods and droughts. Emphasise on the importance of conservation of water and water bodies.
Coarse Code	TRANSPORTATION ENGINEERING- 21CV52
	Acquire the capability of proposing a new alignment or re-alignment of existing roads, conduct

CO2	Evaluate the engineering properties of the materials and suggest the suitability of the same for pavement construction
CO3	Design road geometrics, structural components of pavement and drainage.
CO4	Evaluate the highway economics by few select methods and also will have a basic knowledge of various highway financing concepts.
Coarse Code	DESIGN OF RC STRUCTURAL ELEMENTS- 21CV53
CO1	Understand the design philosophy and principles.
CO2	Solve engineering problems of RC elements subjected to flexure, shear and torsion.
CO3	Demonstrate the procedural knowledge in designs of RC structural elements such as slabs, columns and footings.
CO4	Owns professional and ethical responsibility.
oarse Code	GEOTECHNICAL ENGINEERING- 21CV54
CO1	Determine the index properties of soil and hence classify the soil
CO2	Assess the compaction and consolidation characteristics of soil
CO3 CO4	Determine the permeability of soils and assess the seepage in hydraulic structures
CO4	Evaluate shear parameters of the soil using shear tests  Ability to determine bearing capacity of soil and achieve proficiency in proportioning shallow
	isolated and combined footings for uniform bearing pressure
Coarse Code	GEOTECHNICAL ENGINEERING LABORATORY- 21CVL55
CO1	Physical and index properties of the soil
CO2	Classify based on index properties and field identification
CO3	To determine OMC and MDD, plan and assess field compaction program
CO4	Shear strength and consolidation parameters to assess strength and deformation characteristics
CO5	In-situ shear strength characteristics(SPT-Demonstration)
Coarse Code	RESEARCH METHODOLOGY & INTELLECTUAL PROPERTY RIGHTS- 21CV56
CO1	To know the meaning of engineering research.
CO2	To know the procedure of Literature Review and Technical Reading.
CO3	To know the fundamentals of patent laws and drafting procedure.
CO4	Understanding the copyright laws and subject matters of copyrights and designs
CO5	Understanding the basic principal of desiring Rights.
Coarse Code	ENVIRONMENTAL STUDIES – 21CIV57
CO1	Understand the principles of ecology and environmental issues that apply to air, land, and water issues on a global scale,
CO2	Develop critical thinking and/or observation skills, and apply them to the analysis of a problem or question related to the environment.
CO3	Demonstrate ecology knowledge of a complex relationship between biotic and a biotic components.
CO4	Apply their ecological knowledge to illustrate and graph a problem and describe the realities that managers face when dealing with complex issues.
Coarse	GENDER SENSITISATION - 21CV583
Code	

CO1	Appreciate gender issues prevalent in the society
CO2	Value the role of each gender in family, society and state.
CO3	Analyse the gender sensitivity at work place and evolve proper perception of the other gender
CO4	Sensitise oneself towards gender equality
Coarse Code	CONSTRUCTION MANAGEMENT AND ENTRPRENERSHIP – 21CV61
CO1	Understand various management principles of construction industry (L2)
CO2	Use planning, organizing, scheduling, monitoring and controlling techniques for managing construction activity (L4)
CO3	Understand importance of quality control and safety in construction.(L2)
CO4	Understand managing data pertaining to construction project. (L4)
CO5	Evaluate alternatives and develop capital budget for different scenarios.
Coarse Code	CONCRETE TECHNOLOGY – 21CV62
CO1	Assess and infer various properties of cement, cementitious materials, Fine and coarse aggregate as per codal provision and specifications (L2)
CO2	Design the concrete mix for the given materials as per IS:10262-2019 provisions (L4)
CO3	Understand the manufacturing process and asses the quality of green (L2)
CO4	Describe the properties of fresh and hardened concrete – Strength and Durability aspects (L3)
CO5	Examine and Evaluate properties of Cement and Concrete
Coarse Code	DESIGN OF STEEL STRUCTURAL ELEMENTS – 21CV63
CO1	Possess knowledge of Steel Structures Advantages and Disadvantages of Steel structures, steel code provisions and plastic behaviour of structural steel.
CO2	Understand the Concept of Bolted and Welded connections
CO3	Understand the Concept of Design of compression members, built-up columns and columns splices
CO4	Understand the Concept of Design of tension members, simple slab base and gusseted base.
CO5	Understand the Concept of Design of laterally supported and un-supported steel beams.
Coarse Code	DESIGN OF PRE-STRESSED CONCRETE STRUCTURES – 21CV641
CO1	Understand the requirement of PSC members for present scenario.
CO2	Analyse the stresses encountered in PSC element during transfer and at working.
CO3	Understand the effectiveness of the design of PSC after studying losses
CO4	Capable of analyzing the PSC element and finding its efficiency.
CO5	Design PSC beam for different requirements.
Coarse Code	APPLIED GEOTECHNICAL ENGINEERING - 21CV642
CO1	Abilitytoplanandexecutegeotechnicalsiteinvestigationprogramfordifferentcivilengineeringproj ects.
CO2	Understandingofstressdistributionandresultingsettlementbeneaththeloadedfootingsonsandandclaye ys oils.
CO3	Abilitytoestimatefactorofsafetyagainstfailureofslopesandtocomputelateralpressuredistributi onbehind earth retaining structures.
CO4	Ability to determine bearing capacity of soil and achieve proficiency in proportioning shallow isolated and combined footings for uniform bearing pressure.

CO5	Capable of estimating load carrying capacity of single and group of piles.
Coarse	RAILWAYS, HARBOUR, TUNNELING AND AIRPORTS - 21CV643
Code CO1	Acquires capability of choosing alignment and also design geometric aspects of railway system, runway and taxiway
CO2	Suggest and estimate the material quantity required for laying a railway track and also will be able to determine the hauling capacity of a locomotive
CO3	Develop layout plan of airport, harbour, dock and will be able relate the gained knowledge to identify required type of visual and/or navigational aids for the same
CO4	Apply the knowledge gained to conduct surveying, understand the tunnelling activities
Coarse Code	DESIGN CONCEPTS IN BUILDING SERVICES - 21CV644
CO1	Describe the basics of house plumbing and waste water collection and disposal.
CO2	Discuss the safety and guidelines with respect to fire safety.
CO3	Describe the issues with respect to quantity of water, rain water harvesting and roof top harvesting.
CO4	Understand and implement the requirements of thermal comfort in buildings
Coarse Code	GROUNDWATER HYDRAULICS(Elective) - 21CV645
CO1	Explain the importance of Groundwater
CO2	Paraphrasing the Characteristics of aquifers
CO3	Estimate the quantity of groundwater by various methods
CO4	Analyse the zones of groundwater resource
CO5	Analyse the quality of groundwater and understand Techniques of modeling
~	
Code Code	ALTERNATE BUILDING MATERIALS - 21CV646
Code CO1	Solve the problems of Environmental issues concerned to building materials and cost effective
Code	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they
Code CO1	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression.  Analyze different alternative building materials which will be suitable for specific climate and in an environmentally sustainable manner. Also capable of suggesting suitable agro and industrial
CO2	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression.  Analyze different alternative building materials which will be suitable for specific climate and in an environmentally sustainable manner. Also capable of suggesting suitable agro and industrial wastes as a building material.  Recommend various types of alternative building materials and technologies and design a energy
Code CO2 CO3 CO4 Coarse	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression.  Analyze different alternative building materials which will be suitable for specific climate and in an environmentally sustainable manner. Also capable of suggesting suitable agro and industrial wastes as a building material.
COde CO2 CO3 CO4	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression.  Analyze different alternative building materials which will be suitable for specific climate and in an environmentally sustainable manner. Also capable of suggesting suitable agro and industrial wastes as a building material.  Recommend various types of alternative building materials and technologies and design a energy efficient building by considering local climatic condition and building material.  OCCUPATIONAL HEALTH AND SAFETY (Elective) - 21CV651  Identify hazards in the workplace that pose a danger or threat to their safety or health, or that of
Code CO2 CO3 CO4 Coarse Code	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression. Also capable of suggesting suitable agro and industrial wastes as a building material.  Recommend various types of alternative building materials and technologies and design a energy efficient building by considering local climatic condition and building material.  OCCUPATIONAL HEALTH AND SAFETY (Elective) - 21CV651  Identify hazards in the workplace that pose a danger or threat to their safety or health, or that of others.  Control unsafe or unhealthy hazards and propose methods to eliminate the hazard  Present a coherent analysis of a potential safety or health hazard both verbally and in writing, citing the occupational Health and Safety Regulations as well as supported legislation.  Discuss the role of health and safety in the workplace pertaining to the responsibilities of
Code CO2 CO3 CO4 Coarse Code CO1 CO2 CO3 CO4	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;  Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression.  Analyze different alternative building materials which will be suitable for specific climate and in an environmentally sustainable manner. Also capable of suggesting suitable agro and industrial wastes as a building material.  Recommend various types of alternative building materials and technologies and design a energy efficient building by considering local climatic condition and building material.  OCCUPATIONAL HEALTH AND SAFETY (Elective) - 21CV651  Identify hazards in the workplace that pose a danger or threat to their safety or health, or that of others.  Control unsafe or unhealthy hazards and propose methods to eliminate the hazard  Present a coherent analysis of a potential safety or health hazard both verbally and in writing, citing the occupational Health and Safety Regulations as well as supported legislation.  Discuss the role of health and safety in the workplace pertaining to the responsibilities of workers, managers, supervisors.  Identify the decisions required to maintain protection of the environment, workplace as well as

CO2	Prepare specifications of various Civil Engineering Structures/works, also will be able to analyse the requirement of a structure /work to arrive at a specific cost for completion of the same.
CO3	Make use of minimum basic knowledge gained in this course to take up entrepreneurship/employment as a contractor.
Coarse	CONSTRUCTION TECHNOLOGY FOR SUBSTRUCTURE &
Code	SUPERSTRUCTURES – 21CV72
CO1	Select Appropriate technology for underground constructions.
CO2	Able to select appropriate pile construction method and testing of piles.
CO3	Able to select appropriate concreting practices for different constructions
CO4	Able to select appropriate underwater construction technology
Coarse Code	ADVANCED DESIGN OF RCC AND STEEL STRUCTURES (Elective) - 21CV731
CO1	Students will acquire the basic knowledge in design of RCC and Steel Structures.
CO2	Students will have the ability to follow design procedures as per codal provisions and skills to arrive at structurally safe RC and Steel members.
Coarse Code	ADVANCED GEOTECHNICAL ENGINEERING (Elective) - 21CV732
CO1	Estimate the size of isolated and combined foundations to satisfy bearing capacity and settlement criteria
CO2	Estimate the load carrying capacity and settlement of single piles and pile groups including laterally loaded piles.
CO3	Understand the basics of analysis and design principles of well foundation, drilled piers and caissons.
CO4	Understand basics of analysis and design principles of machine foundations.
Coarse Code	PAVEMENT MATERIALS AND CONSTRUCTION (Elective) - 21CV733
CO1	Students will be able to evaluate and assess the suitability of any pavement material to be used in
	various components of pavement by conducting required tests as per IS, IRC specifications
CO2	Students will be able to formulate the proportions of different sizes of aggregates to suit gradation criteria for various mixes as per MORTH and also design bituminous mixes.
CO3	Students will be competent to adapt suitable modern technique and equipment for speedy and economic construction.
CO4	Student will be able to execute the construction of embankment, flexible, rigid pavement and perform required quality control tests at different stages of pavement construction.
Coarse Code	SOLID WASTE MANAGEMENT (Elective) - 21CV734
CO1	Identify improper practices of solid waste disposal and their environmental implications. Know the basic engineering principles of solid waste management
CO2	Describe the need for economics in collection and transportation of solid waste and clearly discuss various types of collection systems and analyse system dynamics
CO3	Understand the management concepts, define 4 R approach, apply PPP model and community involvement for effective management of solid waste
CO4	Develop a concise idea on various conventional and advanced treatment options for solid waste

CO5	Conceive the design aspects of engineered disposal options and apply the gained knowledge
Coarse Code	GROUND IMPROVEMENT TECHNIQUES- 21CVL742
CO1	Give solutions to solve various problems associated with soil formations having less strength.
CO2	Use effectively the various methods of ground improvement techniques depending upon the requirements.
CO3	Utilize properly the locally available materials and techniques for ground improvement so that economy in the design of foundations of various civil engineering structures
Coarse Code	ENVIRONMENTAL PROTECTION AND MANAGEMENT- 21CV753
CO1	Appreciate the elements of Corporate Environmental Management systems complying to international environmental management system standards
CO2	Lead pollution prevention assessment team and implement waste minimization options
CO3	Develop, Implement, maintain and Audit Environmental Management systems for Organisations

Course	ADVANCED STRUCTURAL ANALYSIS- 20CSE11
Outcomes	
CO1	Apply Winkler Bach and Strain Energy principles to obtain stresses and deformation in curved members
CO2	Derive the expressions to Foundation pressure, Deflection, Slope, BM and SF of infinite and semi-infinite Beams resting on Elastic Foundation
CO3	Obtain the equations for the shear centre for symmetrical and unsymmetrical from fundamental.
CO4	Extrapolate the bending theory to calculate the stresses and deformations in unsymmetrical bending
CO5	Develop the characteristic equation for the buckling load of compound column and stresses and deformations in beam-column
Course	MATRIX METHODS OF STRUCTURAL ANALYSIS- 20CSE12
Outcomes	WIATRIA WIETHODS OF STRUCTURAL ANALTSIS- 20CSE12
CO1	Formulate force displacement relation by flexibility and stiffness method
CO2	Analyze the plane trusses, continuous beams and portal frames by transformation approach
CO3	Analyse the structures by direct stiffness method
Course	Advanced design of RCC structures - 20CSE13
Outcomes	
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of Structural Design
CO3	Design and develop analytical skills.
CO4	Summarize the principles of Structural Design and detailing
CO5	Understands the structural performance.
Course Outcomes	MECHANICS OF DEFORMABLE BODIES - 20CSE14
CO1	
	Achieve Knowledge of design and development of problem solving skills
CO2	Achieve Knowledge of design and development of problem solving skills  Understand the principles of stress-strain behaviour of continuum
CO2 CO3	
	Understand the principles of stress-strain behaviour of continuum
CO3	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills
CO3 CO4	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions
CO3 CO4 CO5 Course	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.
CO3 CO4 CO5 Course Outcomes	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.  STRUCTURAL DYNAMICS – 20CSE15
CO3 CO4 CO5 Course Outcomes CO1	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.  STRUCTURAL DYNAMICS – 20CSE15  Achieve Knowledge of design and development of problem solving skills.
CO3 CO4 CO5 Course Outcomes CO1 CO2	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.  STRUCTURAL DYNAMICS – 20CSE15  Achieve Knowledge of design and development of problem solving skills.  Understand the principles of Structural Dynamics
CO3 CO4 CO5 Course Outcomes CO1 CO2 CO3	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.  STRUCTURAL DYNAMICS – 20CSE15  Achieve Knowledge of design and development of problem solving skills.  Understand the principles of Structural Dynamics  Design and develop analytical skills.  Summarize the Solution techniques for dynamics of Multi-degree freedom systems  Understand the concepts of damping in structures.
CO3 CO4 CO5 Course Outcomes CO1 CO2 CO3 CO4 CO5 Course	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.  STRUCTURAL DYNAMICS – 20CSE15  Achieve Knowledge of design and development of problem solving skills.  Understand the principles of Structural Dynamics  Design and develop analytical skills.  Summarize the Solution techniques for dynamics of Multi-degree freedom systems
CO3 CO4 CO5 Course Outcomes CO1 CO2 CO3 CO4 CO5 Course Outcomes	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity.  STRUCTURAL DYNAMICS – 20CSE15  Achieve Knowledge of design and development of problem solving skills.  Understand the principles of Structural Dynamics  Design and develop analytical skills.  Summarize the Solution techniques for dynamics of Multi-degree freedom systems  Understand the concepts of damping in structures.  Structural engineering lab 1 -20CSEL16
CO3 CO4 CO5 Course Outcomes CO1 CO2 CO3 CO4 CO5 Course Outcomes CO1	Understand the principles of stress-strain behaviour of continuum  Design and develop analytical skills  Describe the continuum in 2 and 3- dimensions  Understand the concepts of elasticity and plasticity. Structural engineering lab 1 -20CSEL16  Achieve Knowledge of design and development of experimenting skills.  Understand the principles of design of experiments  Design and develop analytical skills.

CO2	Explain the functions of the literature review in research, carrying out a literature search, developing
CO3	Explain various research designs and their characteristics.
CO4	Explain the art of interpretation and the art of writing research reports
CO5	Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading International Instruments concerning IPR
Course	ADVANCED DESIGN OF STEEL STRUCTURES - 20CSE21
Outcomes	Able to various discharge of Light course steel members
CO1	Able to understand behavior of Light gauge steel members
CO2	Able to understand design concepts of cold formed/unrestrained beams
CO3	Able to understand Fire resistance concept required for present days.
CO4	Able to analyze beam column behavior
Course Outcomes	FINITE ELEMENT METHOD OF ANALYSIS - 20CSE22
CO1	Explain the basic theory behind the finite element method.
CO2	Formulate force-displacements relations for 2-D elements
CO3	Use the finite element method to analyze real structures.
CO4	Use a Finite Element based program for structural analysis
Course Outcomes	EARTHQUAKE RESISTANT STRUCTURES - 20CSE23
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of engineering seismology and concepts of earthquake resistance of reinforced concrete buildings.
CO3	Design and develop analytical skills.
CO2	Understand the concepts of earthquake resistance of reinforced concrete buildings.
CO4	Summarize the Seismic evaluation and retrofitting of structures.
Course	ADVANCED DESIGN OF PRE- STRESSED CONCRETE STRUCTURES (Elective 1) -
Outcomes	20CSE242
CO1	Analyse , Design and detail PSC elements
Course	ADVANCED STRUCTURAL ANALYSIS (Elective 2) - 18CSE251
Outcomes	
CO1	Apply Winkler Bach and Strain Energy principles to obtain stresses and deformation in curved members
CO2	Derive the expressions to Foundation pressure, Deflection, Slope, BM and SF of infinite and semi-infinite Beams resting on Elastic Foundation
CO3	Obtain the equations for the shear centre for symmetrical and unsymmetrical from fundamental
CO4	Extrapolate the bending theory to calculate the stresses and deformations in unsymmetrical bending
CO5	Develop the characteristic equation for the buckling load of compound column and stresses and deformations in beam-column
Course	DESIGN OF TALL STRUCTURES (Elective 2) - 20CSE252
Outcomes	
CO1	Achieve Knowledge of design and development of problem solving skills.
CO2	Understand the principles of strength and stability
CO3	Design and develop analytical skills.
CO4	Summarize the behavior of various structural systems.
CO5	Understand the concepts of P-Delta analysis

Course Outcomes	STRUCTURAL ENGINEERING LAB-2 -20CSEL26
CO1	Achieve Knowledge of design and development of programming skills.
CO2	Understand the principles of structural analysis and design
CO3	Design and develop analytical skills
CO4	Summarize the performance of structures for static and dynamic forces.
Course Outcomes	DESIGN OF BRIDGES - 20CSE31
CO1	Describe historical growth, select ideal site and bridge, calculate values of design parameters of slab culvert at critical section as per IRC, design and detailing required for the execution of the project.
CO2	Carry out analysis of box culvert as per IRC to obtain the values of design parameters and to design and detail the components following IS code procedure.
CO3	Demonstrate the use of Pigeauds Method and Courbon's Methodin the analysis of T beam bridge as per IRC, design to obtain the safe dimensions various components, optimum reinforcement required following IS code procedure.
CO4	Display the use of Courbon's Methodin the analysis of PSC bridge as per IRC, design to obtain the safe value of pre stressing force, obtain the dimensions of various components to keep the stresses within codal provisions following IS code procedure.
CO 5	Analysis a balanced cantilever bridge as per IRC and to obtain the safe values of design parameters and to design and detail the components as per IS code procedure
Course Outcomes	DESIGN CONCEPTS OF SUBSTRUCTURES (Elective- 1) - 20CSE321
CO1	Achieve Knowledge of design and development of problem solving skills
CO2	Understand the principles of subsoil exploration
CO3	Design and develop analytical skills.
CO4	Understand the concepts of Settlement analysis.
Course Outcomes	FRACTURE MECHANICS APPLIED TO CONCRETE (Elective 2) - 20CSE331
CO1	Apply principles of fracture mechanics.
CO2	Design concrete structures using fracture mechanics approach.
CO3	Explain the importance of fracture mechanics.
CO4	Take special care of very large sized structures
Course Outcomes	PROJECT WORK PHASE -2 - 20CSE41

## SJM Vidyapeetha®

## S J M INSTITUTE OF TECHNOLOGY

(Recognized by AICTE, New Delhi and Affiliated to Visvesvaraya Technological University, Belagavi)
NH-4 Bypass, P.B.No:73, CHITRADURGA -577502, Karnataka State
NAAC Accredited

## **COs of All Programs**

	CIVIL ENGINEERING	
Course Code	TRANSFORM CALCULUS, FOURIER SERIES AND NUMERICAL TECHNIQUES - 18MAT31	
C01	Use Laplace transform and inverse Laplace transform in solving differential/integral equation arising in network analysis, control systems and other fields of engineering.	
CO2	Demonstrate Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing and field theory.	
CO3	Make use of Fourier transform and Z-transform to illustrate discrete/continuous function arising in wave and heat propagation, signals and systems.	
CO4	Solve first and second order ordinary differential equations arising in engineering problems using single step and multistep numerical methods.	
CO5	Determine the externals of functional using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.	
Course Code	STRENGTH OF MATERIALS - 18CV32	
C01	To evaluate the basic concepts of the stresses and strains for different materials and strength of structural elements.	
CO2	To evaluate the development of internal forces and resistance mechanism for one dimensional and two dimensional structural elements.	
CO3	To analyse different internal forces and stresses induced due to representative loads on structural elements.	
CO4	To evaluate slope and deflections of beams.	
CO5	To evaluate the behaviour of torsion members, columns and struts.	
Course Code	FLUIDS MECHANICS - 18CV33	
C01	Possess a sound knowledge of fundamental properties of fluids and fluid continuum	
CO2	Compute and solve problems on hydrostatics, including practical applications	
CO3	Apply principles of mathematics to represent kinematic concepts related to fluid flow	
CO4	Apply fundamental laws of fluid mechanics and the Bernoulli's principle for practical applications	
CO5	Compute the discharge through pipes and over notches and weirs	
Course Code	SBUILDING MATERIALS AND CONSTRUCTION - 18CV34	
C01	Select suitable materials for buildings and adopt suitable construction techniques.	
CO2	Decide suitable type of foundation based on soil parameters	
CO3	Supervise the construction of different building elements based on suitability	
CO4	Exhibit the knowledge of building finishes and form work requirements	
Course Code	BUILDING MATERIALS AND CONSTRUCTION - 18CV34	

C01	Salast suitable materials for buildings and adopt suitable construction techniques
CO2	Select suitable materials for buildings and adopt suitable construction techniques.  Decide suitable type of foundation based on soil parameters
CO2	Supervise the construction of different building elements based on suitability
CO4	Exhibit the knowledge of building finishes and form work requirements
Course	BASIC SURVEYING - 18CV35
Code	BASIC SURVETING - 10C V33
C01	Posses a sound knowledge of fundamental principles Geodetics
CO2	Measurement of vertical and horizontal plane, linear and angular dimensions to arrive at solutions to basic surveying problems.
CO3	Capture geodetic data to process and perform analysis for survey problems
CO4	Analyse the obtained spatial data and compute areas and volumes. Represent 3D data on plane figures as contours
Course Code	ENGINEERING GEOLOGY - 18CV36
C01	Apply geological knowledge in different civil engineering practice.
CO2	Students will acquire knowledge on durability and competence of foundation rocks, and confidence enough to use the best building materials.
CO3	Civil Engineers are competent enough for the safety, stability, economy and life of the structures that they construct.
CO4	Able to solve various issues related to ground water exploration, build up dams, bridges, tunnels which are often confronted with ground water problems.
CO5	Intelligent enough to apply GIS, GPS and remote sensing as a latest tool in different civil engineering construction.
Course	COMPUTER AIDED BUILDING PLANNING AND DRAWING - 18CVL37
Code	
C01	Prepare, read and interpret the drawings in a professional set up.
CO2	Know the procedures of submission of drawings and Develop working and submission drawings for building.
CO3	Plan and design aresidential or public building as per the given requirements.
Course Code	BUILDING MATERIALS TESTING LABORATORY - 18CVL38
C01	Reproduce the basic knowledge of mathematics and engineering in finding the strength in
CO2	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.
CO2	tension, compression, shear and torsion.
CO3 Course	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of
Course Code	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials.  ADDITIONAL MATHEMATICS – I 18MATDIP31
Course Code Col	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials.  ADDITIONAL MATHEMATICS – I 18MATDIP31  Apply concepts of complex numbers and vector algebra to analyze the problems arising in related area.
Course Code C01	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials.  ADDITIONAL MATHEMATICS – I 18MATDIP31  Apply concepts of complex numbers and vector algebra to analyze the problems arising in related area.  Use derivatives and partial derivatives to calculate rate of change of multivariate functions.
Course Code Col	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials.  ADDITIONAL MATHEMATICS – I 18MATDIP31  Apply concepts of complex numbers and vector algebra to analyze the problems arising in related area.
Course Code C01	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials.  ADDITIONAL MATHEMATICS – I 18MATDIP31  Apply concepts of complex numbers and vector algebra to analyze the problems arising in related area.  Use derivatives and partial derivatives to calculate rate of change of multivariate functions.  Analyze position, velocity and acceleration in two and three dimensions of vector valued
Course Code C01 CO2 CO3	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials.  ADDITIONAL MATHEMATICS – I 18MATDIP31  Apply concepts of complex numbers and vector algebra to analyze the problems arising in related area.  Use derivatives and partial derivatives to calculate rate of change of multivariate functions.  Analyze position, velocity and acceleration in two and three dimensions of vector valued functions.  Learn techniques of integration including the evaluation of double and triple integrals.  Identify and solve first order ordinary differential equations.
Course Code Col CO2 CO3	tension, compression, shear and torsion.  Identify, formulate and solve engineering problems of structural elements subjected to flexure.  Evaluate the impact of engineering solutions on the society and also will be aware of contemporary issues regarding failure of structures due to unsuitable materials. Learn techniques of integration including the evaluation of double and triple integrals.  Identify and solve first order ordinary differential equations.  COMPLEX ANALYSIS, PROBABILITY AND STATISTICAL METHOD

CO2	Utilize conformal transformation and complex integral arising in aerofoil theory, fluid flow visualization and image processing.
CO3	Apply discrete and continuous probability distributions in analyzing the probability models arising in engineering field.
CO4	Make use of the correlation and regression analysis to fit a suitable mathematical model for the statistical data.
CO5	Construct joint probability distributions and demonstrate the validity of testing the hypothesis.
Course Code	ANALYSIS OF DETERMINATE STRUCTURES - 18CV42
C01	Identify different forms of structural systems.
CO2	Construct ILD and analyse the beams and trusses subjected to moving loads
CO3	Understand the energy principles and energy theorems and its applications to determine the deflections of trusses and beams.
CO4	Determine the stress resultants in arches and cables.
Course Code	APPLIED HYDRAULICS - 18CV43
C01	Apply dimensional analysis to develop mathematical modeling and compute the parametric values in prototype by analyzing the corresponding model parameters
CO2	Design the open channels of various cross sections including economical channel sections
CO3	Apply Energy concepts to flow in open channel sections, Calculate Energy dissipation,
CO4	Compute water surface profiles at different conditions
CO5	Design turbines for the given data, and to know their operation characteristics under different operating conditions
Course Code	CONCRETE TECHNOLOGY - 18CV44
Code CO1	Relate material characteristics and their influence on microstructure of concrete.
C02	Distinguish concrete behavior based on its fresh and hardened properties.
C03	Illustrate proportioning of different types of concrete mixes for required fresh and hardened properties using professional codes.
C04	Adopt suitable concreting methods to place the concrete based on requirement.
C05	Select a suitable type of concrete based on specific application.
Course Code	ADVANCED SURVEYING - 18CV45
C01	Apply the knowledge of geometric principles to arrive at surveying problems
CO2	Use modern instruments to obtain geo-spatial data and analyse the same to appropriate engineering problems.
CO3	Capture geodetic data to process and perform analysis for survey problems with the use of electronic instruments
CO4	Design and implement the different types of curves for deviating type of alignments.
Course Code	WATER SUPPLY AND TREATMENT ENGINEERING - 18CV46
C01	Estimate average and peak water demand for a community.
C02	Evaluate available sources of water, quantitatively and qualitatively and make appropriate choice for a community.
C03	Evaluate water quality and environmental significance of various parameters and plan suitable treatment system.
C04	Design a comprehensive water treatment and distribution system to purify and distribute water The required quality standards.

Course Code	ENGINEERING GEOLOGY LABORATORY - 18CVL47
C01	The students able to identify the minerals, rocks and utilize them effectively in civil engineering practices.
C02	The students will interpret and understand the geological conditions of the area for implementation of civil engineering projects.
C03	The students will interpret subsurface information such as thickness of soil, weathered zone, depth of hard rock and saturated zone by using geophysical methods.
C04	The students will learn the techniques in the interpretation of LANDSAT Imageries to find out the lineaments and other structural features for the given area.
C05	The students will be able to identify the different structures in the field.
Course	FLUID MECHANICS AND HYDRAULIC MACHINES LABORATORY - 18CVL48
Code	Desperties of flyids and the vest of various instruments for flyid flavy massyrement
CO1	Properties of fluids and the use of various instruments for fluid flow measurement.  Working of hydraulic machines under various conditions of working and their characteristics.
Course Code	ADDITIONAL MATHEMATICS – II 18MATDIP41
C01	Solve systems of linear equations using matrix algebra.
C02	Apply the knowledge of numerical methods in modelling and solving of engineering problems.
C03	Apply the knowledge of numerical methods in modelling and solving of engineering problems.
C04	Classify partial differential equations and solve them by exact methods.
C05	Apply elementary probability theory and solve related problems.
Course Code	CONSTRUCTION MANAGEMENT AND ENTREPRENEURSHIP - 18CV51
C01	Prepare a project plan based on requirements and prepare schedule of a project by understanding the activities and their sequence.
CO2	Understand labour output, equipment efficiency to allocate resources required for an activity / project to achieve desired quality and safety.
CO3	Analyze the economics of alternatives and evaluate benefits and profits of a construction activity based on monetary value and time value.
CO4	Establish as an ethical entrepreneur and establish an enterprise utilizing the provisions offered by the federal agencies.
Course Code	ANALYSIS OF INDETERMINATE STRUCTURES - 18CV52
C01	Determine the moment in indeterminate beams and frames having variable moment of inertia and subsidence using slope defection method
CO2	Determine the moment in indeterminate beams and frames of no sway and sway using moment distribution method.
CO3	Construct the bending moment diagram for beams and frames by Kani's method.
	Construct the bending moment diagram for beams and frames using flexibility method
CO4	Analyze the beams and indeterminate frames by system stiffness method.
Course Code	DESIGN OF RC STRUCTURAL ELEMENTS - 18CV53
C01	Understand the design philosophy and principles.
CO2	Solve engineering problems of RC elements subjected to flexure, shear and torsion.
CO3	Demonstrate the procedural knowledge in designs of RC structural elements such as slabs, columns and footings.
CO4	Owns professional and ethical responsibility.

Course Code	BASIC GEOTECHNICAL ENGINEERING - 18CV54
C01	Ability to plan and execute geotechnical site investigation program for different civil engineering projects
CO2	Understanding of stress distribution and resulting settlement beneath the loaded footings on sand and clayey soils
CO3	Ability to estimate factor of safety against failure of slopes and to compute lateral pressure distribution behind earth retaining structures
CO4	Ability to determine bearing capacity of soil and achieve proficiency in proportioning shallow isolated and combined footings for uniform bearing pressure
CO5	Capable of estimating load carrying capacity of single and group of piles
Course	MUNICIPAL WASTEWATER ENGINEERING - 18CV55
Code	Soloot the appropriate service appropriate and motorials in service petropole
CO1	Select the appropriate sewer appurtenances and materials in sewer network.  Design the sewers network and understand the self purification process in flowing water.
CO2	Design the varies physic- chemical treatment units
CO3	Design the various biological treatment units
CO4	Design various AOPs and low cost treatment units.
Course	HIGHWAY ENGINEERING - 18CV56
Code	IIIOIIWAI ENGINEERING - 18C v 30
C01	Acquire the capability of proposing a new alignment or re-alignment of existing roads, conduct necessary field investigation for generation of required data.
CO2	Evaluate the engineering properties of the materials and suggest the suitability of the same for pavement construction.
CO3	Design road geometrics, structural components of pavement and drainage.
CO4	Evaluate the highway economics by few select methods and also will have a basic knowledge of various highway financing concepts.
Course Code	SURVEYING PRACTICE - 18CVL57
C01	Apply the basic principles of engineering surveying and for linear and angular measurements.
CO2	Comprehend effectively field procedures required for a professional surveyor.
CO3	Use techniques, skills and conventional surveying instruments necessary f o r engineering practice.
Course Code	CONCRETE AND HIGHWAY MATERIALS LABORATORY - 18CVL58
C01	Able to interpret the experimental results of concrete and highway materials based on laboratory tests.
C02	Determine the quality and suitability of cement.
C03	Design appropriate concrete mix Using Professional codes.
C04	Determine strength and quality of concrete.
C05	Evaluate the strength of structural elements using NDT techniques.
C06	Test the soil for its suitability as sub grade soil for pavements.
Course Code	DESIGN OF STEEL STRUCTURAL ELEMENTS - 18CV61
C01	Possess knowledge of Steel Structures Advantages and Disadvantages of Steel structures, steel code provisions and plastic behaviour of structural steel.
C02	Understand the Concept of Bolted and Welded connections.
C03	Understand the Concept of Design of compression members, built-up columns and columns splices.

C04	Understand the Concept of Design of tension members, simple slab base and gusseted base.
C05	Understand the Concept of Design of laterally supported and un-supported steel beams.
Course Code	APPLIED GEOTECHNICAL ENGINEERING - 18CV62
C01	Ability to plan and execute geotechnical site investigation program for different civil engineering projects
C02	Understanding of stress distribution and resulting settlement beneath the loaded footings on sand and clayey soils
C03	Ability to estimate factor of safety against failure of slopes and to compute lateral pressure distribution behind earth retaining structures
C04	Ability to determine bearing capacity of soil and achieve proficiency in proportioning shallow isolated and combined footings for uniform bearing pressure
C05	Capable of estimating load carrying capacity of single and group of piles
Course Code	HYDROLOGY AND IRRIGATION ENGINEERING - 18CV63
C01	Understand the importance of hydrology and its components.
C02	Measure precipitation and analyze the data and analyze the losses in precipitation.
C02	Estimate runoff and develop unit hydrographs.
C04	Find the benefits and ill-effects of irrigation.
C05	Find the quantity of irrigation water and frequency of irrigation for various crops.
C06	Find the canal capacity, design the canal and compute the reservoir capacity.
Course	MATRIX METHOD OF STRUCTURAL ANALYSIS (Elective) - 18CV641
Code	WHITE WELLIOD OF STREETERING INCLUDES (ERCCIVC) 100 V 041
C01	Evaluate the structural systems to application of concepts of flexibility and stiffness matrices for simple problems.
C02	Identify, formulate and solve engineering problems with respect to flexibility and stiffness matrices as applied to continuous beams, rigid frames and trusses.
C03	Identify, formulate and solve engineering problems by application of concepts of direct stiffness method as applied to continuous beams and trusses.
C04	Evaluate secondary stresses.
Course Code	SOLID WASTE MANAGEMENT (Elective) - 18CV642
C01	Analyse existing solid waste management system and to identify their drawbacks.
CO2	Evaluate different elements of solid waste management system.
CO3	Suggest suitable scientific methods for solid waste management elements.
CO4	Design suitable processing system and evaluate disposal sites.
Course Code	ALTERNATE BUILDING MATERIALS (Elective) - 18CV643
C01	Solve the problems of Environmental issues concerned to building materials and cost effective building technologies;
C02	Select appropriate type of masonry unit and mortar for civil engineering constructions; also they are able to Design Structural Masonry Elements under Axial Compression.
C03	Analyse different alternative building materials which will be suitable for specific climate and in an environmentally sustainable manner. Also capable of suggesting suitable agro and industrial wastes as a building material.
C04	Recommend various types of alternative building materials and technologies and design a energy efficient building by considering local climatic condition and building material.
Course Code	GROUND IMPROVEMENT TECHNIQUES (Elective) - 18CV644
CO1	Give solutions to solve various problems associated with soil formations having less strength.

CO2	Use effectively the various methods of ground improvement techniques depending upon the requirements.
CO3	utilize properly the locally available materials and techniques for ground improvement so that economy in the design of foundations of various civil engineering structures
Course Code	RAILWAYS, HARBOUR, TUNNELING AND AIRPORTS (Elective) - 18CV645
C01	Acquires capability of choosing alignment and also design geometric aspects of railway system, runway and taxiway.
CO2	Suggest and estimate the material quantity required for laying a railway track and also will be able to determine the hauling capacity of a locomotive.
CO3	Develop layout plan of airport, harbor, dock and will be able relate the gained knowledge to identify required type of visual and/or navigational aids for the same.
CO4	Apply the knowledge gained to conduct surveying, understand the tunneling activities.
Course Code	REMOTE SENSING AND GIS (Elective) -18CV651
C01	Collect data and delineate various elements from the satellite imagery using their spectral signature.
CO2	Analyze different features of ground information to create raster or vector data.
CO3	Perform digital classification and create different the maticmaps for solving specific problems
CO4	Make decision based on the GIS analysis on thematic maps.
Course Code	TRAFFIC ENGINEERING(Elective) - 18CV652
C01	Understand the human factors and vehicular factors in traffic engineering design.
CO2	Conduct different types of traffic surveys and analysis of collected data using statistical concepts.
CO3	Use anappropriate traffic flow theory and to comprehend the capacity & signalized intersection analysis.
CO4	Understand the basic knowledge of Intelligent Transportation System.
Course Code	OCCUPATIONAL HEALTH AND SAFETY (Elective) - 18CV653
C01	Identify hazards in the work place that poseadangeror threat to their safety or health, orthatofothers.
CO2	Control unsafe or unhealthy hazards and propose methods to eliminate the hazard.
CO3	Present a coherent analysis of a potential safety or health hazard both verbally and in writing, citing the occupational Health and Safety Regulations as well as supported legislation.
CO4	Discuss the role of health and safety in the workplace pertaining to the responsibilities of workers, managers, supervisors.
CO5	Identify the decisions required to maintain protection of the environment, workplace as well as personal
Course Code	SUSTAINABILITY CONCEPTS IN CIVIL ENGINEERING (Elective) - 18CV654
C01	Learn the sustainability concepts; understand the role and responsibility of engineers in Sustainable Development.
CO2	Quantify sustainability, and resource availability, Rationalize the sustainability based on scientific merits.
CO3	Understand and apply sustainability concepts in construction practices, designs, product developments and processes across various engineering disciplines.

CO4	Make a decision in applying green engineering concepts and become a lifelong advocate of sustainability in society.
Course Code	SOFTWARE APPLICATION LABORATORY - 18CVL66
C01	Use software skills in a professional set up to automate the work and thereby reduce cycle time for completion of the work
Course Code	ENVIRONMENTAL ENGINEERING LABORATORY - 18CVL67
C01	Acquire capability to conduct experiments and estimate the concentration of different parameters.
CO2	Compare the result with standards and discuss based on the purpose of analysis.
CO3	Determine type of treatment, degree of treatment for water and waste water.
CO4	Identify the parameter to be analyzed for the student project work in environmental stream.
Course Code	EXTENSIVE SURVEY PROJECT - 18CVP68
C01	Apply Surveying knowledge and tools effectively for the projects
CO2	Understanding Task environment, Goals, responsibilities, Task focus, working in Teams towards common goals, Organizational performance expectations, technical and behavioral competencies.
CO3	Application of individual effectiveness skills in team and organizational context, goal setting, time management, communication and presentation skills.
CO4	Professional etiquettes at workplace, meeting and general
CO5	Establishing trust based relationships in teams & organizational environment
CO6	Orientation towards conflicts in team and organizational environment, Understanding sources of conflicts, Conflict resolution styles and techniques
Course Code	QUANTITY SURVEYING AND CONTRACT MANAGEMENT - 18CV71
C01	Taking out quantities and work out the cost and preparation of abstract for the estimated cost for various civil engineering works.
CO2	Prepare detailed and abstract estimates for various road works, structural works and water supply and sanitary works.
CO3	Prepare the specifications and analyze the rates for various items of work.
CO4	Assess contract and tender documents for various construction works.
CO5	Determine the externals of functional and solve the simple problem of the calculus of variations.
Course Code	DESIGN OF RCC AND STEEL STRUCTURES - 18CV72
C01	Students will acquire the basic knowledge in design of RCC and Steel Structures.
CO2	Students will have the ability to follow design procedures as per codal provisions and skills to arrive at structurally safe RC and Steel members.
Course Code	THEORY OF ELASTICITY (Elective-1) - 18CV731
C01	Ability to apply knowledge of mechanics and mathematics to model elastic bodies as continuum.
CO2	Ability to formulate boundary value problems; and calculate stresses and strains.
CO3	Ability to comprehend constitutive relations for elastic solids and compatibility constraints.
CO4	Ability to solve two-dimensional problems (plane stress and plane strain) using the concept of stress function
Course Code	AIR POLLUTION AND CONTROL (Elective-1) - 18CV732
C01	Identify the major sources of air pollution and understand their effects on health and environment.

CO2	Evaluate the dispersion of air pollutants in the atmosphere and to develop air quality models.
CO3	Ascertain and evaluate sampling techniques for atmospheric and stack pollutants.
CO4	Choose and design control techniques for particulate and gaseous emissions.
Course Code	PAVEMENT MATERIALS AND CONSTRUCTION (Elective-1) - 18CV733
C01	Students will be able to evaluate and assess the suitability of any pavement material to be used in various components of pavement by conducting required tests as per IS,IRC specifications
CO2	Students will be able to formulate the proportions of different sizes of aggregates to suit gradation criteria for various mixes as per MORTH and also design bituminous mixes.
CO3	Students will be competent to adapt suitable modern technique and equipment for speedy and economic construction.
CO4	Student will be able to execute the construction of embankment, flexible, rigid pavement and perform required quality control tests at different stages of pavement construction.
Course Code	GROUND WATER HYDRAULICS (Elective-1) - 18CV734
C01	Find the characteristics of aquifers
CO2	Estimate the quantity of ground water by various methods.
CO3	Locate the zones of ground water resources.
CO4	Select particular type of well and augment the ground water storage.
Course	MASONRY STRUCTURES (Elective-1) - 18CV735
Code	
C01	Select suitable material for masonry construction by understanding engineering properties.
CO2	Compute loads, load combinations and analyze the stresses in masonry.
CO3	Design masonry under compression (Axial load) for various requirements and conditions.
CO4	Design masonry under bending (Eccentric, lateral, transverse load) for various requirements and conditions.
CO5	Assess the behavior of shear wall and reinforced masonry.
Course Code	EARTHQUAKE ENGINEERING (Elective-2) -18CV741
C01	Acquire basic knowledge of engineering seismology.
CO2	Develop response spectra for a given earthquake time history and its implementation to estimate response of a given structure.
CO3	Understanding of causes and types of damages to civil engineering structures during different earthquake scenarios.
CO4	Analyze multi-storied structures modeled as shear frames and determine lateral force distribution due to earthquake input motion using IS-1893 procedures.
CO5	Comprehend planning and design requirements of earthquake resistant features of RCC and Masonry structures thorough exposure to different IS-codes of practices.
Course Code	DESIGN CONCEPT OF BUILDING SERVICES (Elective-2) - 18CV742
C01	Describe the basics of house plumbing and waste water collection and disposal.
CO2	Discuss the safety and guidelines with respect to fire safety.
CO3	Describe the issues with respect to quantity of water, rain water harvesting and roof top harvesting.
CO4	Understand and implement the requirements of thermal comfort in buildings.
Course Code	REINFORCED EARTH STRUCTURES (Elective-2) - 18CV743
C01	Identify, formulate reinforced earth techniques that are suitable for different soils and in different structures;

CO2	Understand the laboratory testing concepts of Geo synthetics
CO3	Design RE retaining structures and Soil Nailing concepts
CO4	Determine the load carrying capacity of Foundations resting on RE soil bed.
Course Code	DESIGN OF HYDRAULIC STRUCTURES (Elective-2) - 18CV744
C01	Check the stability of gravity dams and design the dam.
CO2	Estimate the quantity of seepage through earth dams.
CO3	Design spillways and aprons for various diversion works.
CO4	Select particular type of canal regulation work for canal network.
Course Code	URBAN TRANSPORT PLANNING (Elective-2) - 18CV745
C01	Design, conduct and administer surveys to provide the data required for transportation planning.
CO2	Supervise the process of data collection about travel behavior and analyze the data for use in transport planning.
CO3	Develop and calibrate modal split, trip generation rates for specific types of land use developments.
CO4	Adopt the steps that are necessary to complete a long-term transportation plan.
Course Code	FINITE ELEMENT METHOD (Elective-3) -18CV751
C01	The student will have the knowledge on advanced methods of analysis of structures.
Course Code	NUMERICAL METHODS AND APPLICATIONS (Elective-3) - 18CV752
C01	The students will have a clear perception of the power of numerical techniques, ideas and would be able to demonstrate the applications of these techniques to problems drawn from Industry, management and other engineering fields.
Course Code	ENVIRONMENTAL PROTECTION AND MANAGEMENT - (Elective-3)
C01	Appreciate the elements of Corporate Environmental Management systems complying to international environmental management system standards.
CO2	Lead pollution prevention assessment team and implement waste minimization options.
CO3	Develop, Implement, maintain and Audit Environmental Management systems for Organizations.
Course Code	COMPUTER AIDED DETAILING OF STRUCTURES - 18CVL76
C01	Prepare detailed working drawings of Steel Structures
CO2	Prepare detailed working drawings of RCC Structures
Course Code	GEOTECHNICAL ENGINEERING LABORATORY -18CVL77
C01	Physical and index properties of the soil
CO2	Classify based on index properties and field identification
CO3	To determine OMC and MDD, plan and assess field compaction program
CO4	Shear strength and consolidation parameters to assess strength and deformation characteristics
Course Code	DESIGN OF PRE- STRESSECONCRETE - 18CV81
C01	Understand the requirement of PSC members for present scenario.
CO2	Analyse the stresses encountered in PSC element during transfer and at working.
CO3	Understand the effectiveness of the design of PSC after studying losses
CO4	Capable of analyzing the PSC element and finding its efficiency
CO5	Design PSC beam for different requirements.

Course Code	BRIDGE ENGINEERING (Elective-2) -18CV821
C01	Understand the load distribution and IRC standards.
CO2	Design the slab and T beam bridges.
CO3	Design Box culvert, pipe culvert
CO4	Use bearings, hinges and expansion joints
CO5	Design Piers and abutments.
Course	PREFABRICATED STRUCTURES (Elective-2) -18CV822
Code	Use modules construction industrialized construction
CO1	Use modular construction, industrialized construction  Design prefabricated elements
CO2	Design some of the prefabricated elements
CO4	Use the knowledge of the construction methods and prefabricated elements in buildings
Course	ADVANCED FOUNDATION ENGINEERING (Elective-2) - 18CV823
Code	ADVANCED FOUNDATION ENGINEERING (Elective-2) - 18C v 825
C01	Estimate the size of isolated and combined foundations to satisfy bearing capacity and settlement criteria.
CO2	Estimate the load carrying capacity and settlement of single piles and pile groups including laterally loaded piles.
CO3	Understand the basics of analysis and design principles of well foundation, drilled piers and caissons.
CO4	Understand basics of analysis and design principles of machine foundations.
Course Code	REHABILITATION AND RETROFITTING (Elective-2) - 18CV824
C01	Identify the causes for structural (Concrete) deterioration.
CO2	Assess the type and extent of damage and carry out damage assessment of structures through various types of tests.
CO3	Recommend maintenance requirements of the buildings and preventive measures against influencing factors.
Course Code	PAVEMENT DESIGN (Elective-2) - 18CV825
C01	Systematically generate and compile required data's for design of pavement (Highway & Airfield).
CO2	Analyze stress, strain and deflection by boussinesq's, bur mister's and westergaard's theory.
CO3	Design rigid pavement and flexible pavement conforming to IRC58-2002 and IRC37-2001
CO4	Evaluate the performance of the pavement and also develops maintenance statement based on site specific requirements
Course Code	PROJECT WORK PHASE-2 - 18CVP83
C01	Describe the project and be able to defend it.
CO2	Develop critical thinking and problem solving skills.
CO3	Learn to use modern tools and techniques.
CO4	Communicate effectively and to present ideas clearly and coherently both in written and oral forms.
C05	Develop skills to work in a team to achieve common goal.
CO6	Develop skills of project management and finance.
CO7	Develop skills of self learning, evaluate their learning and take appropriate actions to improve it.
CO8	Prepare them for life-long learning to face the challenges and support the technological changes to meet the societal needs.

Course Code	TECHNICAL SEMINAR - 18CVS84
C01	Develop knowledge in the field of Civil Engineering and other disciplines through independent learning and collaborative study
CO2	Identify and discuss the current, real-time issues and challenges in engineering & technology.
CO3	Develop written and oral communication skills.
C04	Explore concepts in larger diverse social and academic contexts.
CO5	Apply principles of ethics and respect in interaction with others.
CO6	Develop the skills to enable life-long learning.
Course	INTERNSHIP /PROFESSIONAL PRACTICE - 18CVI85
Code	
CO1	Students will get the field exposure and experience

## PROGRAMME OUTCOME, PROGRAMMESPECIFIC OUTCOMES AND COURSEOUTCOMES OF ALL DEPARTMENTS-2022-23(CRITERIA- 2)

2.6.1 Program outcomes, program specific outcomes and course outcomes

**Department of Computer Science & Engineering** 

### Program Outcomes (PO's)

- **PO 1:** Apply the knowledge of Mathematics, Science and Computer Engineering to identify, formulate and solve any engineering problems with varied complexity.
- **PO 2:** Design and develop a system, component or process to meet the desired needs within the realistic constraints to solve the real-time problems for betterment of society.
- PO 3: Design and conduct experiments as well as analyze and interpret data.
- **PO 4:** Communicate and Present the information effectively.
- **PO 5:** Use the techniques, skills and modern engineering tools necessary for engineering practice.
- **PO 6:** Handle various technical, administrative and managerial responsibilities successfully in any organizations globally.
- **PO 7:** Get Recognize as successful Entrepreneur globally.
- **PO 8:** Demonstrate commitment in handling any responsibilities with professional, ethical and social importance.
- **PO 9:** Engage in lifelong learning to upgrade their engineering skills consistently.
- **PO 10:** Adapt to any working environment of heterogeneous and multidisciplinary teams with good sustainability and high performance.
- PO 11: Clear successfully the competitive exams for placement, higher studies and government services.
- **PO 12:** Understand and demonstrate the impact of engineering solutions in a global, economic, environmental and societal context.

#### Program Specific Outcomes (PSO's)

- **PSO 1:** An ability to design and develop hardware and software in emerging technology environments like cloud computing embedded products and real-time systems. (Orientation towards Systems Programming)
- **PSO 2:** Knowledge of data management system like data acquisition, big data so as to enable students in solving problems using the techniques of data analytics like pattern recognition and knowledge discovery. (Orientation towards Data Sciences)

## UG-B.E (CS) 2022-Scheme COs

	DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING
COURSE CODE	BPOPS103/203-PRINCIPLES OF PROGRAMMING USING C
CO1	Elucidate the basic architecture and functionalities of a computer and also recognize the hardware parts
CO2	Apply programming constructs of C language to solve the realworld problem
CO3	Explore user-defined data structures like arrays in implementing solutions to problems like searching and sorting
CO4	Explore user-defined data structures like structures, unions and pointers in implementing solutions
CO5	Design and Develop Solutions to problems using modular programming constructs using functions
<b>COURSE CODE</b>	BPLCK105B/205B-INTRODUCTION TO PYTHONPROGRAMMING
CO1	Demonstrate proficiency in handling loops and creation offunctions.
CO2	Identify the methods to create and manipulate lists, tuples and dictionaries.
CO3	Develop programs for string processing and file organization
CO4	Interpret the concepts of Object-Oriented Programming as used in Python.
<b>COURSE CODE</b>	BCS302-DIGITAL DESIGN AND COMPUTERORGANIZATION
CO1	Apply the K–Map techniques to simplify various Boolean expressions.
CO2	Design different types of combinational and sequential circuits along with Verilog programs.
CO3	Describe the fundamentals of machine instructions, addressing modes and Processor performance
CO4	Explain the approaches involved in achieving communication between processor and I/O devices
CO5	Analyze internal Organization of Memory and Impact of cache/Pipelining on Processor Performance.
COURSE CODE	BCS303-OPERATING SYSTEMS
CO1	Explain the structure and functionality of operating system
CO2	Apply appropriate CPU scheduling algorithms for the given problem.
CO3	Analyse the various techniques for process synchronization and deadlock handling.
CO4	Apply the various techniques for memory management
CO5	Explain file and secondary storage management strategies
CO6	Describe the need for information protection mechanisms.  BCS304-DATA STRUCTURES AND APPLICATIONS
COURSE CODE	
CO1 CO2	Explain different data structures and their applications.  Apply Arrays, Stacks and Queue data structures to solve the given problems.
CO2	Use the concept of linked list in problem solving.
CO4	Develop solutions using trees and graphs to model the real-world problem.
	Explain the advanced Data Structures concepts such as Hashing Techniques and Optimal Binary
CO5	Search Trees.
COURSE CODE	BCSL305-DATA STRUCTURES LABORATORY
CO1	Analyze various linear and non-linear data structures
CO2	Demonstrate the working nature of different types of data structures and their applications
CO3	Use appropriate searching and sorting algorithms for the give scenario
CO4	Apply the appropriate data structure for solving real world problems
<b>COURSE CODE</b>	BCS306A-OBJECT ORIENTED PROGRAMMING WITH JAVA
CO1	Demonstrate proficiency in writing simple programs involving branching and looping structures.
CO2	Design a class involving data members and methods for the given scenario.
CO3	Apply the concepts of inheritance and interfaces in solving real world problems.
CO4	Use the concept of packages and exception handling in solving complex problem
COLUMN CODE	Apply concepts of multithreading, autoboxing and enumerations in program development
CO1	BCS306B-OBJECT ORIENTED PROGRAMMING with C++  Illustrate the basic concents of object oriented programming
CO1 CO2	Illustrate the basic concepts of object-oriented programming.  Design appropriate classes for the given real world scenario.
CO2	Apply the knowledge of compile-time / run-time polymorphism to solve the given problem
CO4	Use the knowledge of inheritance for developing optimized solutions
CO5	Apply the concepts of templates and exception handling for the given problem
CO6	Use the concepts of input output streams for file operations
COURSE CODE	BSCK307-SOCIAL Connect & Responsibility
CO1	Communicate and connect to the surrounding.

~~*	
CO2	Create a responsible connection with the society.
CO3	Involve in the community in general in which they work.
CO4	Notice the needs and problems of the community and involve them in problem –solving.
CO5	Develop among them a sense of social & civic responsibility & utilize their knowledge I finding practical solutions toindividual and community problems.
CO6	Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democraticattitudes.
<b>COURSE CODE</b>	BCS358A-DATA ANALYTICS WITH EXCEL
CO1	Use advanced functions and productivity tools to assist in developing worksheets.
CO2	Manipulate data lists using Outline and PivotTables
CO3	Use Consolidation to summarize and report results from multiple worksheets.
CO4	Apply Macros and Auto filter to solve the given real world scenario.
COURSE CODE	BCS358B-R PROGRAMMING
CO1	Explain the fundamental syntax of R data types, expressions and the usage of the R-Studio IDE
CO2	Develop a program in R with programming constructs:conditionals, looping functions
CO3	Apply the list and data frame structure of the R programminglanguage.
CO4	Use visualization packages and file handlers for data analysis.
COURSE CODE	BCS358C-PROJECT MANAGEMENT WITH GIT
CO1	Use the basics commands related to git repository
CO2	Create and manage the branches
CO3	Apply commands related to Collaboration and Remote Repositories
CO4	Use the commands related to Git Tags, Releases and advanced git operations
CO5	Analyse and change the git history
COURSE CODE	BCS358D-DATA VISUALIZATION WITH PYTHON
CO1	Demonstrate the use of IDLE or PyCharm IDE to create Python Applications
CO2	. Use Python programming constructs to develop programs for solving real-world problems
CO3	Use Mat plot lib for drawing different Plots
CO4	Demonstrate working with Seaborn, Bokeh for visualization.
CO5	Use Plotly for drawing Time Series and Maps.

COURSE CODE 22SCS21-BIG DATA ANALYTICS  CO1 Interpret managing big data using Hadoop and SPARK technologies  CO2 Explain HDFS and MapReduce concepts		
CO1 Interpret managing big data using Hadoop and SPARK technologies CO2 Explain HDFS and MapReduce concepts		
CO2 Explain HDFS and MapReduce concepts		
Explain TIDES and Mapiceduce concepts		Interpret managing big data using Hadoop and SPARK technologies
CO3		Explain HDFS and MapReduce concepts
Install, configure, and run Hadoop and HDFS	CO3	Install, configure, and run Hadoop and HDFS

CO4	Perform map-reduce analytics using Hadoop and related tools
CO5	
	Explain SPARK concepts
COURSE CODE	22SCS22-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
CO1	Define Artificial intelligence and identify problems for AI. Characterize the searchtechniques
G0.	to solve problems and recognize the scope of classical search techniques
CO2	Define knowledge and its role in AI. Demonstrate the use of Logic in solving AI problems
CO3	Demonstrate handling of uncertain knowledge and reasoning in probability theory.
COURSE CODE	22SCS231-WIRELESS NETWORKS & MOBILE COMPUTING
CO1	Explain state of art techniques in wireless communication
CO2	Discover CDMA, GSM. Mobile IP, WiMAX
CO3	Demonstrate program for CLDC, MIDP let model and security concerns
COURSE CODE	22SCS232-MOBILE APPLICATION DEVELOPMENT
CO1	Describe the requirements for mobile applications
CO2	Explain the challenges in mobile application design and development
CO3	Deploy mobile applications in Android and iPone marketplace for distribution
COURSE CODE	22SCS233-NATURAL LANGUAGE PROCESSING
CO1	Analyze the natural language text.
CO2	Generate the natural language.
CO3	Demonstrate Text mining.
COURSE CODE	22SCS234-CYBER SECURITY AND CYBER LAW
CO1	Demonstrate cyber security cybercrime and forensics
CO2	Demonstrate tools and methods used in cybercrime and security
CO3	Illustrate evidence collection and legal challenges
COURSE CODE	22SCS235-DECISION SUPPORT SYSTEM
CO1	Appraise issues related to the development of DSS
CO2	Select appropriate modeling techniques
CO3	Analyze, design and implement a DSS
COURSE CODE	22SCS241-DIGITAL IMAGE PROCESSING
	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization
COURSE CODE	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms
COURSE CODE CO1	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization
COURSE CODE CO1	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement
COURSE CODE CO1 CO2	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and
COURSE CODE CO1 CO2	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods
COURSE CODE CO1 CO2 CO3	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models
COURSE CODE  CO2  CO3  COURSE CODE	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN
COURSE CODE  CO2  CO3  COURSE CODE  CO1	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO5	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO5  CO4  CO5  CO4  CO5  CO4  CO5  CO4  CO5	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO5  CO4  CO5  CO4  CO5  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO2	22SCS241-DIGITAL IMAGE PROCESSING  Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO4  CO5  CO4  CO5  CO1  CO2  CO3  CO4  CO2  CO3  CO4  CO2  CO3  CO4	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO5  CO4  CO5  CO4  CO5  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO2	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  COURSE CODE  CO1  CO2	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental Requirements, Customer Tests
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  COCOC  CO3	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental Requirements, Customer Tests  Demonstrate concepts to Eliminate Waste
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO2  CO3  CO4  CO2  CO3  CO4  COCOS  CO4  COURSE CODE  CO1  CO2  CO3  CO4  COURSE CODE  CO1  CO2	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental Requirements, Customer Tests  Demonstrate concepts to Eliminate Waste
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO2  CO3  CO4  CO2  CO3  CO4  COCOCC  CO3  CO4  COURSE CODE  CO1  CO2  CO3  CO4  COURSE CODE  CO1  CO2	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental Requirements, Customer Tests  Demonstrate concepts to Eliminate Waste  22SCS24-NOSQL DATABASE  Explain NoSQL Key/Value databases using riak.
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO2  CO3  CO4  CO2  CO3  CO4  CO2  CO3  CO4  COURSE CODE  CO1  CO2  CO1  CO2  CO1  CO2	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental Requirements, Customer Tests  Demonstrate concepts to Eliminate Waste  22SCS24-NOSQL DATABASE  Explain NoSQL Key/Value databases using riak.  Apply Nosql Development tools with suitable usecase
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4  CO5  COURSE CODE  CO1  CO2  CO3  CO4  CO2  CO3  CO4  CO2  CO3  CO4  COCOCC  CO3  CO4  COURSE CODE  CO1  CO2  CO3  CO4  COURSE CODE  CO1  CO2	Explain the basics and fundamentals of digital image processing, such asdigitization sampling, quantization, and 2D-transforms  Operate on images using the techniques of smoothing, sharpening and enhancement  Interpret the basics of segmentation, features extraction, compression and recognition methods for color models  22SCS24-OBJECT ORIENTED DESIGN  Identify the heuristics of the object-oriented programming  Explain the fundamentals of OOP  Examine fine object-oriented relations  Explain the role of Physical Object-Oriented Design,  Make use of Heuristics in The Use of Heuristics in Object-Oriented Design  22SCS243-MULTIMEDIA COMMUNICATIONS  Deploy the right multimedia communication models  Apply QoS to multimedia network applications with efficient routing techniques  Solve the security threats in the multimedia networks  Work on real-time multimedia network applications  22SCS244-AGILE TECHNOLOGIES  Define XP Lifecycle, XP Concepts, Adopting XP  Examine on Pair Programming, Root-Cause Analysis, Retrospectives, Planning, Incremental Requirements, Customer Tests  Demonstrate concepts to Eliminate Waste  22SCS24-NOSQL DATABASE  Explain NoSQL Key/Value databases using riak.

COURSE CODE	22SCSL2-BIG DATA ANALYTICS LABORATORY
CO1	Professional Skills: The ability to understand, analyze and develop computer programs in the
COI	areas related to algorithms, system software, multimedia, web design, big data analytics, and
	networking for efficient design of computer-basedsystems of varying complexity
CO2	Problem-Solving Skills: The ability to apply standard practices and strategies insoftware
002	project development using open-ended programming environments to deliver a quality
	product for business success
CO3	Successful Career and Entrepreneurship: The ability to employ modern computer languages,
	environments, and platforms in creating innovative career paths to bean entrepreneur, and a zest
	for higher studies
COURSE CODE	22SCS321-CLOUD SECURITY
CO1	Demonstrate the growth of Cloud computing, architecture and different modules of
	implementation
CO2	Explain the different types of cloud solutions among IaaS, PaaS, SaaS
CO3	Access the security implementation flow, actions and responsibilities of stake holders.
CO4	Compare the Data Centre operations, encryption methods and deployment details
CO5	Provide recommendations for using and managing the customer's identity and choose the type of
	virtualization to be used
COURSE CODE	22SCS322-CYBER FORENSICS
CO1	Explain the basics of computer forensics
CO2	Apply a number of different computer forensic tools to a given scenario
CO3	Analyze and validate forensics data
CO4	Identify the vulnerabilities in a given network infrastructure
CO5	Implement real-world hacking techniques to test system security
COURSE CODE	22SCS323-SOFT AND EVOLUTIONARY COMPUTING
CO1	Demonstrate the working of soft computing techniques
CO2	Apply the learned techniques to solve realistic problems
CO3	Differentiate soft computing with hard computing techniques
COURSE CODE	ADVANCES IN STORAGE AREA NETWORK
CO1	Identify the need for performance evaluation and the metrics used for it
CO2	Apply the techniques used for data maintenance.
CO3	Realize strong virtualization concepts
CO4	Illustrate RAID concepts, policies for LUN masking, file systems
COURSE CODE	22SCS325-BUSINESS INTELLIGENCE AND ITS APPLICATIONS
CO1	Explain the complete life cycle of BI/Analytical development
CO2	Illustrate technology and processes associated with Business Intelligence
22.4	framework
CO3	Demonstrate a business scenario, identify the metrics, indicators and make L2
COURGE CORE	recommendations to achieve the business goa
COURSE CODE	22SCS331-MANAGING BIG DATA
CO1	Managing big data using Hadoop and SPARK technologies
CO2 CO3	Explain HDFS and MapReduce concepts
CO4	Install, configure, and run Hadoop and HDFS
COURSE CODE	Apply Big Data Solutions using Hadoop Eco System
	22SCS332-PATTERN RECOGNITION Change appropriate algorithms for Pottern Page anition
CO1	Choose appropriate algorithms for Pattern Recognition.  Apply nearest neighbour classifier.
CO2	Apply Decision tree and clustering techniques to various applications
CO4	Get acquainted with recent developments in pattern recognition and itsapplications
COURSE CODE	22SCS333-COMPUTER VISION
CO1	Implement fundamental image processing techniques required for computer vision.
CO2	Perform shape analysis
CO3	Implement boundary tracking techniques
CO4	Apply chain codes and other region descriptors
COURSE CODE	22SCS334-DEEP LEARNING
CO1	Identify the deep learning algorithms which are more appropriate for various types of learning
	tasks in various domains.
CO2	Implement deep learning algorithms and solve real-world problems.
	implement deep feating agortums and solve real-world problems.

CO3	Execute performance metrics of Deep Learning Techniques.
CO4	Compare modeling aspects of various neural network architectures
COURSE CODE	22SCS335-BLOCKCHAIN TECHNOLOGY
CO1	Explore the emerging abstract models for Blockchain Technology and to familiarise with the
	functional/operational concepts
CO2	Analyze the various consensus mechanisms, applications, research challenges and future
	directions
CO3	Practical implementation of Blockchain operations and solutions using Ethereum
COURSE CODE	22SCS34-PROJECT WORK PHASE – 1
CO1	Demonstrate a sound technical knowledge of their selected project topic
CO2	Undertake problem identification, formulation, and solution
CO3	Design engineering solutions to complex problems utilising a systems approach
CO4	Communicate with engineers and the community at large in written an oral forms
CO5	Demonstrate the knowledge, skills and attitudes of a professional engineer
COURSE CODE	22SCS35-SOCIETAL PROJECT
CO1	Build creative solutions for development problems of current scenario in the
	Society
CO2	Utilize the skills developed in the curriculum to solve real life problems
CO3	Improve understanding and develop methodology for solving complex issues
COURSE CODE	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE
COURSE CODE CO1	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done
COURSE CODE CO1 CO2	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done.
COURSE CODE CO1 CO2 CO3	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work
COURSE CODE  CO1  CO2  CO3  COURSE CODE	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work 22SCS41-PROJECT WORK PHASE -2
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2 Present the project and be able to defend it
COURSE CODE  CO1  CO2  CO3  COURSE CODE	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2 Present the project and be able to defend it Make links across different areas of knowledge and to generate, develop and evaluate ideas and
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2 Present the project and be able to defend it  Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2 Present the project and be able to defend it Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task Habituated to critical thinking and use problem solving skills
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2 Present the project and be able to defend it  Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task  Habituated to critical thinking and use problem solving skills  Communicate effectively and to present ideas clearly and coherently in both thewritten and
COURSE CODE  CO1  CO2  CO3  COURSE CODE  CO1  CO2  CO3  CO4	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE Gain practical experience within industry in which the internship is done Acquire knowledge of the industry in which the internship is done. Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2 Present the project and be able to defend it  Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task  Habituated to critical thinking and use problem solving skills  Communicate effectively and to present ideas clearly and coherently in both thewritten and ora forms
COURSE CODE  CO2  CO3  COURSE CODE  CO1  CO2  CO3	22SCS36-INTERNSHIP / PROFESSIONAL PRACTICE  Gain practical experience within industry in which the internship is done  Acquire knowledge of the industry in which the internship is done.  Apply knowledge and skills learned to classroom work  22SCS41-PROJECT WORK PHASE -2  Present the project and be able to defend it  Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task  Habituated to critical thinking and use problem solving skills  Communicate effectively and to present ideas clearly and coherently in both thewritten and

# UG-B.E (CS)2021-Scheme COs

DEPARTMENT	OF COMPUTER SCIENCE & ENGINEERING
COURSE CODE	21PSP23/13 -PROBLEM-SOLVING THROUGH PROGRAMMING
CO1	Elucidate the basic architecture and functionalities of a computer and also recognize the hardware parts.
CO2	Apply programming constructs of C language to solve the real world problem
CO3	Explore user-defined data structures like arrays in implementing solutions to problems like searching and sorting
CO4	Explore user-defined data structures like structures, unions and pointers in implementing solutions
CO5	Design and Develop Solutions to problems using modular programming constructs using functions
COURSE CODE	21CS32-DATA STRUCTURES AND APPLICATIONS
CO1	Identify different data structures and their applications
CO2	Apply stack and queues in solving problems.
CO3	Demonstrate applications of linked list.
CO4	Explore the applications of trees and graphs to model and solve the real-world problem
CO5	Make use of Hashing techniques and resolve collisions during mapping of key value pairs
COURSE CODE	21CS33-ANALOG AND DIGITAL ELECTRONICS
CO1	Design and analyze application of analog circuits using photo devices, timer IC, power supplyand regulator IC and op-amp
CO2	Explain the basic principles of A/D and D/A conversion circuits and develop the same
CO3	Simplify digital circuits using Karnaugh Map, and Quine-McClusky Methods
CO4	Explain Gates and flip flops and make us in designing different data processing circuits,registers and counters and compare the types.
CO5	Develop simple HDL programs
COURSE CODE	21CS34 -COMPUTER ORGANIZATION AND ARCHITECTURE
CO1	Explain the organization and architecture of computer systems with machine instructions and programs
CO2	Analyze the input/output devices communicating with computer system
CO3	Demonstrate the functions of different types of memory devices
CO4	Apply different data types on simple arithmetic and logical unit
CO5	Analyze the functions of basic processing unit, Parallel processing and pipelining
COURSE CODE	21CSL35-OBJECT ORIENTED PROGRAMMING WITH JAVA LABORATORY
CO1	Use Eclipse/NetBeans IDE to design, develop, debug Java Projects
CO2	Analyze the necessity for Object Oriented Programming paradigm over structured programming and become familiar with the fundamental concepts in OOP.
CO3	Demonstrate the ability to design and develop java programs, analyze, and interpret object-oriented data and document results
CO4	Apply the concepts of multiprogramming, exception/event handling, abstraction to developrobust programs
CO5	Develop user friendly applications using File I/O and GUI concepts.

COURSE CODE	21CSL381-MASTERING OFFICE
CO1	Know the basics of computers and prepare documents, spreadsheets, make small presentations with audio, video and graphs and would be acquainted with internet
CO2	Create, edit, save and print documents with list tables, header, footer, graphic, spellchecker, mail merge and grammar checker
CO3	Attain the knowledge about spreadsheet with formula, macros spell checker etc
CO4	Demonstrate the ability to apply application software in an office environment
CO5	Use Google Suite for office data management tasks
COURSE CODE	21CS382-PROGRAMMING IN C++
CO1	Able to understand and design the solution to a problem using object-oriented programming concepts
CO2	Able to reuse the code with extensible Class types, User-defined operators and function Overloading
CO3	Achieve code reusability and extensibility by means of Inheritance and Polymorphism
CO4	Identify and explore the Performance analysis of I/O Streams
CO5	Implement the features of C++ including templates, exceptions and file handling for providing programmed solutions to complex problems
COURSE CODE	21CS42-DESIGN AND ANALYSIS OF ALGORITHMS
CO1	Analyze the performance of the algorithms, state the efficiency using asymptotic notations and analyze mathematically the complexity of the algorithm
CO2	Apply divide and conquer approaches and decrease and conquer approaches in solving theproblems analyze the same
CO3	Apply the appropriate algorithmic design technique like greedy method, transform and conquer approaches and compare the efficiency of algorithms to solve the given problem
CO4	Apply and analyze dynamic programming approaches to solve some problems. and improve analgorithm time efficiency by sacrificing space
CO5	Apply and analyze backtracking, branch and bound methods and to describe P, NP and NP-Complete problems
COURSE CODE	21CS43-MICROCONTROLLER AND EMBEDDED SYSTEMS
CO1	Explain C-Compilers and optimization
CO2	Describe the ARM microcontroller's architectural features and program module
CO3	Apply the knowledge gained from programming on ARM to different applications
CO4	Program the basic hardware components and their application selection method
CO5	Demonstrate the need for a real-time operating system for embedded system applications
COURSE CODE	21CS44-OPERATING SYSTEMS
CO1	Identify the structure of an operating system and its scheduling mechanism
CO2	Demonstrate the allocation of resources for a process using scheduling algorithm
CO3	Identify root causes of deadlock and provide the solution for deadlock elimination
CO4	Explore about the storage structures and learn about the Linux Operating system
CO5	Analyze Storage Structures and Implement Customized Case study

COURSE CODE	21CSL46-PYTHON PROGRAMMING LABORATORY
CO1	Demonstrate proficiency in handling of loops and creation of functions
CO2	Identify the methods to create and manipulate lists, tuples and dictionaries
CO3	Discover the commonly used operations involving regular expressions and file system
CO4	Interpret the concepts of Object-Oriented Programming as used in Python
005	Determine the need for scraping websites and working with PDF, JSON and
CO5	other file formats
COURSE CODE	21CSL481-WEB PROGRAMMING
CO1	Describe the fundamentals of web and concept of HTML
CO2	Use the concepts of HTML, XHTML to construct the web pages
CO3	Interpret CSS for dynamic documents
CO4	Evaluate different concepts of JavaScript & Construct dynamic documents
CO5	Design a small project with JavaScript and XHTML
COURSE CODE	21CS482-UNIX SHELL PROGRAMMING
CO1	Know the basics of Unix concepts and commands
CO2	Evaluate the UNIX file system
CO3	Apply Changes in file system
CO4 CO5	Understand scripts and programs
COS COURSE CODE	Analyze Facility with UNIX system process  21CSL483-R PROGRAMMING
COURSE CODE	
CO1	To understand the fundamental syntax of R through readings, practice exercises, CO 2.
CO2	To demonstrations, and writing R code.
CO3	To apply critical programming language concepts such as data types, iteration
CO4	To understand control structures, functions, and Boolean operators by writing R programs and through examples
CO5	To import a variety of data formats into R using R-Studio
CO6	To prepare or tidy data for in preparation for analyze
COURSE CODE	21CS51-AUTOMATA THEORY AND COMPILER DESIGN
CO1	Acquire fundamental understanding of the core concepts in automata theory and Theory of Computation
CO2	Design and develop lexical analyzers, parsers and code generators
CO3	Design Grammars and Automata (recognizers) for different language classes and become knowledgeable about restricted models of Computation (Regular, Context Free) and the irrelative powers
CO4	Acquire fundamental understanding of the structure of a Compiler and Apply Concepts automata theory and Theory of Computation to design Compilers
CO5	Design computations models for problems in Automata theory and adaptation of
	such modelin the field of compilers
COURSE CODE	such modelin the field of compilers  21CS52-COMPUTER NETWORKS
CO1	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system
CO1 CO2	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.
CO1 CO2 CO3	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components
CO1 CO2 CO3 CO4	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components  Design communication networks for user requirements
CO1 CO2 CO3	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components  Design communication networks for user requirements  21CS53-DATABASE MANAGEMENT SYSTEMS
CO1 CO2 CO3 CO4	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components  Design communication networks for user requirements  21CS53-DATABASE MANAGEMENT SYSTEMS  Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS
CO1 CO2 CO3 CO4 COURSE CODE	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components  Design communication networks for user requirements  21CS53-DATABASE MANAGEMENT SYSTEMS  Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS  Use Structured Query Language (SQL) for database manipulation and also demonstrate the basic of query evaluation
CO1 CO2 CO3 CO4 COURSE CODE CO1 CO2	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components  Design communication networks for user requirements  21CS53-DATABASE MANAGEMENT SYSTEMS  Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS  Use Structured Query Language (SQL) for database manipulation and also
CO1 CO2 CO3 CO4 COURSE CODE CO1	such modelin the field of compilers  21CS52-COMPUTER NETWORKS  Learn the basic needs of communication system  Interpret the communication challenges and its solution.  Identify and organize the communication system network components  Design communication networks for user requirements  21CS53-DATABASE MANAGEMENT SYSTEMS  Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS  Use Structured Query Language (SQL) for database manipulation and also demonstrate the basic of query evaluation  Design and build simple database systems and relate the concept of transaction,

COURSE CODE	21CS54-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
CO1	Apply the knowledge of searching and reasoning techniques for different applications
CO2	Have a good understanding of machine leaning in relation to other fields and fundamentalissues and challenges of machine learning
CO3	Apply the knowledge of classification algorithms on various dataset and compare results
CO4	Model the neuron and Neural Network, and to analyze ANN learning and its applications
CO5	Identifying the suitable clustering algorithm for different pattern
COURSE CODE	21CSL55-DATABASE MANAGEMENT SYSTEM LABORATORY WITH MINI PROJECT
CO1	Create, Update and query on the database
CO2	Demonstrate the working of different concepts of DBMS
CO3	Implement, analyze and evaluate the project developed for an application.
COURSE CODE	21CSL581-ANGULAR JS AND NODE JS
CO1	Describe the features of Angular JS
CO2	Recognize the form validations and controls
CO3	Implement Directives and Controllers
CO4	Evaluate and create database for simple application
CO5	Plan and build webservers with node using Node .JS
COURSE CODE	21CS582-C# AND .NET FRAMEWORK
CO1	Able to explain how C# fits into the .NET platform
CO2	Describe the utilization of variables and constants of C#
CO3	Use the implementation of object-oriented aspects in applications
CO4	Analyze and Set up Environment of .NET Core
CO5	Evaluate and create a simple project application
COURSE CODE	21CS61-SOFTWARE ENGINEERING & PROJECT MANAGEMENT
CO1	Understand the activities involved in software engineering and analyze the role of variousprocess models
CO2	Explain the basics of object-oriented concepts and build a suitable class model using modellingtechniques
CO3	Describe various software testing methods and to understand the importance of agile methodology and DevOps
CO4	Illustrate the role of project planning and quality management in software developmentCO 5. Understand the importance of activity planning and different planning models
COURSE CODE	21CS62-FULLSTACK DEVELOPMENT
CO1	Understand the working of MVT based full stack web development with Django
CO2	Designing of Models and Forms for rapid development of web pages
CO3	Analyze the role of Template Inheritance and Generic views for developing full stack webapplications
CO4	Apply the Django framework libraries to render nonHTML contents like CSV and PDF
CO5	Perform jQuery based AJAX integration to Django Apps to build responsive full stack webapplications

COURSE CODE	21CS63-COMPUTER GRAPHICS AND FUNDAMENTALS OF IMAGEPROCESSING
CO1	Construct geometric objects using Computer Graphics principles and OpenGL APIs
CO2	Use OpenGL APIs and related mathematics for 2D and 3D geometric Operations on the objects
CO3	Design GUI with necessary techniques required to animate the created objects
CO4	Apply OpenCV for developing Image processing applications
CO5	Apply Image segmentation techniques along with programming, using OpenCV, for developingsimple applications
COURSE CODE	21CS641-AGILE TECHNOLOGIES
CO1	Understand the fundamentals of agile technologies
CO2	Explain XP Lifecycle, XP Concepts and Adopting XP
CO3	Apply different techniques on Practicing XP, Collaborating and Releasing
CO4	Analyze the Values and Principles of Mastering Agility
CO5	Demonstrate the agility to deliver good values
COURSE CODE	21CS642-ADVANCED JAVA PROGRAMMING
CO1	Understanding the fundamental concepts of Enumerations and Annotations
CO2	Apply the concepts of Generic classes in Java programs
CO3	Demonstrate the concepts of String operations in Java
CO4	Develop web based applications using Java servlets and JSP
CO5	Illustrate database interaction and transaction processing in Java
COURSE CODE	21CS643-ADVANCED COMPUTER ARCHITECTURE
CO1	Explain the concepts of parallel computing
CO2	Explain and identify the hardware technologies
CO2	Compare and contrast the parallel architectures
CO4	Illustrate parallel programming concepts
COURSE CODE	21CS644-DATA SCIENCE AND VISUALIZATION
CO1	Understand the data in different forms
CO2	Apply different techniques to Explore Data Analysis and the Data Science Process
CO3	Analyze feature selection algorithms & design a recommender system
CO4	Evaluate data visualization tools and libraries and plot graphs
CO5	Develop different charts and include mathematical expressions
COURSE CODE	21CS651-INTRODUCTION TO DATA STRUCTURES
CO1	Express the fundamentals of static and dynamic data structure
CO2	Summarize the various types of data structure with their operations
CO3	Interpret various searching and sorting techniques
CO4	Choose appropriate data structure in problem solving
CO5	Develop all data structures in a high level language for problem solving
	21CS652-INTRODUCTION TO DATABASE MANAGEMENT
COURSE CODE	SYSTEMS
CO1	Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS
CO2	Use Structured Query Language (SQL) for database manipulation
CO3	Design and build simple database systems
CO4	Develop application to interact with databases
COURSE CODE	21CS653- INTRODUCTION TO CYBER SECURITY
CO1	Describe the cyber crime terminologies
CO2	Analyze cybercrime in mobiles and wireless devices along with the tools for Cybercrime and prevention
CO3	Analyze the motive and causes for cybercrime, cybercriminals, and investigators
CO4	Apply the methods for understanding criminal case and evidence, detection standing criminalcase and evidence

COURSE CODE	21CS654-PROGRAMMING IN JAVA
CO1	Develop JAVA programs using OOP principles and proper program structuring
CO2	Develop JAVA program using packages, inheritance and interface
CO3	Develop JAVA programs to implement error handling techniques using exception handling
CO4	Demonstrate string handling concepts using JAVA
COURSE CODE	21CSL66-COMPUTER GRAPHICS AND IMAGE PROCESSING LABORATORY
CO1	Use openGL /OpenCV for the development of mini Projects
CO2	Analyze the necessity mathematics and design required to demonstrate basic geometric transformation techniques
CO3	Demonstrate the ability to design and develop input interactive techniques
CO4	Apply the concepts to Develop user friendly applications using Graphics and IP concepts
COURSE CODE	21CS71-BIG DATA ANALYTICS
CO1	Understand fundamentals and applications of Big Data analytics.
CO2	Investigate Hadoop framework, Hadoop Distributed File system and essential Hadoop tools
CO3	Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.
CO4	Demonstrate the MapReduce programming model to process the big data along with Hadoop tools
CO5	Apply Machine Learning algorithms for real world big data, web contents and Social Networks to provide analytics with relevant visualization tools.
COURSE CODE	21CS72-CLOUD COMPUTING
CO1	Understand and analyze various cloud computing platforms and service provider.
CO2	Illustrate various virtualization concepts.
CO3	Identify the architecture, infrastructure and delivery models of cloud computing.
CO4	Understand the Security aspects of CLOUD.
CO5	Define platforms for development of cloud applications
COURSE CODE	21CS731-OBJECT ORIENTED MODELING AND DESIGN
CO1	Describe the concepts of object-oriented and basic class modelling.
CO2	Draw class diagrams, sequence diagrams and interaction diagrams to solve problems.
CO3	Choose and apply a befitting design pattern for the given problem.
COURSE CODE	21CS732-DIGITAL IMAGE PROCESSING
CO1 CO2	Understand the fundamentals of Digital Image Processing
CO2	Apply different Image transformation techniques  Analyze various image restoration techniques
CO4	Understand colour image and morphological processing
CO5	Design image analysis and segmentation techniques
COURSE CODE	21CS733-CRYPTOGRAPHY AND NETWORK SECURITY
CO1	Understand Cryptography, Network Security theories, algorithms and systems
CO2	Apply different Cryptography and Network Security operations on different applications
CO3	Analyze different methods for authentication and access control
CO4	Evaluate Public and Private key, Key management, distribution and certification
CO5	Design necessary techniques to build protection mechanisms to secure computer networks
COURSE CODE	21CS734-BLOCKCHAIN TECHNOLOGY
CO1	Describe the concepts of Distrbuted computing and its role in Blockchain
CO2	Describe the concepts of Cryptography and its role in Blockchain
CO3	List the benefits, drawbacks and applications of Blockchain
CO4	Appreciate the technologies involved in Bitcoin
CO5	Appreciate and demonstrate the Ethereum platform to develop blockchain application

COURSE CODE	21CS735-INTERNET OF THINGS
CO1	Understand the evolution of IoT, IoT networking components, and addressing
	strategies in IoT
CO2 CO3	Analyze various sensing devices and actuator types
CO4	Demonstrate the processing in IoT.  Apply different connectivity technologies.
CO5	Understand the communication technologies, protocols and interoperability in
	IoT.
COURSE CODE	21CS741-SOFTWARE ARCHITECTURE AND DESIGN PATTERNS
CO1	Design and implement codes with higher performance and lower complexity
CO2	Be aware of code qualities needed to keep code flexible
CO3	Experience core design principles and be able to assess the quality of a design
	with respect to these principles.
CO4 CO5	Capable of applying these principles in the design of object oriented systems.  Demonstrate an understanding of a range of design patterns. Be capable of
COS	comprehending a design presented using this vocabulary.
CO6	Be able to select and apply suitable patterns in specific contexts
COURSE CODE	21CS742-MULTIAGENT SYSTEMS
CO1	Demonstrate the decision process with different constraints
CO2	Analyze games in different forms
CO3	Apply the cooperative learning in developing games
CO4	Analyze different negotiation strategies of Multi-Agent System
CO5	Design and develop solutions for voting problems
COURSE CODE	21CS743-DEEP LEARNING
CO1	Understand the fundamental issues and challenges of deep learning data, model selection, model complexity etc.,
CO2	Describe various knowledge on deep learning and algorithms
CO3	Apply CNN and RNN model for real time applications
	Identify various challenges involved in designing and implementing deep
CO4	learning algorithms
CO5	Relate the deep learning algorithms for the given types of learning tasks in
	varied domain
COURSE CODE	21CS744-ROBOTIC PROCESS AUTOMATION DESIGN AND DEVELOPMENT
CO1	To Understand the basic concepts of RPA
CO2	To Describe various components and platforms of RPA
	To Describe the different types of variables, control flow and data manipulation
CO3	techniques
CO4	To Understand various control techniques and OCR in RPA
CO5	To Describe various types and strategies to handle exceptions
COURSE CODE	21CS745-NOSQL DATABASE
CO1	Demonstrate an understanding of the detailed architecture of Column Oriented
CO2	NoSQL databases, Document databases, Graph databases.  Use the concepts pertaining to all the types of databases.
CO3	Analyze the structural Models of NoSQL.
CO4	Develop various applications using NoSQL databases.
COURSE CODE	21CS751-PROGRAMMING IN PYTHON
CO1	Understand Python syntax and semantics and be fluent in the use of Python flow
	control and functions.
CO2	Demonstrate proficiency in handling Strings and File Systems.
CO3	Represent compound data using Python lists, tuples, Strings, dictionaries
COURSE CODE	. Read and write data from/to files in Python Programs
COURSE CODE CO1	21CS752-INTRODUCTION TO AI AND ML Design intelligent agents for solving simple gaming problems.
	Have a good understanding of machine leaning in relation to other fields and
CO2	fundamental issues and Challenges of machine learning
CO3	Understand data and applying machine learning algorithms to predict the outputs
CO4	Model the neuron and Neural Network, and to analyze ANN learning and its
	, , , , , , , , , , , , , , , , , , , ,

	applications.
COURSE CODE	21CS753-INTRODUCTION TO BIG DATA
CO1	Master the concepts of HDFS and MapReduce framework.
CO2	Investigate Hadoop related tools for Big Data Analytics and perform basic
CO3	Infer the importance of core data mining techniques for data analytics
CO4	Use Machine Learning algorithms for real world big data.
COURSE CODE	21CS754- INTRODUCTION TO DATA SCIENCE
CO1	Describe the data science terminologies
CO2	Apply the Data Science process on real time scenario.
CO3	Analyze data visualization tools
CO4	Apply Data storage and processing with frameworks

## PG-M.Tech (SCS)2020-Scheme COs

DEPAR	TMENT OF COMPUTER SCIENCE AND ENGINEERING
COURSE CODE	20SCS11-MATHEMATICAL FOUNDATION OF COMPUTER SCIENCE
CO1	Understand the numerical methods to solve and find the roots of the equations
CO2	Apply the technique of singular value decomposition for data compression, least square approximation in solving inconsistent linear systems
CO3	Understand vector spaces and related topics arising in magnification and rotation of images
CO4	Utilize the statistical tools in multi variable distributions.
C05	Use probability formulations for new predictions with discrete and continuous RV's.
COURSE CODE	20SCS12- ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
CO1	Define Artificial intelligence and identify problems for AI. Characterize the search techniques to solve problems and recognize the scope of classical search techniques
CO2	Define knowledge and its role in AI. Demonstrate the use of Logic in solving AI problems
CO3	Demonstrate handling of uncertain knowledge and reasoning in probability theory
CO4	Understanding of Learning methods
COURSE CODE	20SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEM
CO1	Select the appropriate high-performance database like parallel and distributed database
CO2	Infer and represent the real-world data using object-oriented database
CO3	Interpret rule set in the database to implement data warehousing of mining
CO4	Discover and design database for recent applications database for better interoperability
COURSE CODE	20SCS14-ADVANCED ALGORITHMS
CO1	Design and apply iterative and recursive algorithms
CO2	Design and implement optimization algorithms in specific applications.
CO3	Design appropriate shared objects and concurrent objects for applications.
COURSE CODE	20SCS15-INTERNET OF THINGS AND APPLICATIONS
CO1	Develop schemes for the applications of IOT in real time scenarios
CO2	Manage the Internet resources
CO3	Model the Internet of things to business
CO4	Understand the practical knowledge through different case studies
CO5	Understand data sets received through IoT devices and tools used for analysis

COURSE CODE	20SCSL16-ALGORITHMS AND DATABASE MANAGEMENT SYSTEMS LABORATORY
CO1	Work on the concepts of Software Testing and ADBMS at the practical level
CO2	Compare and pick out the right type of software testing process for any given real-world problem
CO3	Carry out the software testing process in efficient way
CO4	Establish a quality environment as specified in standards for developing quality software
CO5	Model and represent the real-world data using object-oriented database
CO6	Embed the rules set in the database to implement various features of ADBMS
CO7	Choose, design and implement recent applications database for better interoperability
COURSE CODE	20RMI17-RESEARCH METHODOLOGY AND IPR
CO1	Discuss research methodology and the technique of defining a research problem
CO2	Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review
CO3	Explain various research designs, sampling designs, measurement and scaling techniques and also different methods of data collections
CO4	Explain several parametric tests of hypotheses, Chi-square test, art of interpretation and writing research reports
CO5	Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading International Instruments concerning IPR.
COURSE CODE	20SCS21-DATA SCIENCE
CO1	Define data science and its fundamentals
CO2	Demonstrate the process in data science
CO3	Explain machine learning algorithms necessary for data sciences
CO4	Illustrate the process of feature selection and analysis of data analysis algorithms
CO5	Visualize the data and follow of ethics
COURSE CODE	20SCS22-SEMANTIC WEB AND SOCIAL NETWORKS
CO1	Demonstrate the semantic web technologies like RDF Ontology and others
CO2	Learn the various semantic web applications
CO3	Identify the architectures and challenges in building social networks
CO4	Analyse the performance of social networks using electronic sources
COURSE CODE	20SCS23-BLOCKCHAIN TECHNOLOGY
CO1	Understand the types, benefits and limitation of blockchain
CO2	Explore the blockchain decentralization and cryptography concepts
CO3	Enumerate the Bitcoin features and its alternative options.
CO4	Describe and deploy the smart contracts
	Summarize the blockchain features outside of currencies.

COURSE CODE	20SCS241-ADVANCED CRYPTOGRAPHY
CO1	Understand OSI security architecture and classical encryption techniques
CO2	Acquire fundamental knowledge on the concepts of finite fields and number theory
CO3	Understand various block cipher and stream cipher models.
CO4	Describe the principles of public key cryptosystems, hash functions and digital signature
CO5	Compare various Cryptographic Techniques
CO6	Design Secure applications
CO7	Inject secure coding in the developed applications
COURSE CODE	20SCS242-NATURAL LANGUAGE PROCESSING
CO1	Analyse the natural language text
CO2	Generate the natural language.
CO3	Demonstrate Text mining.
CO4	Apply information retrieval techniques.
COURSE CODE	20SCS24-CLOUD COMPUTING
CO1	Compare the strengths and limitations of cloud computing
CO2	Identify the architecture, infrastructure and delivery models of cloud computing
CO3	Apply suitable virtualization concept.
CO4	Choose the appropriate cloud player
CO5	Address the core issues of cloud computing such as security, privacy and interoperability
CO6	Design Cloud Services
CO7	Set a private cloud
COURSE CODE	20SCS244-PATTERN RECOGNITION
CO1	Explain pattern recognition principals
CO2	Develop algorithms for Pattern Recognition
CO3	Develop and analyse decision tress
CO4	Design the nearest neighbour classifier
CO5	Apply Decision tree and clustering techniques to various applications
COURSE CODE	20SCS251-IMAGE PROCESSING AND MACHINE VISION
CO1	Explain the fundamentals of image processing and computer vision
CO2	Illustrate the image enhancement techniques
CO3	Illustrate Image restoration and image compression technique
CO4	Tell about image segmentation and morphological image processing
CO5	Summarize computer vision techniques and its uses

COURSE CODE	20SCS252-OBJECT ORIENTED DESIGN
CO1	Identify the heuristics of the object-oriented programming
CO2	Explain the fundamentals of OOP
CO3	Examine fine object-oriented relations
CO4	Explain the role of Physical Object-Oriented Design
CO5	Make use of Heuristics in The Use of Heuristics in Object-Oriented Design
COURSE CODE	20SCS253-SOFTWARE DEFINED NETWORKS
CO1	Explain the fundamentals of SDN and make use of open flow tool
CO2	Illustrate the concepts of controllers and network programmability
CO3	Explain data centre and NFV
CO4	Build an SDN framework
CO5	Report use case
COURSE CODE	20SCS254-MODERN COMPUTER ARCHITECTURE
CO1	Explain the fundamentals of Fundamentals of Computer Design, Pipelining, ILP
CO2	Summarize the concept of memory
CO3	Abstracting the concept of parallelism
CO4	Summarize the hardware technologies
CO5	Outlineparallel and scalable architectures
COURSE CODE	20SCSL26-DATA SCIENCE LABORATORY
CO1	Demonstration of data visualization methods
CO2	Understanding and implementation of data science algorithms
COURSE CODE	20SCS27-TECHNICAL SEMINAR
CO1	Choose, preferably through peer reviewed journals, a recent topic of his/her interest relevant to the Course of Specialization
CO2	Carryout literature survey, organize the Course topics in a systematic order.
CO3	Prepare the report with own sentences.
CO4	Type the matter to acquaint with the use of Micro-soft equation and drawing tools or any such facilities
CO5	Present the seminar topic orally and/or through power point slides.
CO6	Answer the queries and involve in debate/discussion.
CO7	Submit two copies of the typed report with a list of references

COLINGE CODE	AGGGGAL DEED LEADAUNG
COURSE CODE	20SCS31-DEEP LEARNING
CO1	Identify the deep learning algorithms which are more appropriate for various types of learning tasks in various domains.
CO2	Implement deep learning algorithms and solve real-world problems.
CO3	Execute performance metrics of Deep Learning Techniques.
	20SCS321-ENGINEERING ECONOMICS
CO1	Describe the principles of economics that govern the operation of any organization under diverse market conditions
CO2	Comprehend macroeconomic principles and decision making in diverse business set up
CO3	Explain the Inflation & Price Change as well as Present Worth Analysis
CO4	Apply the principles of economics through various case studies
COURSE CODE	20SCS322-VIRTUAL REALITY
CO1	Explain fundamentals of virtual reality systems
CO2	Summarize the hardware and software of the VR
CO3	Analyse the applications of VR
COURSE CODE	20SCS322-SOFT AND EVOLUTIONARY COMPUTING
CO1	Implement machine learning through neural networks
CO2	Design Genetic Algorithm to solve the optimization problem.
CO3	Develop a Fuzzy expert system.
CO4	Model Neuro Fuzzy system for clustering and classification
COURSE CODE	20SCS324-MULTICORE ARCHITECTURE AND PROGRAMMING
CO1	Identify the limitations of single core architecture and the need for multicore architectures
CO2	Define fundamental concepts of parallel programming and its design issues
CO3	Solve the issues related to multiprocessing and suggest solutions
CO4	Demonstrate the role of OpenMP and programming concept
CO5	Make out the salient features of different multicore architectures and how they exploit parallelism
COURSE CODE	20SCS331-BUSINESS INTELLIGENCE AND ITS APPLICATIONS
CO1	Explain the complete life cycle of BI/Analytical development
CO2	Illustrate technology and processes associated with Business Intelligence framework
CO3	Demonstrate a business scenario, identify the metrics, indicators and make recommendations to achieve the business goal.
COURSE CODE	20SCS332-ROBOTICS AND AUTOMATION
CO1	Classify various types of automation & manufacturing systems
CO2	Discuss different robot configurations, motions, drive systems and its performance parameters
CO3	Describe the basic concepts of control systems, feedback components, actuators and power transmission systems used in robots.

CO4 Explain the working of transducers, sensors and machine vision systems  Discuss the future capabilities of sensors, mobility systems and Artificial Intelligence in the field of robotics  COURSE CODE 20SCS333-SPEECH PROCESSING  CO1 Explain the fundamentals of speech processing  CO2 Summarize the models of speech processing  CO3 Infer the linear predictive coding  CO4 Illustrate the application of speech processing  COURSE CODE 20SCS334-WIRELESS SENSOR NETWORKS  CO1 Know the basics, characteristics and challenges of Wireless Sensor Network  CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  CO3 Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic modules
Intelligence in the field of robotics  COURSE CODE  20SCS333-SPEECH PROCESSING  CO1  Explain the fundamentals of speech processing  CO2  Summarize the models of speech processing  CO3  Infer the linear predictive coding  CO4  Illustrate the application of speech processing  COURSE CODE  20SCS334-WIRELESS SENSOR NETWORKS  CO1  Know the basics, characteristics and challenges of Wireless Sensor Network  CO2  Apply the knowledge to identify appropriate physical and MAC layer protocol  Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO1 Explain the fundamentals of speech processing  CO2 Summarize the models of speech processing  CO3 Infer the linear predictive coding  CO4 Illustrate the application of speech processing  COURSE CODE 20SCS334-WIRELESS SENSOR NETWORKS  CO1 Know the basics, characteristics and challenges of Wireless Sensor Network  CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  CO3 Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO2 Summarize the models of speech processing  CO3 Infer the linear predictive coding  CO4 Illustrate the application of speech processing  COURSE CODE 20SCS334-WIRELESS SENSOR NETWORKS  CO1 Know the basics, characteristics and challenges of Wireless Sensor Network  CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  CO3 Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO3 Infer the linear predictive coding  CO4 Illustrate the application of speech processing  COURSE CODE 20SCS334-WIRELESS SENSOR NETWORKS  CO1 Know the basics, characteristics and challenges of Wireless Sensor Network  CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO4 Illustrate the application of speech processing  COURSE CODE 20SCS334-WIRELESS SENSOR NETWORKS  CO1 Know the basics, characteristics and challenges of Wireless Sensor Network  CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
COURSE CODE  20SCS334-WIRELESS SENSOR NETWORKS  Know the basics, characteristics and challenges of Wireless Sensor Network  CO2  Apply the knowledge to identify appropriate physical and MAC layer protocol  Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO2 Know the basics, characteristics and challenges of Wireless Sensor Network  CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO2 Apply the knowledge to identify appropriate physical and MAC layer protocol  Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
Apply the knowledge to identify the suitable routing algorithm based on the network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
network and user requirement  Be familiar with the OS used in Wireless Sensor Networks and build basic
CO5 Understand the applications of WSN in various fields
COURSE CODE 20SCS34-PROJECT WORK PHASE – 1
CO1 Demonstrate a sound technical knowledge of their selected project topic
CO2 Undertake problem identification, formulation, and solution
CO3 Design engineering solutions to complex problems utilising a systems approach
CO4 Communicate with engineers and the community at large in written an oral for
CO5 Demonstrate the knowledge, skills and attitudes of a professional engineer
COURSE CODE 20SCS35-MINI PROJECT
CO1 Present the mini-project and be able to defend it
Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3 Habituated to critical thinking and use problem solving skills.
COMmunicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5 Work in a team to achieve common goal.
CO6 Learn on their own, reflect on their learning and take appropriate actions to improve it.
COURSE CODE 20SCSI36-INTERNSHIP/PROFESSIONAL PRACTICE
Gain practical experience within industry in which the internship is done
CO2 Acquire knowledge of the industry in which the internship is done.
CO3 Apply knowledge and skills learned to classroom wor
Develop a greater understanding about career options while more clearly define personal career goals
CO5 Experience the activities and functions of professionals.
CO6 Develop and refine oral and written communication skills

CO7	Identify areas for future knowledge and skill development.
CO8	Expand intellectual capacity, credibility, judgment, intuition
CO9	Acquire the knowledge of administration, marketing, finance and economics.
COURSE CODE	20SCS41-PROJECT WORK PHASE -2
CO1	Present the project and be able to defend it
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.

## UG-B.E (CS) 2018-Scheme COs

DE	PARTMENT OF COMPUTER SCIENCE & ENGINEERING
COURSE CODE	18CPS13/23-C PROGRAMMING FOR PROBLEM SOLVING
CO1	Illustrate simple algorithms from the different domains such as mathematics, physics etc
CO2	construct programming solution to the given problem using C
CO3	Identify and correct the syntax and logical errors in C programs
CO4	Modularise the given problems using functions and structures.
COURSE CODE	18CPS17/27-C PROGRAMMING LABORATORY
CO1	Write Algorithms, flowchats, programs for simple problems
CO2	Correct Syntax and logical errors to execute a program
CO3	write irerative and wherever possible recursive programs
CO4	Demonstrate use of functions, arrays, strings, structures and pointers in problem solving
COURSE CODE	18CS32-DATA STRUCTURES AND APPLICATIONS
CO1	Use different types of data structures, operations and algorithms
CO2	Apply searching and sorting operations on files
CO3	Use stack, Queue, Lists, Trees and Graphs in problem solving
CO4	Implement all data structures in a high-level language for problem solving.
COURSE CODE	18CS33-ANALOG AND DIGITAL ELECTRONICS
CO1	Design and analyze application of analog circuits using photo devices, timer IC, power supply and regulator IC and op-amp.
CO2	Explain the basic principles of A/D and D/A conversion circuits and develop the same.
CO3	Simplify digital circuits using Karnaugh Map, and Quine-McClusky Methods
CO4	Explain Gates and flip flops and make us in designing different data processing circuits, registers and counters and compare the types.
CO5	Develop simple HDL programs
COURSE CODE	18CS34-COMPUTER ORGANIZATION
CO1	Explain the basic organization of a computer system.
CO2	Demonstrate functioning of different sub systems, such as processor, Input/output,and memory. Illustrate hardwired control and micro programmed control, pipelining, embedded and other computing systems.  Design and analyse simple arithmetic and logical units.
COURSE CODE	18CS35-SOFTWARE ENGINEERING
CO1	Design a software system, component, or process to meet desired needs within realistic constraints.
CO2	Assess professional and ethical responsibility
CO3	Function on multi-disciplinary teams
CO4	Use the techniques, skills, and modern engineering tools necessary for engineering practice
CO5	Analyze, design, implement, verify, validate, implement, apply, and maintain software systems or parts of software systems

COURSE CODE	18CS36-DISCRETE MATHEMATICAL STRUCTURES
CO1	Use propositional and predicate logic in knowledge representation and truth verification.
CO2	Demonstrate the application of discrete structures in different fields of computer science.
CO3	Solve problems using recurrence relations and generating functions.
CO4	Application of different mathematical proofs techniques in proving theorems in the courses.
CO5	Compare graphs, trees and their applications.
COURSE CODE	18CSL37-ANALOG AND DIGITAL ELECTRONICS LABORATORY
CO1	Use appropriate design equations / methods to design the given circuit.
CO2	Examine and verify the design of both analog and digital circuits using simulators.
CO3	Make us of electronic components, ICs, instruments and tools for design and testing of circuits for the given the appropriate inputs.
CO4	Compile a laboratory journal which includes; aim, tool/instruments/software/components used, design equations used and designs, schematics, program listing, procedure followed, relevant theory, results as graphs and tables, interpreting and concluding the findings.
COURSE CODE	18CSL38-DATA STRUCTURES LABORATORY
CO1	Analyze and Compare various linear and non-linear data structures
CO2	Code, debug and demonstrate the working nature of different types of data structures and their applications
CO3	Implement, analyze and evaluate the searching and sorting algorithms
CO4	Choose the appropriate data structure for solving real world problems
COURSE CODE	18CS42-DESIGN AND ANALYSIS OF ALGORITHMS
CO1	Describe computational solution to well-known problems like searching, sorting etc.
CO2	Estimate the computational complexity of different algorithms.
CO3	Devise an algorithm using appropriate design strategies for problem solving.
COURSE CODE	18CS43-OPERATING SYSTEMS
CO1	Demonstrate need for OS and different types of OS
CO2	Apply suitable techniques for management of different resources
CO3	Use processor, memory, storage and file system commands
CO4 COURSE CODE	Realize the different concepts of OS in platform of usage through case studies
	18CS44-MICROCONTROLLER AND EMBEDDED SYSTEMS
CO1	Describe the architectural features and instructions of ARM microcontroller
	Apply the knowledge gained for Programming ARM for different applications.  Interface external devices and I/O with ARM microcontroller.
CO3	
CO4	Interpret the basic hardware components and their selection method based on the characteristics and attributes of an embedded system.
CO5	Develop the hardware /software co-design and firmware design approaches.
CO6	Demonstrate the need of real time operating system for embedded system applications
COURSE CODE	18CS45-OBJECT ORIENTED CONCEPTS
CO1	Explain the object-oriented concepts and JAVA.
CO2	Develop computer programs to solve real world problems in Java.
1	^ ^

CO3	Develop simple GUI interfaces for a computer program to interact with users, and to
	understand the event-based GUI handling principles using swings.
COURSE CODE	18CS46-DATA COMMUNICATION
CO1	Explain the various components of data communication.
CO2	Explain the fundamentals of digital communication and switching.
CO3	Compare and contrast data link layer protocols.
CO4	Summarize IEEE 802.xx standards
COURSE CODE	18CSL47-DESIGN AND ANALYSIS OF ALGORITHMS LABORATORY
CO1	Design algorithms using appropriate design techniques (brute-force, greedy, dynamic programming, etc.)
CO2	Implement a variety of algorithms such assorting, graph related, combinatorial, etc., in a high level language.
CO3	Analyze and compare the performance of algorithms using language features.
CO4	Apply and implement learned algorithm design techniques and data structuresto solve real-world problems
COURSE CODE	18CSL48-MICROCONTROLLER AND EMBEDDED SYSTEMS LABORATORY
CO1	Develop and test program using ARM7TDMI/LPC2148
CO2	Conduct the following experiments on an ARM7TDMI/LPC2148 evaluation board using evaluation version of Embedded 'C' & Keil Uvision-4 tool/compiler.
COURSE CODE	18CS51-MANAGEMENT AND ENTREPRENEURSHIP FOR IT INDUSTRY
CO1	Define management, organization, entrepreneur, planning, staffing, ERP and outline their importance in entrepreneurship
CO2	Utilize the resources available effectively through ERP
CO3	Make use of IPRs and institutional support in entrepreneurship
COURSE CODE	18CS52-COMPUTER NETWORKS AND SECURITY
CO1	Explain principles of application layer protocols
CO2	Recognize transport layer services and infer UDP and TCP protocols
CO3	Classify routers, IP and Routing Algorithms in network layer
CO4	Understand the Wireless and Mobile Networks covering IEEE 802.11 Standard
CO5	Describe Multimedia Networking and Network Management
	18CS53-DATABASE MANAGEMENT SYSTEM
CO1	Identify, analyze and define database objects, enforce integrity constraints on a database using RDBMS.
CO2	Use Structured Query Language (SQL) for database manipulation.
CO3	Design and build simple database systems
CO4	Develop application to interact with databases
COURSE CODE	18CS54-AUTOMATA THEORY AND COMPUTABILITY
CO1	Acquire fundamental understanding of the core concepts in automata theory and Theory of Computation
CO2	Learn how to translate between different models of Computation (e.g., Deterministic and Non-deterministic and Software models).
CO3	Design Grammars and Automata (recognizers) for different language classes and become knowledgeable about restricted models of Computation (Regular, Context Free) and their relative powers.
CO4	Develop skills in formal reasoning and reduction of a problem to a formal model, with an emphasis on semantic precision and conciseness.
CO5	Classify a problem with respect to different models of Computation.

COURSE CODE	18CS55-APPLICATION DEVELOPMENT USING PYTHON
CO1	Demonstrate proficiency in handling of loops and creation of functions.
CO2	Identify the methods to create and manipulate lists, tuples and dictionaries.
CO3	Discover the commonly used operations involving regular expressions and file system.
CO4	Interpret the concepts of Object-Oriented Programming as used in Python.
CO5	Determine the need for scraping websites and working with CSV, JSON and other file formats.
COURSE CODE	18CS56-UNIX PROGRAMMING
CO1	Explain Unix Architecture, File system and use of Basic Commands
CO2	Illustrate Shell Programming and to write Shell Scripts
CO3	Categorize, compare and make use of Unix System Calls
CO4	Build an application/service over a Unix system.
COURSE CODE	18CSL57-COMPUTER NETWORK LABORATORY
CO1	Analyze and Compare various networking protocols.
CO2	Demonstrate the working of different concepts of networking.
CO3	Implement, analyze and evaluate networking protocols in NS2 / NS3 and JAVA
CO3	programming language
COURSE CODE	18CSL58-DBMS LABORATORY WITH MINI PROJECT
CO1	Create, Update and query on the database.
CO2	Demonstrate the working of different concepts of DBMS
CO3	Implement, analyze and evaluate the project developed for an application.
COURSE CODE	18CIV59-ENVIRONMENTAL STUDIES
CO1	Understand the principles of ecology and environmental issues that apply to air, land, and water issues on a global scale,
CO2	Develop critical thinking and/or observation skills, and apply them to the analysis of a problem or question related to the environment.
CO3	Demonstrate ecology knowledge of a complex relationship between biotic and abiotic components.
CO4	Apply their ecological knowledge to illustrate and graph a problem and describe the realities that managers face when dealing with complex issues.
COURSE CODE	18CS61-SYSTEM SOFTWARE AND COMPILERS
CO1	Explain system software
CO2	Design and develop lexical analyzers, parsers and code generators
CO3	Utilize lex and yacc tools for implementing different concepts of system software
COURSE CODE	18CS62-COMUTER GRAPHICS AND VISUALIZATION
CO1	Design and implement algorithms for 2D graphics primitives and attributes.
CO2	Illustrate Geometric transformations on both 2D and 3D objects.
CO3	Apply concepts of clipping and visible surface detection in 2D and 3D viewing, and Illumination Models.
CO3	
	Illumination Models.
CO4	Illumination Models.  Decide suitable hardware and software for developing graphics packages using OpenGL.

Develop Chent-Side Scripts using JavaScript and Server-Side Scripts using PHP to generate and display the contents dynamically.  CO4 Appraise the principles of object oriented development using PHP Inspect JavaScript frameworks like JQuery and Backbone which facilitates developer to focus on core features.  CO5 Inspect JavaScript frameworks like JQuery and Backbone which facilitates developer to focus on core features.  CO6 Describe the concepts of object-oriented and basic class modelling.  CO7 Draw class diagrams, sequence diagrams and interaction diagrams to solve problems.  CO8 CO8 CO8 LISEGGS RENEWABLE ENERGY RESOURCES  CO1 Discuss causes of energy scarcity and its solution, energy resources and availability of renewable energy.  CO2 Dilitice energy from sun, energy reaching the Earth's surface and solar thermal energy applications.  CO3 Discuss types of solar collectors, their configurations, solar cell system, its characteristics and their applications.  CO4 Explain generation of energy from hydrogen, wind, geothermal system, solid waste and agriculture refuse.  CO5 Discuss production of energy from biomass, biogas.  CO6 Summarize tidal energy resources, sea wave energy and ocean thermal energy.  CO1 Implement and demonstrate Lexer's and Parser's  CO2 Evaluate different algorithms required for management, scheduling, allocation and communication used in operating system.  CO1 Apply the concepts of computer graphics  CO2 Implement computer graphics applications using OpenGL  CO1 Apply the concepts of computer graphics  CO2 Implement and demonstrate Lexer's and Parser's  CO3 Animate real world problems using OpenGL  CO4 Appaise the theory of Artificial intelligence and Machine Learning.  CO4 Infer long running tasks and background work in Android applications.  CO6 Infer long running tasks and background work in Android applications.  CO7 Demonstrate methods in storing, sharing and retrieving data in Android applications.  CO8 Infer long running tasks and background work in Android applications.  CO9 Demon		D 1 GU
generate and display the contents dynamically. CO3 Demonstrate the MapReduce programming model to process the big data along with	CO1	Implement and demonstrate Lexer"s and Parser"s
CO1 Apply the concepts of computer graphics CO2 Implement computer graphics applications using OpenGL CO3 Animate real world problems using OpenGL COURSE CODE 18CSMP68-MOBILE APPLICATION DEVELOPMENT CO1 Create, test and debug Android application by setting up Android development environment. Implement adaptive, responsive user interfaces that work across a wide range of devices.  CO3 Infer long running tasks and background work in Android applications. CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  COURSE CODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING CO1 Appaise the theory of Artificial intelligence and Machine Learning. CO2 Illustrate the working of AI and ML Algorithms. CO3 Demonstrate the applications of AI and ML. COURSE CODE 18CS72-BIG DATA AND ANALYTICS CO1 Understand fundamentals of Big Data analytics. CO2 Investigate Hadoop framework and Hadoop Distributed File system. CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data. Demonstrate the MapReduce programming model to process the big data along with	CO2	communication used in operating system.
CO2 Implement computer graphics applications using OpenGL CO3 Animate real world problems using OpenGL COURSE CODE I8CSMP68-MOBILE APPLICATION DEVELOPMENT  CO1 Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  CO3 Infer long running tasks and background work in Android applications.  CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  COURSE CODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	COURSE CODE	18CSL67-COMPUTER GRAPHICS LABORATORY WITH MINI PROJECT
COURSE CODE 18CSMP68-MOBILE APPLICATION DEVELOPMENT  CO1 Create, test and debug Android application by setting up Android development environment.  CO2 Implement adaptive, responsive user interfaces that work across a wide range of devices.  CO3 Infer long running tasks and background work in Android applications.  CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  CO4 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Demonstrate the MapReduce programming model to process the big data along with	CO1	Apply the concepts of computer graphics
COURSE CODE 18CSMP68-MOBILE APPLICATION DEVELOPMENT  CO1 Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  CO3 Infer long running tasks and background work in Android applications.  CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  CO4 INSECODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO2	Implement computer graphics applications using OpenGI
CO1 Create, test and debug Android application by setting up Android development environment.  CO2 Implement adaptive, responsive user interfaces that work across a wide range of devices.  CO3 Infer long running tasks and background work in Android applications.  CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  CO4 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with		implement computer graphics applications using OpenOL
cO2 Infer long running tasks and background work in Android applications.  CO3 Infer long running tasks and background work in Android applications.  CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  COURSE CODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with		Animate real world problems using OpenGL
CO3 Infer long running tasks and background work in Android applications.  CO4 Demonstrate methods in storing, sharing and retrieving data in Android applications.  COURSE CODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3	Animate real world problems using OpenGL
COURSE CODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development
COURSE CODE 18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.
CO1 Appaise the theory of Artificial intelligence and Machine Learning.  CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.
CO2 Illustrate the working of AI and ML Algorithms.  CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.
CO3 Demonstrate the applications of AI and ML.  COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3 CO4	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
COURSE CODE 18CS72-BIG DATA AND ANALYTICS  CO1 Understand fundamentals of Big Data analytics.  CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.
CO1 Understand fundamentals of Big Data analytics. CO2 Investigate Hadoop framework and Hadoop Distributed File system. CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data. Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE CO1	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.
CO2 Investigate Hadoop framework and Hadoop Distributed File system.  CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE CO1 CO2	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.  Illustrate the working of AI and ML Algorithms.  Demonstrate the applications of AI and ML.
CO3 Illustrate the concepts of NoSQL using MongoDB and Cassandra for Big Data.  Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE CO1 CO2 CO2 CO3	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.  Illustrate the working of AI and ML Algorithms.  Demonstrate the applications of AI and ML.
Demonstrate the MapReduce programming model to process the big data along with	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE CO1 CO2 CO3 CO3 COURSE CODE CO3	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.  Illustrate the working of AI and ML Algorithms.  Demonstrate the applications of AI and ML.  18CS72-BIG DATA AND ANALYTICS
	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE CO1 CO2 CO3 CO3 COURSE CODE CO3	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.  Illustrate the working of AI and ML Algorithms.  Demonstrate the applications of AI and ML.  18CS72-BIG DATA AND ANALYTICS  Understand fundamentals of Big Data analytics.
	CO3 COURSE CODE CO1 CO2 CO3 CO4 COURSE CODE CO1 CO2 CO3 COURSE CODE CO3 COURSE CODE CO1 CO2	Animate real world problems using OpenGL  18CSMP68-MOBILE APPLICATION DEVELOPMENT  Create, test and debug Android application by setting up Android development environment.  Implement adaptive, responsive user interfaces that work across a wide range of devices.  Infer long running tasks and background work in Android applications.  Demonstrate methods in storing, sharing and retrieving data in Android applications.  18CS71-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING  Appaise the theory of Artificial intelligence and Machine Learning.  Illustrate the working of AI and ML Algorithms.  Demonstrate the applications of AI and ML.  18CS72-BIG DATA AND ANALYTICS  Understand fundamentals of Big Data analytics.  Investigate Hadoop framework and Hadoop Distributed File system.

CO5	Use Machine Learning algorithms for real world big data.
	Analyze web contents and Social Networks to provide analytics with relevant
CO6	visualization tools.
COURSE CODE	18CS733-ADVANCED COMPUTER ARCHITECTURES
CO1	Explain the concepts of parallel computing and hardware technologies
CO2	Compare and contrast the parallel architectures
CO3	Illustrate parallel programming concepts
COURSE CODE	18CS742-NETWORK MANAGEMENT
	Analyze the issues and challenges pertaining to management of emerging network
CO1	technologies such as wired/wireless networks and high-speed internets.
CO2	Apply network management standards to manage practical networks
CO3	Formulate possible approaches for managing OSI network model.
CO4	Use on SNMP for managing the network
CO5	Use RMON for monitoring the behavior of the network
	Identify the various components of network and formulate the scheme for the managing
CO6	them
COURSE CODE	18EE753-DISASTER MANAGEMENT
CO1	Discuss disaster management plan, cyclones and their hazard potential
	Understand the role of IMD and cyclone prediction and cyclone warning system in India
CO2	
	Understand the role of different institutions defence and other services in natural disaster
CO3	management.
G0.4	Understand the role of Central Water Commission in river water sharing, Draught, its
CO4	assessment and draught management plan
	18CSL76-ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
COURSE CODE	LABORATORY
CO1	Implement and demonstrate AI and ML algorithms.
CO2	Evaluate different algorithms.
COURSE CODE	18CS81-INTERNET OF THINGS
CO1	Interpret the impact and challenges posed by IoT networks leading to new architectural
CO1	models.
CO2	Compare and contrast the deployment of smart objects and the technologies to connect
CO2	them to network.
CO3	Appraise the role of IoT protocols for efficient network communication.
CO4	Elaborate the need for Data Analytics and Security in IoT.
CO5	Illustrate different sensor technologies for sensing real world entities and identify the
CO3	applications of IoT in Industry
COURSE CODE	18CS823-NOSQL DATABASE
CO1	Define, compare and use the four types of NoSQL Databases (Document-oriented,
	KeyValue Pairs, Column-oriented and Graph).
CO2	Demonstrate an understanding of the detailed architecture, define objects, load data, query
	data and performance tune Column-oriented NoSQL databases.
CO3	Explain the detailed architecture, define objects, load data, query data and performance
CO3	tune Document-oriented NoSQL databases.

COURSE CODE INSCS11-MATHEMATICAL FOUNDATION OF COMPUTER SCIENCE  CO1 Understand the numerical methods to solve and find the roots of the equations.  CO2 Utilize the statistical tools in multi variable distributions.  CO3 Use probability formulations for new predictions with discrete and continuous RV's.  CO4 To understand various graphs in different geometries related to edges.  CO5 Understand vector spaces and related topics arising in magnification and rotation of images.  CO6 Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE INSCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE INSCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand data sets received through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO2 Utilize the statistical tools in multi variable distributions.  CO3 Use probability formulations for new predictions with discrete and continuous RV's.  CO4 To understand various graphs in different geometries related to edges.  CO5 Understand vector spaces and related topics arising in magnification and rotation of images.  CO6 ISSCS12-ADVANCES IN OPERATING SYSTEMS  CO1 Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE ISSCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE ISSCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand data sets received through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO2 Utilize the statistical tools in multi variable distributions.  CO3 Use probability formulations for new predictions with discrete and continuous RV's.  CO4 To understand various graphs in different geometries related to edges.  CO5 Understand vector spaces and related topics arising in magnification and rotation of images.  CO4 ISSCS12-ADVANCES IN OPERATING SYSTEMS  CO1 Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE 188CS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interper rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 188CS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand data sets received through different case studies  Understand data sets received through IoT devices and tools used for analysis	
CO4 To understand various graphs in different geometries related to edges.  CO5 Understand vector spaces and related topics arising in magnification and rotation of images.  COURSE CODE 18SC\$12-ADVANCES IN OPERATING SYSTEMS  CO1 Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE 18SC\$13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  Discover and design database for recent applications database for better interoperability  COURSE CODE 18SC\$14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
COURSE CODE 18SCS12-ADVANCES IN OPERATING SYSTEMS  CO1 Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE 18SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand data sets received through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
COURSE CODE 18SCS12-ADVANCES IN OPERATING SYSTEMS  Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE 18SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand data sets received through loT devices and tools used for analysis	
CO1 Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system  CO2 Learn the various resource management techniques for distributed systems  CO3 Identify the different features of real time and mobile operating system  CO4 Modify existing open source kernels in terms of functionality or features used  COURSE CODE 18SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO2 Learn the various resource management techniques for distributed systems CO3 Identify the different features of real time and mobile operating system CO4 Modify existing open source kernels in terms of functionality or features used COURSE CODE 18SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS CO1 Select the appropriate high performance database like parallel and distributed database CO2 Infer and represent the real world data using object oriented database CO3 Interpret rule set in the database to implement data warehousing of mining CO4 Discover and design database for recent applications database for better interoperability COURSE CODE 18SCS14-INTERNET OF THINGS CO1 Develop schemes for the applications of IOT in real time scenarios CO2 Manage the Internet resources CO3 Model the Internet of things to business CO4 Understand data sets received through IoT devices and tools used for analysis	
CO3 Identify the different features of real time and mobile operating system CO4 Modify existing open source kernels in terms of functionality or features used COURSE CODE 18SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
COURSE CODE INSCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
COURSE CODE 18SCS13-ADVANCES IN DATA BASE MANAGEMENT SYSTEMS  CO1 Select the appropriate high performance database like parallel and distributed database  CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO2 Infer and represent the real world data using object oriented database  CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO2 Infer and represent the real world data using object oriented database CO3 Interpret rule set in the database to implement data warehousing of mining CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS CO1 Develop schemes for the applications of IOT in real time scenarios CO2 Manage the Internet resources CO3 Model the Internet of things to business CO4 Understand the practical knowledge through different case studies CO5 Understand data sets received through IoT devices and tools used for analysis	
CO3 Interpret rule set in the database to implement data warehousing of mining  CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO4 Discover and design database for recent applications database for better interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
interoperability  COURSE CODE 18SCS14-INTERNET OF THINGS  CO1 Develop schemes for the applications of IOT in real time scenarios  CO2 Manage the Internet resources  CO3 Model the Internet of things to business  CO4 Understand the practical knowledge through different case studies  CO5 Understand data sets received through IoT devices and tools used for analysis	
CO1 Develop schemes for the applications of IOT in real time scenarios CO2 Manage the Internet resources CO3 Model the Internet of things to business CO4 Understand the practical knowledge through different case studies CO5 Understand data sets received through IoT devices and tools used for analysis	
CO2 Manage the Internet resources CO3 Model the Internet of things to business CO4 Understand the practical knowledge through different case studies CO5 Understand data sets received through IoT devices and tools used for analysis	
CO3 Model the Internet of things to business CO4 Understand the practical knowledge through different case studies CO5 Understand data sets received through IoT devices and tools used for analysis	
CO4 Understand the practical knowledge through different case studies CO5 Understand data sets received through IoT devices and tools used for analysis	
CO5 Understand data sets received through IoT devices and tools used for analysis	
COURSE CODE 18SCS151-ADVANCES IN COMPUTER NETWORKS	
CO1 List and classify network services, protocols and architectures, explain why they are layered.	
Choose key Internet applications and their protocols, and apply to develop their own cO2  applications (e.g. Client Server applications, Web Services) using the sockets API.	
Explain develop effective communication mechanisms using techniques like connection establishment, queuing theory, recovery Etc.	
CO4 Explain various congestion control techniques.	
COURSE CODE 18SCSL16-ADBMS AND IOT LABORATORY	
CO1 Work on the concepts of Software Testing and ADBMS at the practical level	
CO2  Compare and pick out the right type of software testing process for any given real world problem	
CO3 Carry out the software testing process in efficient way	
CO4 Establish a quality environment as specified in standards for developing quality software	
CO5 Model and represent the real world data using object oriented database	
CO6 Embed the rules set in the database to implement various features of ADBMS	

CO7	Choose, design and implement recent applications database for better interoperability
COURSE CODE	18SCS21-MANAGING BIG DATA
CO1	Describe big data and use cases from selected business domains
CO2	Explain NoSQL big data management
CO3	Install, configure, and run Hadoop and HDFS
CO4	Perform map-reduce analytics using Hadoop
CO5	Use Hadoop related tools such as HBase, Cassandra, Pig, and Hive for big data Analytics
COURSE CODE	18SCS22-ADVANCED ALGORITHMS
CO1	Design and apply iterative and recursive algorithms.
CO2	Design and implement optimization algorithms in specific applications.
CO3	Design appropriate shared objects and concurrent objects for applications
COURSE CODE	18SCS23-CLOUD COMPUTING
CO1	Compare the strengths and limitations of cloud computing
CO2	Identify the architecture, infrastructure and delivery models of cloud computing
CO3	Apply suitable virtualization concept.
CO4	Choose the appropriate cloud player
CO5	Address the core issues of cloud computing such as security, privacy and interoperability
CO6	Design Cloud Services
CO7	Set a private cloud
COURSE CODE	18SCS241-ADVANCES IN STORAGE AREA NETWORKS
CO1	Identify the need for performance evaluation and the metrics used for it
CO2	Apply the techniques used for data maintenance.
CO3	Realize strong virtualization concepts
CO4	Develop techniques for evaluating policies for LUN masking, file systems
COURSE CODE	18SCS253-OBJECT ORIENTED SOFTWARE ENGINEERING
CO1	Apply Object Oriented Software Engineering approach in every aspect of software project
CO2	Analyze the requirements from various domains
CO3	Adapt appropriate object oriented design aspects in the development process
CO4	Implement and test the software projects using object oriented approach
CO5	Learn the issues and concepts relating to maintenance of software projects
CO6	Adapt the concepts and tools related to software configuration management
COURSE CODE	18SCS31-MACHINE LEARNING TECHNIQUES
CO1	Choose the learning techniques with this basic knowledge.
CO2	Apply effectively neural networks and genetic algorithms for appropriate applications.
CO3	Apply bayesian techniques and derive effectively learning rules.
CO4	Choose and differentiate reinforcement and analytical learning techniques
COURSE CODE	18SCS323-WIRELESS NETWORKS AND MOBILE COMPUTING
CO1	Explain state of art techniques in wireless communication.
CO2	Discover CDMA, GSM. Mobile IP, WImax
CO3	Demonstrate program for CLDC, MIDP let model and security concerns

COURSE CODE	18SCS332-SOFTWARE PROJECT PLANNING AND MANAGEMENT
CO1	Evaluate a project to develop the scope of work, provide accurate cost estimates and
	to plan the various activities
CO2	Apply risk management analysis techniques that identify the factors that put a project
CO2	at risk and to quantify the likely effect of risk on project timescales
CO3	Identify the resources required for a project and to produce a work plan and resource
CO3	schedule
CO4	Monitor the progress of a project and to assess the risk of slippage, revising targets
CO4	counteract drift
CO5	Use appropriate metrics to management the software development outcome
	Develop research methods and techniques appropriate to defining, planning and carrying out a
CO6	research project within your chosen specialist area within the
	management of software projects.

# PROGRAMME OUTCOME, PROGRAMMESPECIFIC OUTCOMES AND COURSEOUTCOMES OF ALL DEPARTMENTS-2022-23(CRITERIA- 2)

2.6.1 Program outcomes, program specific outcomes and course outcomes

### **Department of Electronics & Communication Engineering**

#### Program Outcomes (PO's)

- **PO 1: Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO 2: Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO 3: Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO 4: Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO 5: Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO 6: The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO 7: Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO 8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO 9: Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO 10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

- **PO 11: Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO 12: Life-Long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### Program Specific Outcomes (PSO's)

- **PSO 1:** Analyse and Design Electronic Systems for Signal Processing and Communication Applications.
- **PSO 2:** Demonstrate the Conceptual Domain Knowledge With Respect to Architecture, Design, Analysis and Engineering deployment in Data Communication and Computer Networking. Embedded system. Microcontroller, Advanced communication system.
- **PSO 3:** Identify and Apply Domain Specific Tools For Design, Analysis, Synthesis and Validation Of VLSI, Optical Fiber Communication and Communication Systems.

	ELECTRONICS AND COMMUNICATION ENGINEERING 2022 Scheme
Course Code	22BBEE103/203- Basic Electronics
CO1	Develop the basic knowledge on construction, operation and characteristics of semiconductor devices
CO2	Apply the acquired knowledge to construct small scale circuits consisting of semiconductor devices
CO3	Develop competence knowledge to constructbasic digital circuitby make use of basic gate and its function
CO4	Construct the conceptual blocks for basic communication system
CO5	Apply the knowledge of various transducers principle in sensor system
Course Code	22BMATEC301 - AV Mathematics-III for EC Engineering
CO1	Demonstrate the Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing, and field theory
CO2	To use Fourier transforms to analyze problems involving continuous-time signals
CO3	To apply Z-Transform techniques to solve difference equations
CO4	Understand that physical systems can be described by differential equations and solve such equations
CO5	Make use of correlation and regression analysis to fit a suitable mathematical model for statistical data
Course	22BEC302 - Digital System Design using Verilog
Code CO1	
	Simplify Boolean functions using K-map and Quine-McCluskey minimization technique
CO2	Analyze and design for combinational logic circuits.
CO3	Analyze the concepts of Flip Flops(SR, D,T and JK) and to design the synchronous sequential circuits using Flip Flops
CO4	Model Combinational circuits (adders, subtractors, multiplexers) and sequential circuits using Verilog descriptions.
Course	22BEC303 - Electronic Principles and Circuits
Code CO1	Understand the characteristics of BJTs and FETs for switching and amplifier circuits
CO2	Design and analyze amplifiers and oscillators with different circuit configurations and biasing conditions
CO3	Understand the feedback topologies and approximations in the design of amplifiers and oscillators
CO4	Design of circuits using linear ICs for wide range applications such as ADC, DAC, filters and timers.
CO5	Understand the power electronic device components and its functions for basic power electronic circuits
Course Code	22BEC304 - Network Analysis
CO1	Determine currents and voltages using source transformation/ source shifting/ mesh/nodal analysis and reduce given network using star delta transformation
CO2	Solve problems by applying Network Theorems and electrical laws to reduce circuit complexities and to arrive at feasible solutions.
CO3	Analyse the circuit parameters during switching transients and apply Laplace transform to solve the given network

CO4	Evaluate the frequency response for resonant circuits and the network parameters
	for two port networks
Course Code	22BECL305 - Analog and Digital Systems Design Laboratory
CO1	Design and analyze the BJT/FET amplifier and oscillator circuits
CO2	Design and test Opamp circuits to realize the mathematical computations, DAC and
	precision
CO3	rectifiers  Design and test the combinational logic circuits for the given specifications
CO4	Test the sequential logic circuits for the given functionality
CO5	Demonstrate the basic circuit experiments using 555 timer
Course	22BEC306C - Computer Organization and Architecture
Code CO1	Emplain the hosis appointed on of a computer quetor.
CO2	Explain the basic organization of a computer system  Describe the addressing modes, instruction formats and program control.
CO2	Describe the addressing modes, instruction formats and program control statement
CO3	Explain different ways of accessing an input/ output device including interrupts
CO4	Illustrate the organization of different types of semiconductor and other secondary storage memories
CO5	Illustrate simple processor organization based on hard wired control and
	microprogrammed control.
Course	22BEC358C - C++ Basics
Code CO1	Write C++ program to solve simple and complex problems
CO2	Apply and implement major object-oriented concepts like message passing, function
	overloading, operator overloading and inheritance to solve real-world problems.
CO3	Use major C++ features such as Templates for data type independent designs and File I/O
	to deal
i	LAVALD LUTTO COT
CO4	with large data set Analyze, design and develop solutions to real-world problems applying OOP concepts of
	Analyze, design and develop solutions to real-world problems applying OOP concepts of C++
CO4  Course Code	Analyze, design and develop solutions to real-world problems applying OOP concepts of

	and compare the performance
CO3	Characterize the influence of channel noise on analog modulated signals.
CO4	Define the schemes for sampling, pulse amplitude modulation and pulse code modulation
CO5	systems  Decident of circuits used in different stages of communication transmitters and maximum
	Design of circuits used in different stages of communication transmitters and receivers
Course Code	22BECL404 - Communication Laboratory
CO1	Understand the basic concepts of RF transmitters and Receivers
CO2	Illustrate the AM and FM modulation generation and detection using suitable electronic circuits
CO3	Design and test the sampling, Multiplexing and pulse modulation techniques using electronic hardware
CO4	Design and Demonstrate the electronic circuits used for RF transmitters and receivers
Course	22BEC405A - 8051 MICROCONTROLLER
Code	
CO1	Explain the difference between Microprocessors & Microcontrollers, Architecture of 8051 Microcontroller, Interfacing of 8051 to external memory and Instruction set of 8051.
CO2	Write 8051 Assembly level programs using 8051 instruction set
CO3	Explain the Interrupt system, operation of Timers/Counters and Serial port of 8051.
CO4	Write 8051 Assembly language program to generate timings and waveformsusing 8051 timers, to send & receive serial data using 8051 serial port and to generate an external interrupt using a switch
CO5	Write 8051 C programs to generate square wave on 8051 I/O port pin using interrupt and to send & receive serial data using 8051 serial port. Interface simpleswitches, simple LEDs, ADC 0804, LCD and Stepper Motorto 8051 using 8051 I/O ports
Course Code	22BEC456A - Embedded C Basics
CO1	Write C programs in 8051 for solving simple problems that manipulate input data using different instructions.
CO2	Develop testing and experimental procedures on 8051Microcontroller, analyze their operation under different cases.
CO3	Develop programs for 8051Microcontroller to implement real world problems
CO4	Develop microcontroller applications using external hardware interface
-	<del></del>

ELECT	TRONICS AND COMMUNICATION ENGINEERING
	2021-Scheme
Course Code	21ELN14/24 - BASIC ELECTRONICS & COMMUNICATION ENGINEERING
CO1	Describe the concepts of electronic circuits encompassing power supplies, amplifiers and oscillators
CO2	Present the basics of digital logic engineering including data representation, circuits and the microcontroller system with associated sensors and actuators.
CO3	Discuss the characteristics and technological advances of embedded systems.
CO4	Relate to the fundamentals of communication engineering spanning from the frequency spectrum to the various circuits involved including antennas.
CO5	Explain the different modes of communications from wired to wireless and the computing involved
Course	21MAT 31 - TRANSFORM CALCULUS, FOURIER SERIES AND
Code	NUMERICALTECHNIQUES
CO1	To solve ordinary differential equations using Laplace transform
CO2	Demonstrate the Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory
CO3	To use Fourier transforms to analyze problems involving continuous-time signals and to apply ZTransform techniques to solve difference equations
CO4	To solve mathematical models represented by initial or boundary value problems involving partial
CO5	differential equations  Determine the extremals of functionals using calculus of variations and solve problems arising in
	dynamics of rigid bodies and vibrational analysis.
Course Code	21EC32 - Digital System Design Using Verilog
CO1	Simplify Boolean functions using K-map and Quine-McCluskey minimization technique
CO2	Analyze and design for combinational logic circuits
CO3	Analyze the concepts of Flip Flops (SR, D, T and JK) and to design the synchronous sequential circuits using Flip Flops.
CO4	Model Combinational circuits (adders, subtractors, multiplexers) and sequential circuits using
Course	Verilog descriptions.
Course Code	21EC33 - Basic Signal Processing
CO1	Understand the basics of Linear Algebra
CO2	Analyse different types of signals and systems
CO3	Analyse the properties of discrete time signals & systems
CO4	Analyse discrete time signals & systems using Z transforms
Course	21EC34 - Analog Electronic Circuits
Code	The form of the state of the st
CO1 CO2	Understand the characteristics of BJTs and FETs for switching and amplifier circuits.  Design and analyze FET amplifiers and oscillators with different circuit configurations
CO2	and biasing conditions.
CO3	Understand the feedback topologies and approximations in the design of amplifiers and oscillators
CO4	Design of circuits using linear ICs for wide range applications such as ADC, DAC, filters and timers
CO5	Understand the power electronic device components and its functions for basic power electronic circuits.
Course	21ECL35 - Analog and Digital Electronics Lab
Code	212 CE33 - Analog and Digital Electronics Lab
CO1	Design and analyze the BJT/FET amplifier and oscillator circuits

000	
CO2	Design and test Opamp circuits to realize the mathematical computations, DAC and
	precision
	rectifiers.
CO3	Design and test the combinational logic circuits for the given specifications
CO4	Test the sequential logic circuits for the given functionality
CO5	Demonstrate the basic electronic circuit experiments using SCR and 555 timer.
Course	21EC382 - AEC (Analog Electronic Circuits) Lab
Code	21EC302 - AEC (Alialog Electronic Circuits) Lab
CO1	Understand the circuit schematic and its working
CO2	Study the characteristics of different electronic devices
CO3	Design and test simple electronic circuits as per the specifications using discrete
	electronic
CO4	components.
CO4	Compute the parameters from the characteristics of active devices.
CO5	Familiarize with EDA software which can be used for electronic circuit simulation.
Course	21EC41 - Maths for Communication Engineers
Code	
CO1	Recall the basic laws and definitions (with mathematical representations) in Electric and
	Magnetic
	fields.
CO2	Apply the basic laws of Electric and Magnetic fields to arrive at Divergence Theorem,
	Current
	continuity Equation, Curl, Stokes' theorem
CO3	Apply Electric and Magnetic field concepts to arrive at Maxwell's equations,
	Electromagnetic
	wave equations and Poynting's theorem (Important concepts related to Communication
004	
CO4	Recall the definitions related to Random variables and Random Processes
CO5	Model the Random events in the Communication set-up and determine useful statistical
	parameters.
Course	21EC42 - Digital Signal Processing
Code	D. C.
CO1	Determine response of LTI systems using time domain and DFT techniques
CO2	Compute DFT of real and complex discrete time signals
CO3	Compute DFT using FFT algorithms
CO4	Design FIR and IIR Digital Filters
CO5	Design of Digital Filters using DSP processor
Course	21EC43- Circuits & Controls
Course Code	21EC43- Circuits & Controls
Course	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by
Course Code	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying
Course Code CO1	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.
Course Code	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve
Course Code CO1	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks
Course Code CO1	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation
Course Code CO1	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation representation or
Course Code CO1	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation representation or Block Diagram representation and SFG representation
Course Code CO1	Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation representation or Block Diagram representation and SFG representation  Calculate time response specifications and analyse the stability of the system
Course Code CO1 CO2 CO3	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation representation or Block Diagram representation and SFG representation  Calculate time response specifications and analyse the stability of the system Draw and analyse the effect of gain on system behaviour using root loci.
Course Code CO1  CO2  CO3  CO4 CO5 CO6	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation representation or Block Diagram representation and SFG representation  Calculate time response specifications and analyse the stability of the system  Draw and analyse the effect of gain on system behaviour using root loci.  Perform frequency response Analysis and find the stability of the system
Course Code CO1 CO2 CO3 CO4 CO5 CO6 CO7	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems.  Evaluate two port parameters of a network and Apply Laplace transforms to solve electricnetworks  Deduce transfer function of a given physical system, from differential equation representation or Block Diagram representation and SFG representation  Calculate time response specifications and analyse the stability of the system  Draw and analyse the effect of gain on system behaviour using root loci.  Perform frequency response Analysis and find the stability of the system  Represent State model of the system and find the time response of the system.
Course Code CO1  CO2  CO3  CO4 CO5 CO6 CO7 Course	21EC43- Circuits & Controls  Analyse and solve Electric circuit, by applying, loop analysis, Nodal analysis and by applying network Theorems. COF	TH
CO5	Illustration of digital formatting representations used for Multiplexers, Vocoders and Videotransmission.
Course Code	21ECL46 - Communication Laboratory I
CO1	Demonstrate the AM and FM modulation and demodulation by representing the signals in time
CO2	and frequency domain.  Design and test the sampling, Multiplexing and PAM with relevant circuits
CO3	Demonstrate the basic circuitry and operations used in AM and FM receivers
CO4	Illustrate the operation of PCM and delta modulations for different input conditions
Course	21EC482- C++ Basics
Code CO1	Write C++ program to solve simple and complex problems
CO2	Apply and implement major object-oriented concepts like message passing, function
	overloading, operator overloading and inheritance to solve real-world problems
CO3	Use major C++ features such as Templates for data type independent designs and File I/O to deal with large data set
CO4	Analyze, design and develop solutions to real-world problems applying OOP concepts of C++
Course Code	21EC51 - Digital Communication
CO1	Analyze different digital modulation techniques and choose the appropriate modulation technique for the given specifications
CO2	Test and validate symbol processing and performance parameters at the receiver under ideal and corrupted bandlimited channels
CO3	Differentiate various spread spectrum schemes and compute the performance parameters of
CO4	communication system.  Apply the fundamentals of information theory and perform source coding for given message
CO5	Apply different encoding and decoding techniques with error Detection and Correction
Course Code	21EC52 - Computer Organization & ARM Microcontrollers
CO1	Explain the basic organization of a computer system
CO2	Demonstrate functioning of different sub systems, such as processor, Input/output, and memory
CO3	Describe the architectural features and instructions of 32-bit microcontroller ARM Cortex M3
CO4	Apply the knowledge gained for Programming ARM Cortex M3 for different applications.
Course	21EC53 - Computer Communication Networks
Code CO1	Understand the concepts of networking thoroughly
CO2	Identify the protocols and services of different layers
CO3	Distinguish the basic network configurations and standards associated with each network.
CO4	Discuss and analyse the various applications that can be implemented on networks
Code	21EC54 - ELECTROMAGNETIC WAVES
Code CO1	Evaluate problems on electrostatic force, electric field due to point, linear, volume
	charges by applying conventional methods and charge in a volume
CO2	Apply Gauss law to evaluate Electric fields due to different charge distributions and Volume Charge distribution by using Divergence Theorem
CO3	Determine potential and energy with respect to point charge and capacitance using
	Laplace equation and Apply Biot-Savart's and Ampere's laws for evaluating Magnetic field for different
CO4	current configurations  Calculate magnetic force, potential energy and Magnetization with respect to magnetic
CO4	materials

	and voltage induced in electric circuits.
	and voltage induced in electric circuits.
CO5	Apply Maxwell's equations for time varying fields, EM waves in free space and
	conductors and
Course	Evaluate power associated with EM waves using Poynting theorem
Code	21ECL55 - Communication Lab II
CO1	Design and test the digital modulation circuits and display the waveforms
CO2	To Implement the source coding algorithm using C/C++/ MATLAB code
CO3	To Implement the Error Control coding algorithms using C/C++/ MATLAB code.
CO4	Illustrate the operations of networking concepts and protocols using C programming and network simulators.
Course Code	21EC581 - IoT (Internet of Things) Lab
CO1	Understand internet of Things and its hardware and software components
CO2	Interface I/O devices, sensors & communication modules
CO3	Remotely monitor data and control devices
CO4	Develop real life IoT based projects
Course	21EC62 - Microwave Theory and Antennas
Code	
CO1	Describe the use and advantages of microwave transmission
CO2	Analyze various parameters related to transmission lines.
CO3	Identify microwave devices for several applications
CO4	Analyze various antenna parameters and their significance in building the RF system
CO5	Identify various antenna configurations for suitable applications
Course Code	21EC63- VLSI Design and Testing
CO1	Demonstrate understanding of MOS transistor theory, CMOS fabrication flow and
001	technology
	scaling
CO2	Draw the basic gates using the stick and layout diagram with the knowledge of physical
	design
CO3	aspects Interpret memory elements along with timing considerations
CO3	Interpret testing and testability issues in combinational logic design
CO5	Interpret testing and testability issues in combinational logic design
Course	morprovidently income in community 1880 acres in
Code	21EC643 - Python Programming
CO1	To acquire programming skills in Python
CO2	To demonstrate data structure representation using Python
CO3	To develop the skill of pattern matching and files in Python
CO4	To acquire Object Oriented Skills in Python
CO5	To develop the ability to write database applications in Python
Course Code	21EC653 - Basic VLSI Design
CO1	Demonstrate understanding of MOS transistor theory, CMOS fabrication flow and
	technology
	scaling
CO2	Draw the basic gates using the stick and layout diagrams with the knowledge of physical
	design
CO3	aspects Interpret Memory elements along with timing considerations
CO3	Demonstrate knowledge of FPGA based system design
CO5	Interpret testing and testability issues in VLSI Design
CO6	Analyze CMOS subsystems and architectural issues with the design constraints
Course	
Code	21ECL66 - VLSI Laboratory
CO1	Design and simulate combinational and sequential digital circuits using Verilog HDL.
CO2	Understand the synthesis process of digital circuits using EDA tool
CO3	Perform ASIC design flow and understand the process of synthesis, synthesis constraints
	and evaluating the synthesis reports to obtain optimum gate level netlist.
	evaluating the synthesis reports to obtain optimum gate level nethst.

CO4	Design and simulate basic CMOS circuits like inverter, common source amplifier, differential
CO5	amplifier, SRAM  Perform RTL_GDSII flow and understand the stages in ASIC design
Course	21EC71 - Advanced VLSI
Code	ZIDC/I - Muvanecu vidoi
CO1	Understand VLSI design flow
CO2	Describe the concepts of ASIC design methodology
CO3	Create floor plan including partition and routing with the use of CAD algorithms
CO4	Will have better insights into VLSI back-end design flow
CO5	Learn verification basics and System Verilog
Course	21EC72 - Optical & Wireless Communication
Code	
CO1	Classification and characterization of optical fibers with different modes of signal propagation
CO2	Describe the constructional features and the characteristics of optical fiber and optical
602	devices
	used for signal transmission and reception
CO3	Understand the essential concepts and principles of mobile radio channel and cellular
	communication.
CO4	Describe various multiple access techniques used in wireless communication systems
CO5	Describe the GSM architecture and procedures to establish call set up, call progress
	handling
	and call tear down in a GSM cellular network.
Cource	THE TELL Indiated Image Image agains
Course Code	21EC722 – Digital Image Processing
Code	
	Understand image formation and the role of human visual system plays in perception of
Code CO1	Understand image formation and the role of human visual system plays in perception of gray and color image data
Code CO1	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images
Code CO1 CO2 CO3	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques
Code CO1 CO2 CO3 CO4	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain
Code CO1 CO2 CO3 CO4 CO5	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain  Design image restoration techniques
Code	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain
Code CO1  CO2 CO3 CO4 CO5 Course Code	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain  Design image restoration techniques  21EC732 – Network Security
Code	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain  Design image restoration techniques  21EC732 – Network Security  Explain network security services and mechanisms and explain security concepts
Code	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain  Design image restoration techniques  21EC732 – Network Security  Explain network security services and mechanisms and explain security concepts  Understand the concept of Transport Level Security and Secure Socket Layer
Code CO1  CO2 CO3 CO4 CO5 Course Code CO1 CO2 CO3	Understand image formation and the role of human visual system plays in perception of gray and color image data  Compute various transforms on digital images  Conduct independent study and analysis of Image Enhancement techniques  Apply image processing techniques in frequency (Fourier) domain  Design image restoration techniques  21EC732 – Network Security  Explain network security services and mechanisms and explain security concepts  Understand the concept of Transport Level Security and Secure Socket Layer  Explain Security concerns in Internet Protocol security

	ELECTRONICS AND COMMUNICATION ENGINEERING
	2018 Scheme
Course Code	18ELN14/24 - BASIC ELECTRONICS
CO1	Describe the operation of diodes, BJT, FET and operational amplifiers
CO2	Design and explain the construction of rectifiers, regulators, amplifiers and oscillators.
CO3	Describe general operating principles of SCRs and its application.
CO4	Explain the working and design of fixed voltage regulator using 7805 and Astable oscillator using timer IC 555.
CO5	Explain the different number system and their conversions and construct simple combinational and sequential logic circuits using Flip-Flops
CO6	Describe the basic principle of operation of communication system and mobile phones.
Course	18EC32 - NETWORK THEORY
Code CO1	Determine currents and voltages using source transformation/ source shifting/ mesh/ nodal analysis and reduce given network using star-delta transformation/ source transformation/ source shifting.
CO2	Solve network problems by applying Superposition/ Reciprocity/ Thevenin's/ Norton's/ Maximum Power Transfer/ Millman's Network Theorems and electrical laws to reduce circuit complexities and to arrive at feasible solutions.
CO3	Calculate current and voltages for the given circuit under transient conditions and apply Laplace transform to solve the given network.
CO4	Solve the given network using specified two port network parameter like Z or Y or T or h.
CO5	Understand the concept of resonance and determine the parameters that characterize series/parallel resonant circuits.
Course Code	18EC33 - ELECTRONIC DEVICES
CO1	Understand the principles of semiconductor Physics
CO2	Understand the principles and characteristics of different types of semiconductor devices
CO3	Understand the fabrication process of semiconductor devices
CO4	Utilize the mathematical models of semiconductor junctions and MOS transistors for circuits and systems
CO5	Identify the mathematical models of MOS transistors for circuits and systems.
Course	18EC34 - DIGITAL SYSTEM DESIGN
Code	Emploin the concept of combinational and a smooth late.
CO1	Explain the concept of combinational and sequential logic circuits
CO2	Analyze and design the combinational logic circuits.
CO3	Describe and characterize flip-flops and its applications.
CO4	Design the sequential circuits using SR, JK, D, T flip-flops and Mealy & Moore machines
CO5 Course	Design applications of combinational & Sequential circuits  18EC35 - COMPUTER ORGANIZATION AND ARCHITECTURE
Code	10EC33 - COIVIF UTER ORGANIZATION AND ARCHITECTURE
CO1	Explain the basic organization of a computer system
CO2	Describe the addressing modes, instruction formats and program control statement.
CO3	Explain different ways of accessing an input / output device including interrupts

001	711
CO4	Illustrate the organization of different types of semiconductor and other secondary storage memories
CO5	Illustrate simple processor organization based on hardwired control and micro programmed control
Course	1 0
Course Code	18EC36 - POWER ELECTRONICS AND INSTRUMENTATION
CO1	Build and test circuits using power electronic devices
CO2	Analyze and design controlled rectifier, DC to DC converters, DC to AC inverters and SMPS
CO3	Analyze instrument characteristics and errors.
CO4	Describe the principle of operation and develop circuits for multirange ammeters, voltmeters and bridges to measure passive component values and frequency.
CO5	Explain the principle, design and analyze the transducers for measuring physical parameters,
Course Code	18ECL37 - ELECTRONIC DEVICES AND INSTRUMENTATION LABORATORY
CO1	Recognize and demonstrate functioning of semiconductor power devices.
CO2	Evaluate the characteristics, switching, power conversion and control by semiconductor power devices.
CO3	Analyze the response and plot the chracteristics of transducers such as LDR, Photo Diode, etc.
CO4	Design and test simple electronic circuits for measurement of temperature and resistance.
CO5	Use of circuit simulation software are for the implementation and characterization of electronic circuits and devices
Course	18ECL38 - DIGITAL SYSTEM DESIGN LABORATORY
Course	10ECL30 - DIGITAL STSTEW DESIGN LABUKATUKY
Code	
Code CO1	Design, realize and verify De Morgan's Theorem, SOP, POS forms.
Code	
Code CO1	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using
Code CO1 CO2	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators,
Code CO1 CO2 CO3	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers
Code CO1 CO2 CO3	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.
Code CO1 CO2 CO3 CO4 CO5 Course	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier
Code CO1 CO2 CO3 CO4 CO5 Course Code	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier  18EC42 - ANALOG CIRCUITS
Code	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier  18EC42 - ANALOG CIRCUITS  Understand the characteristics of BJTs and FETs
Code	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier  18EC42 - ANALOG CIRCUITS  Understand the characteristics of BJTs and FETs  Design and analyze BJT and FET amplifier circuits  Design sinusoidal and non sinusoidal oscillators  Understand the functioning of linear Ics
Code	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier  18EC42 - ANALOG CIRCUITS  Understand the characteristics of BJTs and FETs  Design and analyze BJT and FET amplifier circuits  Design sinusoidal and non sinusoidal oscillators  Understand the functioning of linear Ics  Design of linear IC based circuits
Code	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier  18EC42 - ANALOG CIRCUITS  Understand the characteristics of BJTs and FETs  Design and analyze BJT and FET amplifier circuits  Design sinusoidal and non sinusoidal oscillators  Understand the functioning of linear Ics
Code	Design, realize and verify De Morgan's Theorem, SOP, POS forms.  Demonstrate the truth table of various expressions and combinational circuits using logic gates.  Design various combinational circuits such as adders, subtractors, comparators, multiplexers and de-multiplexers  Construct flips-flops, counters and shift registers.  Simulate serial adder and binary multiplier  18EC42 - ANALOG CIRCUITS  Understand the characteristics of BJTs and FETs  Design and analyze BJT and FET amplifier circuits  Design sinusoidal and non sinusoidal oscillators  Understand the functioning of linear Ics  Design of linear IC based circuits

Course Code	18EC44 - ENGINEERING STATISTICS and LINEAR ALGEBRA
CO1	Analyze the evaluate single and multiple random variables.
CO2	Identify and associate random variables and random processes in communication events
CO3	Analyze and model the random events in typical communication events to extract quantitative statistical parameters
CO4	Analyze and model typical signal sets in terms of a basis function set of amplitude, phase and frequency
CO5	Demonstrate by way of simulation or emulation the ease of analysis employing basis functions, statistical representation and eigen values
Course	18EC45 - SIGNALS AND SYSTEMS
Code	
CO1	Analyze the different types of signals and systems
CO2	Determine the linearity, causality, time-invariance and stability properties of continuous and discrete time systems.
CO3	Evaluate the convolution sum and integral.
CO4	Represent continuous and discrete signals & systems in frequency domain using fourier representation.
CO5	Analyze discrete time signals and systems using Z-transforms.
Course	18EC46- MICROCONTROLLER
Code CO1	Explain the difference between Microprocessor & Microcontrollers, architectures of
COI	8051 microcontroller, interfacing of 8051 to external memory and instruction set of 8051
CO2	Write 8051 assembly level programs using 8051 instruction set
CO3	Explain the interrupt system, operation of timers/counters and serial port of 8051
CO4	Write 8051 assembly languate programs to generate square wave on 8051 i/o port pin using interrupt and c programme to send and receive serial data using 8051 serial port
CO5	Interface simple switches, simple LEDs, ADC 0804, LCD and stepper motor to 8051 using 8051 i/o ports
Course	18ECL47 - MICROCONTROLLER LABORATORY
Code	
CO1	Enhance programming skills using Assembly language and C.
CO2	Write assembly language programs in 8051 for solving simple problems that manipulate input data using different instructions of 8051
CO3	Interface different input and output devices to 8051 and control them using assembly language programs
CO4	Interface the serial devices to 8051 and to the serial transfer using C Programming
CO5	Develop applications based on Microcontroller 8051.
Course Code	18ECL48 - ANALOG CIRCUITS LABORATORY
Code CO1	Analyza fraguency response of IEET/MOSECT amplificati
CO2	Analyze frequency response of JFET/MOSFET amplifier.
	Design BJT/FETs amplifier with and without feedback and evaluate their performance characteristics
CO3	Apply the knowledge gained in the design of BJT/FET circuits in oscillators.
CO4	Design analog circuits using OPAMPs for different applications
CO5	Simulate and analyze analog circuits that uses IC s for different electronic applications

Course	18ES51 - TECHNOLOGICAL INNOVATION MANAGEMENT AND
Code	ENTREPRENEURSHIP
CO1	Understand the fundamental concepts of Management and Entrepreneurship and
	opportunities in order to setup a business
CO2	Identify the various organizations architecture
CO3	Describe the functions of Managers, Entrepreneurs and their social responsibilities
CO4	Understand the components in developing a business plan
CO5	Recognize the various sources of funding and institutions supporting entrepreneurs
Course	
Code	18EC52 - DIGITAL SIGNAL PROCESSING
CO1	Determine response of LTI systems using time domain and DFT techniques.
CO2	Compute DFT of real and complex discrete time signals.
CO3	Computation DFT using FFT algorithms and linear filtering approach.
CO4	Design and realize FIR and IIR digital filters
CO5	Understand the DSP processor architecture
Course Code	18EC53 - PRINCIPLES OF COMMUNICATION SYSTEMS
CO1	Analyze and compute performance of AM and FM modulation in the presence of noise
	at the receiver
CO2	Analyze and compute performance of digital formatting processes with quantization
	noise.
CO3	Multiplex digitally formatted signals at transmitter
CO4	De-multiplex the signals and reconstruct digitally formatted signals at the receiver
CO5	Design / Demonstrate the use of digital formatting in Multiplexers, vocoders and video
	transmission
Course	
Code	18EC54 - INFORMATION THEORY AND CODING
	Explain concept of Dependent & Independent Source, measure of information, Entropy,
Code CO1	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source
Code	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman
Code CO1 CO2	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms
Code CO1	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and
Code CO1 CO2 CO3	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities
Code CO1 CO2	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes,
Code CO1 CO2 CO3 CO4	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes
Code CO1 CO2 CO3	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes  Design the encoding and decoding circuits for Linear Block codes, cyclic codes,
Code	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes
Code CO1 CO2 CO3 CO4	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes  Design the encoding and decoding circuits for Linear Block codes, cyclic codes, convolutional codes, BCH and Golay codes.
Code CO1 CO2 CO3 CO4 CO5 Course Code	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes  Design the encoding and decoding circuits for Linear Block codes, cyclic codes, convolutional codes, BCH and Golay codes.
Code CO1 CO2 CO3 CO4 CO5 Course	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes  Design the encoding and decoding circuits for Linear Block codes, cyclic codes, convolutional codes, BCH and Golay codes.  18EC55 - ELECTROMAGNETIC WAVES  Evaluate problems on electrostatic force, electric field due to point, linear, volume
Code CO1 CO2 CO3 CO4 CO5 Course Code	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes  Design the encoding and decoding circuits for Linear Block codes, cyclic codes, convolutional codes, BCH and Golay codes.  18EC55 - ELECTROMAGNETIC WAVES  Evaluate problems on electrostatic force, electric field due to point, linear, volume charges by applying conventional methods and charge in a volume
Code CO1 CO2 CO3 CO4 CO5 Course Code CO1	Explain concept of Dependent & Independent Source, measure of information, Entropy, Rate of Information and Order of a source  Represent the information using Shannon Encoding, Shannon Fano, Prefix and Huffman Encoding Algorithms  Model the continuous and discrete communication channels using input, output and joint probabilities  Determine a codeword comprising of the check bits computed using Linear Block codes, cyclic codes & convolutional codes  Design the encoding and decoding circuits for Linear Block codes, cyclic codes, convolutional codes, BCH and Golay codes.  18EC55 - ELECTROMAGNETIC WAVES  Evaluate problems on electrostatic force, electric field due to point, linear, volume

Course Code	18EC56- VERILOG HDL
CO1	Write Verilog programs in gate, dataflow (RTL), behavioral and switch modeling levels of Abstraction.
CO2	Design and verify the functionality of digital circuit/system using test benches.
CO3	Identify the suitable Abstraction level for a particular digital design.
CO4	Write the programs more effectively using Verilog tasks and directives.
CO5	Perform timing and delay Simulation and interpret the various constructs in logic synthesis
Course Code	10ECL 57 DICITAL CICNAL PROCESSING LABORATORY
CO1	18ECL57 - DIGITAL SIGNAL PROCESSING LABORATORY  Understand the concepts of analog to digital conversion of signals and frequency
COI	domain sampling of signals.
CO2	Modelling of discrete time signals and systems and verification of its properties and results.
CO3	Implementation of discrete computations using DSP processor and verify the results.
CO4	Realize the digital filters using a simulation tool and analyze the response of the filter for an audio signal.
CO5	Write programs using Matlab / Scilab/Octaye to illustrate DSP concepts.
Course Code	18ECL58 - HDL LABORATORY
CO1	Write the Verilog/VHDL programs to simulate Combinational circuits in Dataflow, Behavioral and Gate level Abstractions.
CO2	Describe sequential circuits like flip flops and counters in Behavioral description and obtain simulation waveforms.  description and obtain simulation waveforms.
CO3	Use FPGA/CPLD kits for down loading verilog codes and check output.
CO4	Synthesize Combinational and Sequential circuits on programmable ICs and test the hardware.
CO5	Interface the hardware to the programmable chips and obtain the required output.
Course Code	18CIV59 - ENVIRONMENTAL STUDIES
CO1	Understand the principles of ecology and environmental issues that apply to air, land, and water issues on a globe scale.
CO2	Develop critical thinking and/or observation skills, and apply them to the analysis of a problem or question related to the environment.
CO3	Demonstrate ecology knowledge of a complex relationship between biotic and a biotic components.
CO4	Apply their ecological knowledge to illustrate and graph a problem and describe the realities that managers face when dealing with complex issues.
CO5	Relate to the lates developments in environmental pollution mitigation tools.
Course	18EC61 - DIGITAL COMMUNICATION
Code	
CO1	Associate and apply the concepts of Band pass sampling to well specified signals and channels.
CO2	Analyze and compute performance parameters and transfer rates for low pas and Band pass symbol under ideal and corrupted non band limited channels.
CO3	Test and validate symbol processing and performance parameters at the receiver under ideal and corrupted band limited channels.

CO4	Demonstrate that band pass signals subjected to corruption and distortion in a Band limited channel can be processed at the receiver to meet specified performance
G0.	criteria
CO5	Understand the principles of spread spectrum communications.
Course Code	18EC62 -EMBEDDED SYSTEMS
CO1	Describe the architectural features and instructions of 32 bit microcontroller ARM Cortex M3
CO2	Apply the knowledge gained for Programming ARM Cortex M3 for different applications
CO3	Understand the basic hardware components and their selection method based on the
003	characteristics and attributes of an embedded system
CO4	Develop the hardware /software co-design and firmware design approaches
CO5	Explain the need of real time operating system for embedded system applications
Course	18EC63 – MICROWAVE AND ANTENNAS
Code	
CO1	Describe the use and advantages of microwave transmission
CO2	Analyze various parameters related to microwave transmission lines and
	waveguides
CO3	Identify microwave devices for several applications
CO4	Analyze various antenna parameters necessary for building an RF system
CO5	Recommend various antenna configurations according to the applications
Course	18EC641 – OPERATING SYSTEM
Code	
CO1	Explain the goals, structure, operation and types of operating systems.
CO2	Apply scheduling techniques to find performance factors.
CO3	Explain organization of file systems and IOCS.
CO4	Apply suitable techniques for contiguous and non-contiguous memory allocation.
CO5	Describe message passing, deadlock detection and prevention methods.
Course Code	18ECL66 - EMBEDDED SYSTEMS LABORATORY
CO1	Understand the instruction set of 32 bit microcontroller ARM Cortex M3, and the
	software tool required for programming in Assembly and C language
CO2	Develop assembly language programs using ARM Cortex M3 for different applications
CO3	Interface external devices and I/O with ARM Cortex M3
CO4	Develop C language programs and library functions for embedded system applications
CO5	Analyze the functions of varous peripherals, peripheral registers and power saving
	modes of ARM Cortex M3
Course	18ECL67 - COMMUNICATION LABORATORY
Code	
CO1	Design and test circuits for analog modulation and demodulation schemes viz.,
	AM, FM, etc.
CO2	Determine the characteristics and response of microwave waveguide.
CO3	Determine the characteristics of microstrip antennas and devices and compute the parameters associated with it.
CO4	Design and test the digital and analog modulation circuits and display the waveforms.
CO5	Simulate the digital modulation systems and compare the error performance of basic
	digital modulation schemes
Course	18EC71 – COMPUTER NETWORKS
Code	
CO1	Understand the concepts of networking.

CO2	Describe the various networking architectures.
CO3	Identify the protocols and services of different layers.
CO3	
CO4	Distinguish the basic network configurations and standards associated with each network
C05	Analyze a simple network and measure its parameters
Course	18EC72 – VLSI DESIGN
Code	
CO1	Demonstrate understanding of MOS transistor theory, CMOS fabrication flow and
CO2	technology scaling.
CO2	Draw the basic gates using the stick and layout diagrams with the knowledge of physical
CO3	design aspects.
COS	Demonstrate ability to design Combinational, sequential and dynamic logic circuits as
CO4	per the requirements Interpret Memory elements along with timing considerations
CO4	· · · · · · · · · · · · · · · · · · ·
Course	Interpret testing and testability issues in VLSI Design  18EC733 – DIGITAL IMAGE PROCESSING
Code	18EC/33 - DIGITAL IMAGE PROCESSING
CO1	Describe the fundamentals of digital image processing.
CO2	Understand image formation and the role human visual system plays in perception of
	gray and color image data.
CO3	Apply image processing techniques in both the spatial and frequency (Fourier) domains.
CO4	Design and evaluate image analysis techniques
CO5	Conduct independent study and analysis of Image Enhancement and restoration
	techniques
Course	18EC743 – MULTIMEDIA COMMUNICATION
Course	1 10EC/43 - MULTIMEDIA COMMUNICATION
Code	16EC/45 - MULTIMEDIA COMMUNICATION
	Understand basics of different multimedia networks and applications. Analyse
Code CO1	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form.
Code CO1	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form.  Understand different compression techniques to compress audio and video.
CO2 CO3	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form.  Understand different compression techniques to compress audio and video.  Describe multimedia Communication across Networks.
CO2 CO3 CO4	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form.  Understand different compression techniques to compress audio and video.  Describe multimedia Communication across Networks.  Analyze different media types to represent them in digital form.
Code CO1 CO2 CO3 CO4 CO5	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form.  Understand different compression techniques to compress audio and video.  Describe multimedia Communication across Networks.  Analyze different media types to represent them in digital form.  Compress different types of text and images using different compression techniques
Code CO1 CO2 CO3 CO4 CO5 Course	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form. Implement the data link and routing protocols using C programming.  18ECL77 - VLSI LABORATORY  Design and simulate combinational and sequential digital circuits using Verilog HDL.  Understand the Synthesis process of digital circuits using EDA tool.  Perform ASIC design flow and understand the process of synthesis, synthesis constraints and evaluating the synthesis reports to obtain optimum gate level net list
Code	Understand basics of different multimedia networks and applications. Analyse different media types to represent them in digital form.  Understand different compression techniques to compress audio and video.  Describe multimedia Communication across Networks.  Analyze different media types to represent them in digital form.  Compress different types of text and images using different compression techniques  18ECL76 - COMPUTER NETWORKS LABORATORY  Choose suitable tools to model a network.  Use the network simulator for learning and practice of networking algorithms.  Illustrate the operations of network protocols and algorithms using C programming.  Simulate the network with different configurations to measure the performance parameters.  Implement the data link and routing protocols using C programming.  18ECL77 - VLSI LABORATORY  Design and simulate combinational and sequential digital circuits using Verilog HDL.  Understand the Synthesis process of digital circuits using EDA tool.  Perform ASIC design flow and understand the process of synthesis, synthesis constraints and evaluating the synthesis reports to obtain optimum gate level net list  Design and simulate basic CMOS circuits like inverter, common source amplifier and

Course Code	18EC81 – WIRELESS AND CELLULAR COMMUNICATION
CO1	Understand the communication theory both physical and networking associated with GSM, CDMA & LTE 4G systems.
CO2	Explain concepts of propagation mechanisms like Reflection, Diffraction, Scattering in wireless channels.
CO3	Develop a scheme for idle mode, call set up, call progress handling and call tear down in a GSM cellular network.
CO4	Develop a scheme for idle mode, call set up, call progress handling and call tear down in a CDMA cellular network.
CO5	Understand the Basic operations of Air interface in a LTE 4G system.
Course Code	18EC821 – NETWORK SECURITY
CO1	Explain network security services and mechanisms and explain security concepts
CO2	Understand the concept of Transport Level Security and Secure Socket Layer.
CO3	Explain Security concerns in Internet Protocol security
CO4	Explain Intruders, Intrusion detection and Malicious Software
CO5	Describe Firewalls, Firewall Characteristics, Biasing and Configuration

# PROGRAMME OUTCOME, PROGRAMMESPECIFIC OUTCOMES AND COURSEOUTCOMES OF ALL DEPARTMENTS-2022-23(CRITERIA- 2)

2.6.1 Program outcomes, program specific outcomes and course outcomes

### **Department of Electrical & Electronics Engineering**

#### Program Outcomes (PO's)

- **PO 1: Engineering Knowledge:** Apply knowledge of differential equations, vector calculus, complex variables, matrix theory, probability theory, physics and chemistry, electrical and electronic engineering fundamentals.
- **PO 2: Problem Analysis:** Graduates will Identify, formulate and solve complex electrical and electronics engineering problems using the first principles of mathematics natural sciences and engineering science
- **PO 3: Design:** Graduates will design Electrical and Electronics systems meeting the given specifications for different problems taking safety and precautions into consideration.
- **PO 4: Investigations:** Graduates will Perform investigations, design and conduct experiments, analyze and interpret the results to provide valid conclusions.
- **PO 5: Tool Usage:** Graduates will use modern software tools to model and analyze problems, apply appropriate techniques and IT tools for the design & analysis of the systems keeping in view their limitations.
- **PO 6: The Engineer and Society:** Graduates will understand the impact of local and global issues / happenings and assess societal, health, legal and cultural issues with competency in professional engineering practice on Electrical Engineers.
- **PO 7: Environment and Sustainability:** Graduates will Demonstrate professional skills and contextual reasoning and provide sustainable solutions for problems related to Electrical and Electronics Engineering and also will understand their impact on environment.
- **PO 8: Ethics:** Graduates will have knowledge of professional ethics and code of conduct as applied to Electrical Engineers.
- **PO 9: Individual and Team work:** Graduates will work effectively as an individual and as a member or leader in diverse teams and in multi-disciplinary settings.
- **PO 10: Communication:** Graduates will communicate effectively in both verbal and written form among engineering community, being able to comprehend and write reports, presentation and give / receive clear instructions.

PO 11: Project Management and Finance: Graduates will plan, demonstrate and execute engineering & management principles in their own / team projects in multidisciplinary environment

**PO 12: Life-long learning:** Graduates will have the ability for self- education ,recognize the need for and have the ability to engage in independent and lifelong learning.

#### Program Specific Outcomes (PSO's)

**PSO 1:** Ability to specify architect, design and analyze systems that efficiency generate, transmit, distribute and utilize electrical power.

**PSO 2:** Ability to specify design, prototype and test modern electronic systems that perform analog and digital processing function.

**PSO 3:** Ability to use software for design, simulation and analysis of electrical system.

## ELECTRICAL & ELECTRONICS ENGINEERING-22SCHEME

COURSE CODE	22EEE13 BASIC ELECTRICAL ENGINEERING
CO1	Understand the concepts of DC circuits and Electromagnetism.
CO2	Understand the concepts of single phase and Three phase AC circuits.
CO3	Apply the basic Electrical laws to solve circuits.
CO4	Understand the concepts of measurements and measuring Instruments
CO5	Explain the concepts of domestic wiring, electricity billing, circuit protective devices
	and personal safety measures.
COURSE CODE	22EEE23 BASIC ELECTRICAL ENGINEERING
CO1	Understand the concepts of DC circuits and Electromagnetism.
CO2	Understand the concepts of single phase and Three phase AC circuits.
CO3	Apply the basic Electrical laws to solve circuits.
CO4	Understand the concepts of measurements and measuring Instruments
CO5	Explain the concepts of domestic wiring, electricity billing, circuit protective devices and personal safety measures.
COURSE CODE	BMATE 301 Mathematics-III for EE Engineering
CO1	Understand that physical systems can be described by differential equations and solve such equations
CO2	Make use of correlation and regression analysis to fit a suitable mathematical model for statistical data
CO3	Demonstrate the Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing, and field theory.
CO4	To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z- Transform techniques to solve difference equations
COURSE CODE	22EE302 Electric Circuit Analysis
CO1	Understand that physical systems can be described by differential equations and solve such equations
CO2	Make use of correlation and regression analysis to fit a suitable mathematical model for statistical data
CO3	Demonstrate the Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing, and field theory.
CO4	To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z-Transform techniques to solve difference equations
CO5	Apply discrete and continuous probability distributions in analyzing the probability models arising in the engineering field. Demonstrate the validity of testing the hypothesis.
COURSE CODE	BEE303 Analog Electronic Circuits
CO1	Utilize the characteristics of transistor for different applications.
CO2	Design and analyze biasing circuits for transistor.
CO3	Design, analyze and test transistor circuitry as amplifiers and oscillators
COURSE CODE	BEE304 Transformers and Generators
CO1	Explain the construction, working and various tests of single phase Transformer.

CO2	
	Explain the construction, working and parallel operation of three phase Transformer.
CO3	Explain the construction, working and analysis of Synchronous Generator.
CO4	Explain the construction, working of solar and wind power generators.
COURSE CODE	BEEL305 Transformers and Generators Lab
CO1	Conduct various tests on transformers and synchronous machines and evaluate their performance.
CO2	Perform the parallel operation on two single phase transformers.
CO3	Verify the performance of synchronous generator.
CO4	Calculate the voltage regulation of an alternator using different methods for comparison.
COURSE CODE	BEE 306A DIGITAL LOGIC CIRCUITS
CO1	Explain the concept of combinational and sequential logic circuits
CO2	Analyse and design combinational circuits
CO3	Describe and characterize flip flops and its applications
CO4	Design the sequential circuits using SR, JK, D and T flip-flops and Melay and Moore applications
CO5	Design applications of combinational and sequential circuits
CO6	Employ the digital circuits for different applications
COURSE CODE	BEE306B Electrical Measurements and Instrumentation
CO1	Explain the significance and methods of Measurements, elements of generalised measurement system and errors in measurements.
CO2	Measure resistance, inductance and capacitance by different methods.
CO3	Explain the construction, working and characteristics of various instrument transformers.
CO4	Explain the working of different electronic instruments and display devices.
COURSE CODE	BEE 306C ELECTROMAGNETIC FIELD THEORY
CO1	Explain Scalars, Vectors, Cartesian co-ordinate system, relation between different coordinate systems, Coulomb's law, Electric field intensity and its evaluation for different charge conditions.
CO2	Explain the potential field of a point charge, Potential gradient, Energy density in the electrostatic field and conductor's properties and boundary conditions.
CO2	
CO3	conductor's properties and boundary conditions.
CO3	conductor's properties and boundary conditions.  Explain the Poisson's and Laplace Equations, Biot - Savart's law, Ampere's circuital law and Stokes theorem.  Explain the Magnetic force, Force between differential current elements. Force and torque on a closed circuit, Nature
CO3 CO4 CO5 COURSE CODE	conductor's properties and boundary conditions.  Explain the Poisson's and Laplace Equations, Biot - Savart's law, Ampere's circuital law and Stokes theorem.  Explain the Magnetic force, Force between differential current elements. Force and torque on a closed circuit, Nature of magnetic materials and Magnetic boundary conditions  Explain the Faraday's law, Displacement current. Maxwell's equations, Wave propagation in free space and
CO3 CO4 CO5	conductor's properties and boundary conditions.  Explain the Poisson's and Laplace Equations, Biot - Savart's law, Ampere's circuital law and Stokes theorem.  Explain the Magnetic force, Force between differential current elements. Force and torque on a closed circuit, Nature of magnetic materials and Magnetic boundary conditions  Explain the Faraday's law, Displacement current. Maxwell's equations, Wave propagation in free space and indielectrics.
CO3 CO4 CO5 COURSE CODE	conductor's properties and boundary conditions.  Explain the Poisson's and Laplace Equations, Biot - Savart's law, Ampere's circuital law and Stokes theorem.  Explain the Magnetic force, Force between differential current elements. Force and torque on a closed circuit, Nature of magnetic materials and Magnetic boundary conditions  Explain the Faraday's law, Displacement current. Maxwell's equations, Wave propagation in free space and indielectrics.  BEEL358A Scilab / MATLAB for Transformers & Generators
CO3 CO4 CO5 COURSE CODE CO1 COURSE	conductor's properties and boundary conditions.  Explain the Poisson's and Laplace Equations, Biot - Savart's law, Ampere's circuital law and Stokes theorem.  Explain the Magnetic force, Force between differential current elements. Force and torque on a closed circuit, Nature of magnetic materials and Magnetic boundary conditions  Explain the Faraday's law, Displacement current. Maxwell's equations, Wave propagation in free space and indielectrics.  BEEL358A Scilab / MATLAB for Transformers & Generators  Analyse in an intelligent manner, think better, and perform better.

COURSE CODE	BEEL358D ELECTRICAL HARDWARE LABORATORY
CO1`	Analyse in an intelligent manner, think better, and perform better.
COURSE CODE	BEE306D PHYSICS OF ELECTRONIC DEVICES
CO1	Understand the principles of semiconductor physics
CO2	Understand the principles and characteristics of different types of semiconductor devices
CO3	Understand the fabrication process of semiconductor devices
CO4	Utilize the mathematical models of MOS transistors for circuits and systems
CO5	Identify the mathematical models of MOS transistors for circuits and systems
COURSE CODE	BEE401 ELECTRIC MOTORS
CO1	Understand the construction and operation, characteristics, Testing of DC Motors and determine losses and efficiency.
CO2	Understand the construction and operation, classification and types of Three phase Induction motors.
CO3	Describe the performance characteristics and applications of three phase Induction motors.
CO4	Demonstrate and explain Speed Control methods of three phase induction motor and types of single phase induction motors.
CO5	Understand the construction and operation, V and inverted V curves of synchronous motors.
CO6	Construction and operation of Universal motor, AC servomotor, Linear induction motor, PMSM, SRM and BLDC motors.
COURSE CODE	BEE402 Transmission and Distribution
CO1	Explain the structure of electrical power system, its components, advantages of high voltage AC and DC transmission, various conductors used for transmission, sag and its calculation.
CO2	Explain various types of insulators and methods to improve string efficiency.
CO3	Explain the various transmission line parameters, their effects on transmission of electricity.
CO4	Evaluate the parameters that influence the performance of transmission line and to calculate performance parameters of various transmission lines.
CO4	
	performance parameters of various transmission lines.  Explain carona and its effects, underground cable and its construction, classification, limitations and
CO5	performance parameters of various transmission lines.  Explain carona and its effects, underground cable and its construction, classification, limitations and specifications.
CO5 CO6 COURSE CODE CO1	performance parameters of various transmission lines.  Explain carona and its effects, underground cable and its construction, classification, limitations and specifications.  Evaluate different types of distribution systems.
CO5 CO6 COURSE CODE CO1 CO2	performance parameters of various transmission lines.  Explain carona and its effects, underground cable and its construction, classification, limitations and specifications.  Evaluate different types of distribution systems.  BEE403Microcontrollers
CO5  CO6  COURSE CODE  CO1  CO2  CO3	performance parameters of various transmission lines.  Explain carona and its effects, underground cable and its construction, classification, limitations and specifications.  Evaluate different types of distribution systems.  BEE403Microcontrollers  Outline the 8051 architecture, registers, internal memory organization, addressing modes.  Discuss 8051 addressing modes, instruction set of 8051, accessing data and I/O port programming.  Develop 8051C programs for time delay, I/O operations, I/O bit manipulation, logic and arithmetic operations, data conversion and timer/counter programming.
CO5  CO6  COURSE CODE CO1 CO2 CO3 CO4	performance parameters of various transmission lines.  Explain carona and its effects, underground cable and its construction, classification, limitations and specifications.  Evaluate different types of distribution systems.  BEE403Microcontrollers  Outline the 8051 architecture, registers, internal memory organization, addressing modes.  Discuss 8051 addressing modes, instruction set of 8051, accessing data and I/O port programming.  Develop 8051C programs for time delay, I/O operations, I/O bit manipulation, logic and arithmetic operations, data

COURSE CODE	BEEL456D ARDUINO AND RASPBERRY PI
CO1	Explain the concepts of Internet of Things and its hardware and software components
CO2	Interface I/O devices, sensors & communication modules
CO3	Remotely monitor data and control devices
CO4	Develop real life IoT based projects.

## ELECTRICAL & ELECTRONICS ENGINEERING 21SCHEME

	10 C
COURSE CODE	21ELE13 BASIC ELECTRICAL ENGINEERING
CO1	Analyse basic DC and AC electric circuits.
CO2	Explain the working principles of transformers and electrical machines
CO3	Explain the concepts of electric power transmission and distribution of power
CO4	Understand the wiring methods, electricity billing, and working principles of circuit protectivedevices and personal safety measures.
COURSE CODE	21ELE23 BASIC ELECTRICAL ENGINEERING
CO1	Analyse basic DC and AC electric circuits.
CO2	Explain the working principles of transformers and electrical machines
CO3	Explain the concepts of electric power transmission and distribution of power
CO4	Understand the wiring methods, electricity billing, and working principles of circuit protectivedevices and personal safety measures.
COURSE CODE	21MAT31 Transform Calculus, Fourier Series and Numerical Techniques (Common to all Branches)
CO1	To solve ordinary differential equations using Laplace transform.
CO2	Demonstrate the Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory.
CO3	To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z-Transform techniques to solve difference equations
CO4	To solve mathematical models represented by initial or boundary value problems involving partial differential equations
CO5	Determine the extremals of functionals using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.
COURSE CODE	21EE32 Analog Electronic Circuits and Op - Amps
CO1	Obtain the output characteristics of clipper and clamper circuits
CO2	Design and compare biasing circuits for transistor amplifiers & explain the transistor switching.
CO3	Explain the concept of feedback, its types and design of feedback circuits

CO4	Design and analyse the power amplifier circuits and oscillators for different frequencies.
CO5	Design and analysis of FET and MOSFET amplifiers.
CO6	Demonstrate the application of Op-amps.
COURSE CODE	21EE33 Electric circuit Analysis
CO1	Understand the basic concepts, basic laws and methods of analysis of DC and AC networks and reduce the complexity of network using source shifting, source transformation and network reduction using transformations.
CO2	Solve complex electric circuits using network theorems.
CO3	Discuss resonance in series and parallel circuits and also the importance of initial conditions and their evaluation.
CO4	Synthesize typical waveforms using Laplace transformation.
CO5	Solve unbalanced three phase systems and also evaluate the performance of two port networks.
COURSE CODE	21EE34 Transformer and generators
CO1	Understand the construction and operation of 1-phase, 3-Phase transformers, and Autotransformer.
CO2	Analyze the performance of transformers by polarity test, Sumpner's Test, phase conversion, 3-phase connection, and parallel operation.
CO3	Understand the construction and working of AC and DC Generators
CO4	Analyze the performance of the AC Generators on infinite bus and parallel operation
CO5	Determine the regulation of AC Generator by Slip test, EMF, MMF, and ZPF Methods.
COURSE CODE	21EEL35 Electrical Machines Laboratory - 1
CO1	Evaluate the performance of transformers from the test data obtained.
CO2	Connect and operate two single phase transformers of different KVA rating in parallel.
CO3	Connect single phase transformers for three phase operation and phase conversion.
CO4	Compute the voltage regulation of synchronous generator using the test data obtained in the laboratory
CO5	Evaluate the performance of synchronous generators from the test data and assess the performance of synchronous generator connected to infinite bus.

COURSE CODE	21EEL381 Scilab for Transformers and Generators
CO1	Analyse in an intelligent manner, think better, and perform better.

COURSE CODE	21EEL382 Circuit Laboratory using Pspice
CO1	Analyse in an intelligent manner, think better, and perform better.
COURSE CODE	21EEL383 555 IC Laboratory
CO1	Analyse in an intelligent manner, think better, and perform better.
COURSE CODE	21EEL384 Scilab for Mathematics
CO1	Analyse in an intelligent manner, think better, and perform better.
COURSE CODE	21MAT41 Complex Analysis, Probability and Statistical Methods
CO1	Use the concepts of an analytic function and complex potentials to solve the problems arising in electromagnetic field theory. Utilize conformal transformation and complex integral arising in aerofoil theory, fluid flow visualization and image processing.
CO2	Obtain Series Solutions of Ordinary Differential Equation.
CO3	Make use of the correlation and regression analysis to fit a suitable mathematical model for the statistical data.
CO4	Apply discrete and continuous probability distributions in analysing the probability models arising in the engineering field.
CO5	Construct joint probability distributions and demonstrate the validity of testing the hypothesis.
COURSE CODE	21EE42 Digital System Design
CO1	Develop simplified switching equation using Karnaugh Maps and QuineMcClusky techniques.
CO2	Design Multiplexer, Encoder, Decoder, Adder, Subtractors and Comparator as digital combinational control circuits
CO3	Design flip flops, counters, shift registers as sequential control circuits.
CO4	Develop Mealy/Moore Models and state diagrams for the given clocked sequential circuits.
CO5	Explain the functioning of Read only and Read/Write Memories, Programmable ROM, EPROM and Flash memory.
CO6	Realize Boolean expressions, adders and subtractors using gates.
CO7	Design and test Ring counter/Johnson counter, Sequence generator and 3 bit counters.

COURSE CODE	21EE43 Microcontroller
CO1	Outline the 8051 architecture, registers, internal memory organization, addressing modes.
CO2	Discuss 8051 addressing modes, instruction set of 8051, accessing data and I/O port programming.
CO3	Develop 8051C programs for time delay, I/O operations, I/O bit manipulation, logic and arithmetic operations, data conversion and timer/counter programming.
CO4	Summarize the basics of serial communication and interrupts, also develop 8051 programs for serial data communication and interrupt programming.
CO5	Program 8051to work with external devices for ADC, DAC, Stepper motor control, DC motor control.
COURSE CODE	21EE44 Electric Motors
CO1	Explain the construction, operation and classification of DC Motor, AC motor and special purpose motors.
CO2	Describe the performance characteristics and applications of Electric motors.
CO3	Demonstrate and explain the methods of testing of DC machines and determine losses and efficiency.
CO4	Control the speed of DC motor and induction motor.
CO5	Explain the starting methods, equivalent circuit and phasor diagrams, torque angle, effect of change in excitation and change in load, hunting and damping of synchronous motors.
COURSE CODE	21EEL46 Electrical Machines Laboratory - 2
CO1	Test DC machines to determine their characteristics and also to control the speed of DC motor.
CO2	Pre-determine the performance characteristics of DC machines by conducting suitable tests.
CO3	Perform load test on single phase and three phase induction motor to assess its performance.
CO4	Conduct test on induction motor to pre-determine the performance characteristics.
CO5	Conduct test on synchronous motor to draw the performance curves

COURSE CODE	21EEP481 Microcontroller Based Projects
CO1	Analyse in a systematic way, think better, and perform better.

COURSE CODE	21EEL482 Scilab for Electric Motors
CO1	Analyse in a systematic way, think better, and perform better.

COURSE CODE	21EEL483 Scilab for Electrical and Electronic Measurements
CO1	Analyse in a systematic way, think better, and perform better.

COL	JRSE DE	21EEL484 Simulation of Op-Amp Circuits
CO1		Analyse in a systematic way, think better, and perform better.

COURSE CODE	21EE51 Transmission and Distribution
CO1	Explain transmission and distribution scheme, identify the importance of different transmission systems and types of
	insulators.
CO2	Analyze and compute the parameters of the transmission line for different configurations.
CO3	Assess the performance of overhead lines.
CO4	Interpret corona, explain the use of underground cables.
CO5	Classify different types of distribution systems; examine its quality & reliability.

COURSE CODE	21EE52 Control Systems
CO1	Analyze and model electrical and mechanical system using analogous.
CO2	Formulate transfer functions using block diagram and signal flow graphs
CO3	Analyze the stability of control system, ability to determine transient and steady state time response.
CO4	Illustrate the performance of a given system in time and frequency domains, stability analysis using Root locus and Bode plots.
CO5	Discuss stability analysis using Nyquist plots, Design controller and compensator for a given specification.
CO6	Utilize software package and discrete components in assessing the time and frequency domain response of a given second order system.
CO7	Design, analyze and simulate Lead, Lag and Lag – Lead compensators for given specifications.
CO8	Determine the performance characteristics of ac and DC servomotors and synchro-transmitter receiver pair used in control systems.
CO9	Simulate the DC position and feedback control system to study the effect of P, PI, PD and PID controller and Lead compensator on the step response of the system.
CO10	Develop a script files to plot Root locus, Bode plot and Nyquist plot to study the stability of a system using software package.

COURSE	
CODE	21EE53 Power System Analysis - 1
CO1	Model the power system components & construct per unit impedance diagram of power system.
CO2	Analyze three phase symmetrical faults on power system.
CO3	Compute unbalanced phasors in terms of sequence components and vice versa, also develop sequence networks.
CO4	Analyze various unsymmetrical faults on power system.
CO5	Examine dynamics of synchronous machine and determine the power system stability.
Course Code	21EE54 Power Electronics
CO1	To give an overview of applications power electronics, different types of power semiconductor devices, their switching characteristics, power diode characteristics, types, their operation and the effects of power diodes on RL circuits.
CO2	To explain the techniques for design and analysis of single phase diode rectifier circuits.
CO3	To explain different power transistors, their steady state and switching characteristics and limitations.
CO4	To explain different types of Thyristors, their gate characteristics and gate control requirements.
CO5	To explain the design, analysis techniques, performance parameters and characteristics of controlled rectifiers, DC-DC, DC-AC converters and Voltage controllers.

Trigger the SCR by different methods  Verify the performance of single phase controlled full wave rectifier and AC voltage controller with R and RL loads.  Control the speed of a DC motor, universal motor and stepper motors.  Verify the performance of single phase full bridge inverter connected to resistive load.  21EEL581 Scilab for Analysis of Power Systems  Analyse in an intelligent manner, think better, and perform better.  21EEL582 Scilab for Power Electronics  Analyse in an intelligent manner, think better, and perform better.

CO4	Analyse in a systematic way, think better, and perform better.
Course	
Code	21EEP584 Renewable Energy Projects
CO1	Analyse in a systematic way, think better, and perform better.
Course Code	21EE61 Management and Entrepreneurship
CO1	Explain the field of management, task of the manager, planning and steps in decision making.
CO2	Discuss the structure of organization, importance of staffing, leadership styles, modes of communication, techniques of coordination and importance of managerial control in business.
CO3	Explain the concepts of entrepreneurship and a businessman's social responsibilities towards different groups.
CO4	Show an understanding of role of SSI's in the development of country and state/central level institutions/ agencies supporting business enterprises.
CO5	Discuss the concepts of project management, capital budgeting, project feasibility studies, need for project report and new control techniques.
Course	21FE/2 Damen Swaters Analysis 2
Code CO1	21EE62 Power System Analysis - 2
CO2	Formulate network matrices and models for solving load flow problems.
CO3	Perform steady state power flow analysis of power systems using numerical iterative techniques.
CO4	Solve issues of economic load dispatch and unit commitment problems.
CO5	Analyze short circuit faults in power system networks using bus impedance matrix.
CO6	Apply Point by Point method and Runge Kutta Method to solve Swing Equation.
CO7	Develop a program in suitable package to assess the performance of medium and long transmission lines.
	Develop a program in suitable package to obtain the power angle characteristics of salient and non-salient pole alternator.
CO8	Develop a program in suitable package to assess the transient stability under three phase fault at different locations in a of radial power systems.
Course Code	21EE63 Signals and Digital Signal Processing
CO1	Discuss classification and basic operations that can be performed on both continuous and discrete time signals.
CO2	Evaluate Discrete Fourier Transform of a sequence and the convolution of two sequences to determine the output sequence.
CO3	Evaluate Discrete Fourier Transform of a sequence by using fast methods.
CO4	Design Butterworth and Chebyshev IIR digital filters and FIR filters using different techniques.
CO5	Develop different structures for IIR and FIR filters.

Course Code	21EE641 Sensors and Transducers
CO1	Classify the transducers and explain the need of transducers, their classification, advantages and disadvantages.
CO2	Explain the working of various transducers and sensors.
CO3	Outline the recent trends in sensor technology and their selection
CO4	Analyze the signal conditioning and signal conditioning equipment.
CO5	Illustrate different configuration of Data Acquisition System and data conversion.
CO6	Show knowledge of data transmission and telemetry.
CO7	Explain measurement of non-electrical quantities -temperature, flow, speed, force, torque, power and viscosity.
Course Code	21EE642 Electromagnetic Field Theory
CO1	Use different coordinate systems, Coulomb's Law and Gauss Law for the evaluation of electric fields produced by different charge configurations.
CO2	Calculate the energy and potential due to a system of charges & Explain the behavior of electric field across a boundary conditions
CO3	Explain the Poisson's, Laplace equations and behavior of steady magnetic fields.
CO4	Explain the behavior of magnetic fields and magnetic materials.
CO5	Asses time varying fields and propagation of waves in different media.
Course Code	21EE643 Electrical Machine Design
CO1	Identify and list, limitations, modern trends in design, manufacturing of electrical machines and properties of materials used in the electrical machines.
CO2	Derive the output equation of DC machine, discuss selection of specific loadings and magnetic circuits of DC machines, design the field windings of DC machine, and design stator and rotor circuits of a DC machine.
CO3	Derive the output equations of transformer, discuss selection of specific loadings, estimate the number of cooling tubes, no load current and leakage reactance of core type transformer.
CO4	Develop the output equation of induction motor, discuss selection of specific loadings and magnetic circuits of induction motor, design stator and rotor circuits of a induction motor.
CO5	Formulate the output equation of alternator, design the field windings of Synchronous machine, discuss short circuit ratio and its effects on performance of synchronous machines, design salient pole and non-salient pole alternators for given specifications.

Course Code	21EE644 Electrical Engineering Materials
CO1	Discuss electrical and electronics materials, their importance, classification and operational requirement
CO2	Discuss conducting, dielectric, insulating and magnetic materials used in engineering, their properties and classification.
CO3	Explain the phenomenon superconductivity, super conducting materials and their application in engineering.
CO4	Explain the plastic and its properties and applications.
Course Code	21EE651 Utilization of Electrical Power
CO1	Discuss different methods of electric heating & welding.
CO2	Discuss the laws of electrolysis, extraction, refining of metals and electro deposition process.
CO3	Discuss the laws of illumination, different types of lamps, lighting schemes and design of lighting systems.
CO4	Analyze systems of electric traction, speed time curves and mechanics of train movement.
CO5	Explain the motors used for electric traction, their control & braking and power supply system used for electric traction.
Course Code	21EE652 Renewable Energy Resources
CO1	Discuss causes of energy scarcity and its solution, energy resources and availability of renewable energy.
CO2	Outline energy from sun, energy reaching the Earth's surface and solar thermal energy applications.
CO3	Discuss types of solar collectors, their configurations, solar cell system, its characteristics and their applications.
CO4	Explain generation of energy from hydrogen, wind, geothermal system, solid waste and agriculture refuse.
CO5	Discuss production of energy from biomass, biogas.
CO6	Summarize tidal energy resources, sea wave energy and ocean thermal energy.
Course Code	21EE653 Industrial Servo Control Systems
CO1	Explain the evolution and classification of servos, with descriptions of servo drive actuators, amplifiers, feedback transducers, performance, and troubleshooting techniques.
CO2	Discuss system analogs, vectors and transfer functions of differential equations.
CO3	Discuss mathematical equations for electric servo motors, both DC and brushless DC servo motors.
CO4	Discuss mathematical equations for electric servo motors, both DC and brushless DC servo motors.
Course Code	21EE654 Advanced Control Systems
CO1	Discuss state variable approach for linear time invariant systems in both the continuous and discrete time systems.
CO2	Develop of state models for linear continuous–time and discrete–time systems.
CO3	Apply vector and matrix algebra to find the solution of state equations for linear continuous—time and discrete—time systems.

CO4	Define controllability and observability of a system and test for controllability and observability of a given system.
CO5	Design pole assignment and state observer using state feedback.
CO6	Develop the describing function for the nonlinearity present to assess the stability of the system.
CO7	Develop Lyapunov function for the stability analysis of nonlinear systems
Course Code	21EEL66 Digital Signal Processing Laboratory
CO1	Conduct sampling of signals in time and frequency domains.
CO2	Evaluate the impulse response of a system.
CO3	Obtain convolution of given sequences to evaluate the response of a system.
CO4	Compute DFT and IDFT of a given sequence using the basic definition and/or fast methods.
CO5	Provide a solution for a given difference equation.
CO6	Design and implement IIR and FIR filters.
Course Code	21EE71 High Voltage and Power System Protection
CO1	Apply the knowledge of dielectric property for insulation, it's performances as per Standards and High voltage application in power system Equipment's.
CO2	
002	Analyze the circuits of high voltages, high currents in Generation and Measurements.
CO3	Analyze the circuits of high voltages, high currents in Generation and Measurements.  Apply relays to the power system protection.
CO3	Apply relays to the power system protection.
CO4	Apply relays to the power system protection.  Discuss the construction, operating principles and performances of circuit breaker.
CO4 CO5	Apply relays to the power system protection.  Discuss the construction, operating principles and performances of circuit breaker.  Discuss protection of generators, motors, Transformer and Bus Zone Protection.
CO4 CO5 CO6	Apply relays to the power system protection.  Discuss the construction, operating principles and performances of circuit breaker.  Discuss protection of generators, motors, Transformer and Bus Zone Protection.  Describe the causes of over voltages and their remedial measures.  Analyze the spark over characteristics using High voltages for checking the breakdown phenomenon and dielectric

Course Code	21EE72 Power System Operation and Control
CO1	Describe various levels of controls in power systems, architecture and configuration of SCADA.
CO2	Develop and analyze mathematical models of Automatic Load Frequency Control.
CO3	Develop mathematical model of Automatic Generation Control in Interconnected Power system.
CO4	Discuss the Control of Voltage, Reactive Power and Voltage collapse.

CO5	Explain security, contingency analysis, and state estimation of power systems.
Course Code	21EE721 Power System Planning
CO1	Discuss primary components of power system planning, planning methodology for optimum power system expansion and load forecasting.
CO2	Understand economic appraisal to allocate the resources efficiently and appreciate the investment decisions
CO3	Discuss expansion of power generation and planning for system energy in the country, evaluation of operating states of transmission system, their associated contingencies and the stability of the system.
CO4	Discuss principles of distribution planning, supply rules, network development and the system studies
CO5	Discuss reliability criteria for generation, transmission, distribution and reliability evaluation and analysis, grid reliability, voltage disturbances and their remedies
CO6	Discuss planning and implementation of electric –utility activities, market principles and the norms framed.
Course Code	21EE722 Smart Grid
CO1	Discuss the progress made by different stakeholders in the design and development of smart grid.
CO2	Explain measurement techniques using Phasor Measurement Units and smart meters
CO3	Discuss tools for the analysis of smart grid and design, operation and performance
CO4	Discuss classical optimization techniques and computational methods for smart grid design, planning and operation.
CO5	Explain predictive grid management and control technology for enhancing the smart grid performance
CO6	Develop cleaner, more environmentally responsible technologies for the electric system.
CO7	Discuss the computational techniques, communication, measurement, and monitoring technology tools essential to the design of the smart grid.
CO8	Explain methods to promote smart grid awareness and making the existing transmission system smarter by investing in new technology.
Course Code	21EE723 ANN with Applications to Power Systems
CO1	Develop Neural Network and apply elementary information processing tasks that neural network can solve.
CO2	Develop Neural Network and apply powerful, useful learning techniques.
CO3	Develop and Analyze multilayer feed forward network for mapping provided through the first network layer and error back propagation algorithm.
CO4	Analyze and apply algorithmic type problems to tackle problems for which algorithms are not available.
CO5	Develop and Analyze supervised/unsupervised, learning modes of Neural Network for different applications.
Course Code	21EE724 Electrical Vehicle Technologies
CO1	Explain the working of electric vehicles and recent trends.

CO2	Analyze different power converter topology used for electric vehicle application.
CO3	Develop the electric propulsion unit and its control for application of electric vehicles.
CO4	Design converters for battery charging and explain transformer less topology.
Course Code	21EE725 PLC and SCADA
CO1	Discuss history of PLC and describe the hardware components of PLC: I/O modules, CPU, memory devices, other support devices, operating modes and PLC programming.
CO2	Describe field devices Relays, Contactors, Motor Starters, Switches, Sensors, Output Control Devices, Seal-In Circuits, and Latching Relays commonly used with I/O module.
CO3	Analyze PLC timer and counter ladder logic programs and describe the operation of different program control instructions
CO4	Discuss the execution of data transfer instructions, data compare instructions and the basic operation of PLC closed-loop control system.
CO5	Describe the operation of mechanical sequencers, bit and word shift registers, processes and structure of control systems and communication between the processes.
Course Code	21EE731 Computer Aided Electrical Drawing
CO1	Develop armature winding diagram for DC and AC machines.
CO2	Develop a Single Line Diagram of Generating Stations and substation using the standard symbols.
CO3	Construct sectional views of core type and shell type transformers using the design data.
CO4	Construct sectional views of assembled DC and AC machine and their parts using the design data or the sketches.
Course Code	21EE732 Micro- and Nano-Scale Sensors and Transducers
CO1	Understand the differences between the sensor and transducer technology based on nanotechnology and nanofabrication and the classical sensor technologies
CO2	Make an informed selection of a sensor or transducer for a particular application
CO3	Become knowledgeable about the technologies that are available commercially at the present time.
Course Code	21EE733 Big Data Analytics in Power Systems
CO1	Discuss role of big data and machine-learning methods applicable to power systems and in particular to Smart Grid communications.
CO2	Discuss optimization methods which are suitable for big data models in power systems.
CO3	Discuss various cyber security issues, electricity theft detection and mitigation that exist in IoT-enabled future power systems.

CO4	Discuss renewable energy planning concerns associated with planned future power systems that have high renewable penetration.
Course	
Code	21EE734 Industrial Drives and Applications
CO1	Explain the advantages, choice and control of electric drive
CO2	Explain the dynamics, generating and motoring modes of operation of electric drives
CO3	Explain the selection of motor power rating to suit industry requirements
CO4	Analyze the performance & control of DC motor drives using controlled rectifiers
CO5	Analyze the performance & control of converter fed Induction motor, synchronous motor & stepper motor drives.
Course Code	21EE735 FACTS and HVDC
CO1	Discuss transmission interconnections, flow of Power in an AC System, limits of the loading capability, dynamic stability considerations of a transmission interconnection and controllable parameters.
CO2	Explain the basic concepts, definitions of flexible ac transmission systems and benefits from FACTS technology.
CO3	Describe shunt controllers, Static Var Compensator and Static Compensator for injecting reactive power in the transmission system in enhancing the controllability and power transfer capability.
CO4	Describe series Controllers Thyristor-Controlled Series Capacitor (TCSC) and the Static Synchronous Series Compensator (SSSC) for control of the transmission line current.
CO5	Explain advantages of HVDC power transmission, overview and organization of HVDC system.
CO6	Describe the basic components of a converter, the methods for compensating the reactive power demanded by the converter.
CO7	Explain converter control for HVDC systems, commutation failure, control functions.
Course Code	21EE741 Carbon Capture and Storage
CO1	Discuss the impacts of climate change and the measures that can be taken to reduce emissions.
CO2	Discuss carbon capture and carbon storage.
CO3	Explain the fundamentals of power generation.
CO4	Explain methods of carbon capture from power generation and industrial processes.
CO5	Explain different carbon storage methods: storage in coal seams, depleted gas reservoirs and saline formations.
CO6	Explain Carbon dioxide compression and pipeline transport.
Course Code	21EE742 Electric Vehicles
CO1	Explain the roadway fundamentals, laws of motion, vehicle mechanics and propulsion system design.
CO2	Explain the working of electric vehicles and hybrid electric vehicles in recent trends.
CO3	Model batteries, Fuel cells, PEMFC and super capacitors

CO4	Analyze DC and AC drive topologies used for electric vehicle application.
CO5	Develop the electric propulsion unit and its control for application of electric vehicles.
Course Code	21EE743 Disasters Management
CO1	Discuss disaster management plan, cyclones and their hazard potential
CO2	Understand the role of IMD and cyclone prediction and cyclone warning system in India
CO3	Understand the role of different institutions defence and other services in natural disaster management.
CO4	Understand the role of Central Water Commission in river water sharing, Draught, its assessment and draught management plan
CO5	Understand occurrence of earth quake, Tsunamis and thunderstorms.
Course Code	21EE744 Electrical Power Quality
CO1	Define Power quality; evaluate power quality procedures and standards.
CO2	Estimate voltage sag performance; explain principles of protection and Sources of transient over voltages.
CO3	Identify various sources of harmonics, explain effects of harmonic distortion.
CO4	Evaluate harmonic distortion, control harmonic distortion.
CO5	Estimate power quality in distribution planning. Identify power quality issues in utility system.
Course Code	21EE745 Energy Conservation and Audit
CO1	Analyze about energy scenario nationwide and worldwide, also outline Energy Conservation Act and its features.
CO2	Discuss load management techniques and energy efficiency.
CO3	Understand the need of energy audit and energy audit methodology.
CO4	Understand various pillars of electricity market design.
CO5	Conduct energy audit of electrical systems and buildings.
CO6	Show an understanding of demand side management and energy conservation.

	ELECTRICAL & ELECTRONICS ENGINEERING DEPARTMENT
COURSE CODE	18ELE14/24 BASIC ELECTRICAL ENGINEERING
CO1	To predict the behaviour of electrical and magnetic circuits.
CO2	Select the type of generator / motor required for a particular application.
CO3	Realize the requirement of transformers in transmission and distribution of electric power and other applications.
CO4	Practice Electrical Safety Rules & standards.
CO5	To function on multi-disciplinary teams.
COURSE CODE	18ELEL17/27 BASIC ELECTRICAL ENGINEERING LABOROTORY
CO1	Identify the common electrical components and measuring instruments used for conducting experiments in the electrical laboratory.
CO2	Compare power factor of lamps.
CO3	Determine impedance of an electrical circuit and power consumed in a 3 phase load.
CO4	Determine the Earth Resistance and understand two way and three way control of lamps.
COURSE CODE	18MAT31 TRANSFORM CALCULUS, FOURIER SERIES AND NUMERICAL TECHNIQUES
CO1	Use Laplace transform and inverse Laplace transform in solving differential/ integral equation arising in network analysis, control systems and other fields of engineering
CO2	Demonstrate Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory
CO3	Make use of Fourier transform and Z-transform to illustrate discrete/continuous function arisingin wave and heat propagation, signals and systems
CO4	Solve first and second order ordinary differential equations arising in engineering problems using single step and multistep numerical methods.
CO5	Determine the externals of functionals using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.
COURSE CODE	18EE32 ELECTRIC CIRCUIT ANALYSIS (Core Subject)
CO1	Understand the basic concepts, basic laws and methods of analysis of DC and AC networks and reduce the complexity of network using source shifting, source transformation and network reduction using transformations

CO2	Solve complex electric circuits using network theorems
CO3	Discuss resonance in series and parallel circuits and also the importance of initial conditions and their evaluation.
CO4	Synthesize typical waveforms using Laplace transformation.
CO5	Solve unbalanced three phase systems and also evaluate the performance of two port networks
COURSE CODE	18EE33 TRANSFORMERS AND GENERATORS
CO1	Understand the construction and operation of 1-phase, 3-Phase transformers and Autotransformer.
CO2	Analyze the performance of transformers by polarity test, Sumpner's Test, phase conversion, 3-phase connection, and parallel operation.
CO3	Understand the construction and working of AC and DC Generators. ·
CO4	Analyze the performance of the AC Generators on infinite bus and parallel operation
CO5	Determine the regulation of AC Generator by Slip test, EMF, MMF, and ZPF Methods.
COURSE CODE	18EE34 ANALOG ELECTRONIC CIRCUITS
CO1	Obtain the output characteristics of clipper and clamper circuits. ·
CO2	Design and compare biasing circuits for transistor amplifiers & explain the transistor switching.
CO3	Explain the concept of feedback, its types and design of feedback circuits ·
CO4	Design and analyze the power amplifier circuits and oscillators for different frequencies
CO5	Design and analysis of FET and MOSFET amplifiers
COURSE CODE	18EE35 DIGITAL SYSTEM DESIGN
CO1	Develop simplified switching equation using Karnaugh Maps and QuineMcClusky techniques.
CO2	Design Multiplexer, Encoder, Decoder, Adder, Subtractors and Comparator as digital combinational control circuits.
CO3	Design flip flops, counters, shift registers as sequential control circuits.
CO4	Develop Mealy/Moore Models and state diagrams for the given clocked sequential circuits.
CO5	Explain the functioning of Read only and Read/Write Memories, Programmable ROM, EPROM and Flash memory
COURSE CODE	18EE36 ELECTRICAL AND ELECTRONICMEASUREMENTS (Core Course)
CO1	Measure resistance, inductance and capacitance using bridges and determine earth resistance.
CO2	Explain the working of various meters used for measurement of Power, Energy & understand the adjustments, calibration & errors in energy meters.
CO3	Understand methods of extending the range of instruments & instrument transformers.
CO4	Explain the working of different electronic instruments.
CO5	Explain the working of different display and recording devices

COURSE CODE	18EEL37 ELECTRICALMACHINES LABORATORY - 1
CO1	Evaluate the performance of transformers from the test data obtained.
CO2	Connect and operate two single phase transformers of different KVA rating in parallel.
CO3	Connect single phase transformers for three phase operation and phase conversion.
CO4	Compute the voltage regulation of synchronous generator using the test data obtained in the laboratory.
CO5	Evaluate the performance of synchronous generators from the test data and assess the performance of synchronous generator connected to infinite bus.
COURSE	18EEL38 ELECTRONICS LABORATORY
CODE	
CO1	Design and test rectifier circuits with and without capacitor filters.
CO2	Determine h-parameter models of transistor for all modes.
CO3	Design and test BJT and FET amplifier and oscillator circuits.
CO4	Realize Boolean expressions, adders and subtractors using gates.
CO5	Design and test Ring counter/Johnson counter, Sequence generator and 3 bit counters
COURSE	18MAT41 COMPLEX ANALYSIS, PROBABILITY AND STATISTICAL METHODS
CODE	
CO1	Use the concepts of analytic function and complex potentials to solve the problems arising in electromagnetic field theory.
CO2	Utilize conformal transformation and complex integral arising in aerofoil theory, fluid flow visualization and image processing.
CO3	Apply discrete and continuous probability distributions in analyzing the probability models arising in engineering field.
CO4	Make use of the correlation and regression analysis to fit a suitable mathematical model for the statistical data.
CO5	Construct joint probability distributions and demonstrate the validity of testing the hypothesis.
COURSE	18EE42 POWER GENERATION AND ECONOMICS
CODE	
CO1	Describe the working of hydroelectric, steam, nuclear power plants and state functions of major equipment of the power plants.
CO2	Classify various substations and explain the functions of major equipments in substations.
CO3	Explain the types of grounding and its importance.
CO4	Infer the economic aspects of power system operation and its effects
CO5	Explain the importance of power factor improvement.
COURSE	18EE43 TRANSMISSION AND DISTRIBUTION
CODE	
CO1	Explain transmission and distribution scheme, identify the importance of different transmission systems and types of insulators.
L	<u> </u>

CO2	Analyze and compute the parameters of the transmission line for different configurations.
CO3	Assess the performance of overhead lines.
CO4	Interpret corona, explain the use of underground cables.
CO5	Classify different types of distribution systems; examine its quality & reliability.
COURSE	18EE44 ELECTRIC MOTORS
CO1	Explain the construction, operation and classification of DC Motor, AC motor and Special purpose motors.
CO2	Describe the performance characteristics & applications of Electric motors.
CO3	Demonstrate and explain the methods of testing of DC machines and determine losses and efficiency.
CO4	Control the speed of DC motor and induction motor.
CO5	Explain the starting methods, equivalent circuit and phasor diagrams, torque angle, effect of change in excitation and change in load, hunting and damping of synchronous motors.
COURSE	18EE45 ELECTROMAGNETIC FIELD THEORY
CODE	
CO1	Use different coordinate systems, Coulomb's Law and Gauss Law for the evaluation of electric fields produced by different charge configurations.
CO2	Calculate the energy and potential due to a system of charges & Explain the behavior of electric field across a boundary conditions.
CO3	Explain the Poisson's, Laplace equations and behavior of steady magnetic fields.
CO4	Explain the behavior of magnetic fields and magnetic materials.
CO5	Asses time varying fields and propagation of waves in different media.
COURSE CODE	18EE46 OPERATIONAL AMPLIFIERS AND LINEAR ICs
CO1	Describe the characteristics of ideal and practical operational amplifier ·
CO2	Design filters and signal generators using linear ICs
CO3	Demonstrate the application of Linear ICs as comparators and rectifiers.
CO4	Analyze voltage regulators for given specification using op-amp and IC voltage regulators.
CO5	Summarize the basics of PLL and Timer.
COURSE	18EEL47 ELECTRICAL MACHINES LABORATORY - 2
CODE	
CO1	Test DC machines to determine their characteristics and also to control the speed of DC motor.
CO2	Pre-determine the performance characteristics of DC machines by conducting suitable tests.
CO3	Perform load test on single phase and three phase induction motor to assess its performance.
CO4	Conduct test on induction motor to pre-determine the performance characteristics.

CO5	Conduct test on synchronous motor to draw the performance curves.
COURSE CODE	18EEL48 OP- AMP AND LINEAR ICS LABORATORY 2
CO1	To conduct experiment to determine the characteristic parameters of OP-Amp ·
CO2	To design test the OP-Amp as Amplifier, adder, subtractor, differentiator and integrator.
CO3	To design test the OP-Amp as oscillators and filters.
CO4	Design and study of Linear IC's as multivibrator power supplies.
COURSE CODE	18EE51 MANAGEMENT AND ENTREPRENEURSHIP
CO1	Explain the field of management, task of the manager, planning and steps in decision making.
CO2	Discuss the structure of organization, importance of staffing, leadership styles, modes of communication, techniques of coordination and importance of managerial control in business.
CO3	Explain the concepts of entrepreneurship and a businessman's social responsibilities towards different groups.
CO4	Show an understanding of role of SSI's in the development of country and state/central level institutions/agencies supporting business enterprises.
CO5	Discuss the concepts of project management, capital budgeting, project feasibility studies, need for project report and new control techniques
COURSE	18EE52 MICROCONTROLLER
CODE	
CO1	Outline the 8051 architecture, registers, internal memory organization, addressing modes.
CO2	Discuss 8051 addressing modes, instruction set of 8051, accessing data and I/O port programming. · and timer/counter programming.
CO3	Develop 8051C programs for time delay, I/O operations, I/O bit manipulation, logic and arithmetic operations, data conversion
CO4	Summarize the basics of serial communication and interrupts, also develop 8051 programs for serial data communication and interrupt programming.
CO5	Program 8051 to work with external devices for ADC, DAC, Stepper motor control, DC motor control, Elevator control.
COURSE CODE	18EE53 POWER ELECTRONICS
CO1	To give an overview of applications power electronics, different types of power semiconductor devices, their switching characteristics, power diode characteristics, types, their operation and the effects of power diodes on RL circuits.
CO2	To explain the techniques for design and analysis of single phase diode rectifier circuits. · · ·
CO3	To explain different power transistors, their steady state and switching characteristics and limitations.
CO4	To explain different types of Thyristors, their gate characteristics and gate control requirements.

CO5	To explain the design, analysis techniques, performance parameters and characteristics of controlled rectifiers, DC- DC, DC -AC converters and Voltage controllers.
COURSE CODE	18EE54 SIGNALS AND SYSTEM
CO1	Explain the generation of signals, behavior of system and the basic operations that can be performed on signals and properties of systems.
CO2	Apply convolution in both continuous and discrete domain for the analysis of systems given impulse response of a system.
CO3	Solve the continuous time and discrete time systems by various methods and their representation by block diagram.
CO4	Perform Fourier analysis for continuous and discrete time, linear time invariant systems.
CO5	Apply Z-transform and properties of Z transform for the analysis of discrete time systems.
COURSE CODE	18EE55 ELECTRICAL MACHINE DESIGN (Core Course)
CO1	Identify and list, limitations, modern trends in design, manufacturing of electrical machines and properties of materials used in the electrical machines.
CO2	Derive the output equation of DC machine, discuss selection of specific loadings and magnetic circuits of DC machines, design the field windings of DC machine, and design stator and rotor circuits of a DC machine.
CO3	To explain different power transistors, their steady state and switching characteristics and limitations.
CO4	Develop the output equation of induction motor, discuss selection of specific loadings and magnetic circuits of induction motor, design stator and rotor circuits of a induction motor.
CO5	Formulate the output equation of alternator, design the field windings of Synchronous machine, discuss short circuit ratio and its effects on performance of synchronous machines, design salient pole and non-salient pole alternators for given specifications.
COURSE	18EE56 HIGH VOLTAGE ENGINEERING
CO1	Explain conduction and breakdown phenomenon in gases, liquid dielectrics and breakdown phenomenon in solid dielectrics.
CO2	Summarize generation of high voltages and currents
CO3	Outline measurement techniques for high voltages and currents.
CO4	Summarize overvoltage phenomenon and insulation coordination in electric power systems.
CO5	Explain non-destructive testing of materials and electric apparatus, high-voltage testing of electric apparatus
COURSE	18EEL57 MICROCONTROLLER LABORATORY

CODE	
CO1	Write assembly language programs for data transfer, arithmetic, Boolean and logical instructions and code conversions.
CO2	Write ALP using subroutines for generation of delays, counters, configuration of SFRs for serial communication and timers.
CO3	Perform interfacing of stepper motor and dc motor for controlling the speed, elevator, LCD, external ADC and temperature control.
CO4	Generate different waveforms using DAC interface.
CO5	Work with a small team to carryout experiments using microcontroller concepts and prepare reports that present lab work.
	18EL58 POWER ELECTRONICS LABORATORY
COURSE	TOEEL50 FOWER ELECTRONICS LABORATORY
CODE	
CO1	Obtain static characteristics of semiconductor devices to discuss their performance.
CO2	Trigger the SCR by different methods
CO3	Verify the performance of single phase controlled full wave rectifier and AC voltage controller with R and RL loads.
CO4	Control the speed of a DC motor, universal motor and stepper motors.
CO5	Verify the performance of single phase full bridge inverter connected to resistive load.
	18EE61 CONTROL SYSTEMS (Core Subject)
COURSE	
CODE	
CO1	Analyze and model electrical and mechanical system using analogous.
CO2	Formulate transfer functions using block diagram and signal flow graphs.
CO3	Analyze the stability of control system, ability to determine transient and steady state time response.
CO4	Illustrate the performance of a given system in time and frequency domains, stability analysis using Root locus and Bode plots.
CO5	Discuss stability analysis using Nyquist plots, Design controller and compensator for a given
	specification.
COURSE	18EE62 POWER SYSTEM ANALYSIS - 1 (Core Subject)
CODE CO1	Model the power system components & construct per unit impedance diagram of power system.
CO2	Analyze three phase symmetrical faults on power system.
CO2	
03	Compute unbalanced phasors in terms of sequence components and vice versa, also develop sequence networks.

CO4	Analyze various unsymmetrical faults on power system.
CO5	Examine dynamics of synchronous machine and determine the power system stability
COURSE	18EE63 DIGITAL SIGNAL PROCESSING (Core Subject)
CODE	
CO1	Apply DFT and IDFT to perform linear filtering techniques on given sequences to determine the output.
CO2	Apply fast and efficient algorithms for computing DFT and inverse DFT of a given sequence
CO3	Design and realize infinite impulse response Butterworth and Chebyshev digital filters using impulse invariant and bilinear transformation techniques.
CO4	Develop a digital IIR filter by direct, cascade, parallel, ladder and FIR filter by direct, cascade and linear phase methods of realization.
CO5	Design and realize FIR filters by use of window function and frequency sampling method.
COURSE	18EE647 SENSORS AND TRANSDUCERS (PROFESSIONAL ELECTIVE)
COCKSE	
CODE	
CO1	Use gauges and transducers to measure pressure, direction and distance.
CO2	Discuss the use of light transducers and other devices used for the measurement of electromagnetic radiations.
CO3	Explain the working of different temperature sensing devices.
CO4	Discuss the principles and applications of audio electrical sensors and transducers used for the measurement of sound.
CO5	Discuss the use of sensors for the measurement of mass, volume and environmental quantities.
COURSE	18EE653 RENEWABLE ENERGY RESOURCES (OPEN ELECTIVE)
CODE	
CO1	Discuss causes of energy scarcity and its solution, energy resources and availability of renewable energy.
CO2	Outline energy from sun, energy reaching the Earth's surface and solar thermal energy applications.
CO3	Discuss types of solar collectors, their configurations, solar cell system, its characteristics and their applications.
CO4	Discuss production of energy from biomass, biogas.
CO5	Summarize tidal energy resources, sea wave energy and ocean thermal energy.
COURSE	18EEL66 CONTROL SYSTEM LABORATORY
CODE	
CO1	Utilize software package and discrete components in assessing the time and frequency domain response of a given second order system.
CO2	Design, analyze and simulate Lead, Lag and Lag – Lead compensators for given specifications.
CO3	Determine the performance characteristics of ac and DC servomotors and synchro-transmitter receiver pair used in control systems.

CO4	Simulate the DC position and feedback control system to study the effect of P, PI, PD and PID controller and Lead compensator on the step response of the
	system.
CO5	Develop a script files to plot Root locus, Bode plot and Nyquist plot to study the stability
COURSE	18EEL67 DIGITAL SIGNAL PROCESSING LABORATORY
CODE	
CO1	Explain physical interpretation of sampling theorem in time and frequency domains
CO2	Evaluate the impulse response of a system.
CO3	Perform convolution of given sequences to evaluate the response of a system.
CO4	Compute DFT and IDFT of a given sequence using the basic definition and/or fast methods.
CO5	Provide a solution for a given difference equation.
CO6	Design and implement IIR and FIR filters.
COMPAN	18EEMP68 MINI PROJECT
COURSE	
CODE	
CO1	Present the mini-project and be able to defend it.
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills.
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.
COURSE	18EEMP68 INTERNSHIP
CODE	
CO1	Gain practical experience within industry in which the internship is done.
CO2	Acquire knowledge of the industry in which the internship is done.
CO3	Apply knowledge and skills learnt to classroom work.
CO4	Develop a greater understanding about career options while more clearly defining personal career goals.
CO5	Experience the activities and functions of professionals.
CO6	Develop and refine oral and written communication skills.
L	

CO7	Identify areas for future knowledge and skill development.
CO8	Expand intellectual capacity, credibility, judgment, intuition.
CO9	Acquire the knowledge of administration, marketing, finance and economics
COURSE	18EE71 POWER SYSTEM ANALYSIS - 2(Core Course)
CODE	
CO1	Formulate network matrices and models for solving load flow problems.
CO2	Perform steady state power flow analysis of power systems using numerical iterative techniques.
CO3	Solve issues of economic load dispatch and unit commitment problems.
CO4	Analyze short circuit faults in power system networks using bus impedance matrix.
CO5	Apply Point by Point method and Runge Kutta Method to solve Swing Equation.
COURSE	18EE72 POWER SYSTEM PROTECTION (Core Subject)
CODE	
CO1	Discuss performance of protective relays, components of protection scheme and relay terminology over current protection.
CO2	Explain the working of distance relays and the effects of arc resistance, power swings, line length and source impedance on performance of distance relays.
CO3	Discuss pilot protection, construction, operating principles and performance of differential relays and discuss protection of generators, motors, transformer and Bus Zone Protection.
CO4	Explain the construction and operation of different types of circuit breakers.
CO5	Outline features of fuse, causes of overvoltages and its protection, also modern trends in Power System Protection.
COURSE	18EE731 SOLAR AND WIND ENERGY (Professional Elective)
CODE	
CO1	Discuss the importance of the role of renewable energy, the concept of energy storage and the principles of energy storage devices
CO2	Discuss the concept of solar radiation data and solar PV system fabrication, operation of solar cell, sizing and design of PV system.
CO3	Describe the process of harnessing solar energy and its applications in heating and cooling.
CO4	Explain basic Principles of Wind Energy Conversion, collection of wind data, energy estimation and site selection.
CO5	Discuss the performance of Wind-machines, energy storage, applications of Wind Energy and environmental aspects.
COURSE	18EE742 UTILIZATION OF ELECTRICAL POWER (PROFESSIONAL ELECTIVE)
CODE	

CO1	Discuss different methods of electric heating & welding.
CO2	Discuss the laws of electrolysis, extraction, refining of metals and electro deposition process.
CO3	Discuss the laws of illumination, different types of lamps, lighting schemes and design of lighting systems.
CO4	Analyze systems of electric traction, speed time curves and mechanics of train movement.
CO5	Explain the motors used for electric traction, their control & braking and power supply system used for electric traction.
COURSE	18EE753 DISASTERS MANAGEMENT (OPEN ELECTIVE)
COURSE	
CODE	
CO1	Discuss disaster management plan, cyclones and their hazard potential
CO2	Understand the role of IMD and cyclone prediction and cyclone warning system in India
CO3	Understand the role of different institutions defence and other services in natural disaster management.
CO4	Understand the role of Central Water Commission in river water sharing, Draught, its assessment and draught management plan
CO5	Understand occurrence of earth quake, Tsunamis and thunderstorms.
COURSE	18EEL76 POWER SYSTEM SIMULATION LABORATORY
CODE	
CO1	Develop a program in suitable package to assess the performance of medium and long transmission lines.
CO2	Develop a program in suitable package to obtain the power angle characteristics of salient and non-salient pole alternator.
CO3	Develop a program in suitable package to assess the transient stability under three phase fault at different locations in a of radial power systems.
CO4	Develop programs in suitable package to formulate bus admittance and bus impedance matrices of interconnected power systems.
CO5	Use suitable package to solve power flow problem for simple power systems
CO6	Use suitable package to study unsymmetrical faults at different locations in radial power systems
CO7	Use of suitable package to study optimal generation scheduling problems for thermal power
	plants.
COURSE	18EEL77 RELAY AND HIGH VOLTAGE LABORATORY
COURSE	
CODE	
CO1	Verify the characteristics of over current, over voltage, under voltage and negative
	sequence relay both electromagnetic and static type
CO2	Verify the characteristics of microprocessor based over current, over voltage, under voltage relays and distance relay.
CO3	Show knowledge of protecting generator, motor and feeders.

CO4	Analyze the spark over characteristics for both uniform and non-uniform configurations using High A and DC voltages.
CO5	Measure high AC and DC voltages and breakdown strength of transformer oil.
CO6	Draw electric field and measure the capacitance of different electrode configuration models.
CO7	Show knowledge of generating standard lightning impulse voltage to determine efficiency, energy of impulse generator and 50% probability flashover voltage for air insulation.
COURSE	18EEP78 PROJECT PHASE – I
CODE	
CO1	Demonstrate a sound technical knowledge of their selected project topic.
CO2	Undertake problem identification, formulation and solution.
CO3	Design engineering solutions to complex problems utilizing a systems approach.
CO4	Communicate with engineers and the community at large in written an oral forms.
COURSE	18EE81 POWER SYSTEM OPERATION AND CONTROL(Core Course)
CODE	
CO1	Describe various levels of controls in power systems, architecture and configuration of SCADA.
CO2	Develop and analyze mathematical models of Automatic Load Frequency Control
CO3	Develop mathematical model of Automatic Generation Control in Interconnected Power system
CO4	Discuss the Control of Voltage, Reactive Power and Voltage collapse
CO5	Explain security, contingency analysis, state estimation of power systems
COURSE	18EEP83 PROJECT WORK PHASE -II
CODE	
CO1	Present the project and be able to defend it.
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.
COURSE	18EES84 TECHNICAL SEMINAR

CODE	
CO1	Attain, use and develop knowledge in the field of engineering and other disciplines through independent learning and collaborative study.
CO2	Identify, understand and discuss current, real-time issues.
CO3	Improve oral and written communication skills.
CO4	Explore an appreciation of the self in relation to its larger diverse social and academic contexts.
CO5	Apply principles of ethics and respect in interaction with others.

## PROGRAMME OUTCOME, PROGRAMMESPECIFIC OUTCOMES AND COURSEOUTCOMES OF ALL DEPARTMENTS-2022-23(CRITERIA- 2)

2.6.1 Program outcomes, program specific outcomes and course outcomes

## **Department of Mechanical Engineering**

## Program Outcomes (PO's)

- **PO 1: Engineering Knowledge:** Apply the knowledge of Mathematics, Science, Mechanical Engineering, Engineering fundamentals, to the solution of complex engineering problems.
- **PO 2: Problem analysis:** Identify, formulate, review research literature, and analyze complex Engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and Engineering sciences.
- **PO 3: Design/development of solutions:** Design solutions for complex Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health, societal, and environmental considerations.
- **PO 4: Conduct investigations of complex problems:** Use research based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO 5: Modern tool usage:** Create, select, and apply appropriate techniques, resources, including prediction and modeling to complex Engineering activities with an understanding of the limitations.
- **PO 6: The Engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Engineering practice.
- **PO 7: Environment and sustainability**: Understand the impact of the professional Engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable developments.
- **PO 8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the Engineering practice.
- **PO 9: Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO 10: Communication:** Communicate effectively on complex Engineering activities with the Engineering Community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

- **PO 11: Project management and finance:** Demonstrate knowledge and understanding of the Engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multi-disciplinary environments.
- **PO 12: Life-long Learning:** Recognize the need for identifying contemporary technical challenges and redefining to develop solutions to satisfy given criteria in an optimal manner using creativity in design.

## Program Specific Outcomes (PSO's)

- **PSO 1:** Apply their knowledge in the domain of engineering mechanics, thermal and fluid sciences to solve engineering problems utilizing advanced technology.
- **PSO 2:** Successfully apply the principles of design, analysis and implementation of mechanical systems/processes which have been learned as a part of the curriculum.
- **PSO 3:** Develop and implement new ideas on product design and development with the help of modern CAD/CAM tools, while ensuring best manufacturing practices.

	MECHANICAL ENGINEERING (22 SCHEME)
Course Code	BIDTK158/258 - INNOVATION and DESIGN THINKING
CO1	Appreciate various design process procedure
CO2	Generate and develop design ideas through different technique
CO3	Identify the significance of reverse Engineering to Understand products
CO4	Draw technical drawing for design ideas
Course Code	BCEDK103/203 - Computer Aided Engineering Drawing
CO1	Draw and communicate the objects with definite shape and dimensions
CO2	Recognize and Draw the shape and size of objects through different views
CO3	Develop the lateral surfaces of the object
CO4	Create a Drawing views using CAD software.
CO5	Identify the interdisciplinary engineering components or systems through its graphical representation.
Course Code	BEMEM103/203 - ELEMENTS OF MECHANICAL ENGINEERING
CO1	Explain the role of mechanical engineering in industry and society, fundamentals of steam and non-conventional energy sources
CO2	Describe different conventional and advanced machining processes, IC engines, propulsive devices, air-conditioning, refrigeration.
CO3	Explain different gear drives, gear trains, aspects of future mobility and fundamentals of robotics
CO4	Determine the condition of steam and its energy, performance parameters of IC engines, velocity ratio and power transmitted through power transmission systems.
Course Code	BESCK104D/204D - INTRODUCTION TO MECHANICAL ENGINEERING
CO1	Explain the concepts of Role of Mechanical Engineering and Energy sources.
CO2	Describe the Machine Tool Operations and advanced Manufacturing process.

CO3	Explain the Working Principle of IC engines and EV vehicles.
CO4	Discuss the Properties of Common Engineering Materials and various Metal Joining Processes.
CO5	Explain the Concepts of Mechatronics, Robotics and Automation in IoT
Course Code	BETCK105E/205E -RENEWABLE ENERGY SOURCES
CO1	Describe the environmental aspects of renewable energy resources. In Comparison with various conventional energy systems, their prospects and limitations.
CO2	Describe the use of solar energy and the various components used in the energy production with respect to applications like-heating, cooling, desalination, power generation.
CO3	Understand the conversion principles of wind and tidal energy
CO4	Understand the concept of biomass energy resources and green energy.
CO5	Acquire the basic knowledge of ocean thermal energy conversion and hydrogen energy.
Course Code	BME302 - MANUFACTRUING PROCESS
CO1	Describe the casting process and prepare different types of cast products. Acquire knowledge on Pattern, Core, Gating, Riser system and to use Jolt, Squeeze, and Sand Slinger Moulding machines.
CO2	Compare the Gas fired pit, Resistance, Coreless, Electrical and Cupola Metal Furnaces. Compare the Gravity, Pressure die, Centrifugal, Squeeze, slush and Continuous Metal mold castings.
CO3	Understand the Solidification process and Casting of Non-Ferrous Metals.
CO4	Describe the Metal Arc, TIG, MIG, Submerged and Atomic Hydrogen Welding processes etc. used in manufacturing.
CO5	Describe the methods of different joining processes and thermal effects in joining process
Course Code	BME303 - MATERIAL SCIENCE AND ENGINEERING
CO1	Understand the atomic arrangement in crystalline materials and describe the periodic arrangement of atoms in terms of unit cell parameters.

CO2	Understand the importance of phase diagrams and the phase transformations.
CO3	Explain various heat treatment methods for controlling the microstructure
CO4	Correlate between material properties with component design and identify various kinds of defects.
CO5	Apply the method of materials selection, material data and knowledge sources for computer- aided selection of materials.
Course Code	BME304 - BASIC THERMODYNAMICS
CO1	Explain fundamentals of thermodynamics and evaluate energy interactions across the boundary of thermodynamic systems.
CO2	Apply 1st law of thermodynamics to closed and open systems and determine quantity of energy transfers.
CO3	Evaluate the feasibility of cyclic and non-cyclic processes using 2nd law of thermodynamics: Apply the knowledge of entropy, reversibility and irreversibility to solve numerical problems and Interpret the behaviour of pure substances and its application in practical problems.
CO4	Recognize differences between ideal and real gases and evaluate thermodynamic properties of ideal and real gas mixtures using various relations.
Course Code	BMEL305 - Introduction to Modelling and Design for Manufacturing
CO1	Demonstrate their visualization skills.
CO2	Apply limits and tolerances to assemblies and choose appropriate fits for given assemblies. Make component drawings.
CO3	Produce the assembly drawings using part drawings.
CO4	Engage in lifelong learning using sketching and drawing as communication tool.
Course Code	BME306A - Electric and Hybrid Vehicle Technology
CO1	Understand the architecture and vehicle dynamics of electric and hybrid vehicles
CO2 CO3	Analyze the power management systems for electric and hybrid vehicles  Understand different motor control strategies for electric and hybrid vehicles

CO4	Analyze various components of electric and hybrid vehicles with environment concern.
CO5	Understand the domain related grid interconnections of electric and hybrid vehicle.
Course Code	BME306B - Smart Materials & Systems
CO1	Apply the knowledge for materials characterisation
CO2	Evaluate the materials based on actuation
CO3	Select and justify appropriate materials for specific application
Course Code	BME306C - INTERNET OF THINGS
CO1	Explain the definition and usage of the term "Internet of Things" in different contexts
CO2	Understand the key components that make up an IoT system
CO3	Differentiate between the levels of the IoT stack and be familiar with the key technologies and protocols employed at each layer of the stack
CO4	Apply the knowledge and skills acquired during the course to build and test a complete, working IoT system involving prototyping, programming and data analysis
CO5	Understand where the IoT concept fits within the broader ICT industry and possible future
Course Code	BME306D - WASTE HANDLING & MANAGEMENT
CO1	Identify & segregate the waste
CO2	Formulate the appropriate waste segregation, collection & disposal system
CO3	Generate a report on waste management challenges
CO4	Select a remedial measure for environmental & living being protection
CO5	Exercise the constitution laws as a citizen
Course Code	BME358A - ADVANCED PYTHON PROGRAMMING
CO1	Develop algorithmic solutions to simple computational problems

Develop and execute simple Python programs
Use functions to decompose a Python program
Process compound data using Python data structures
Utilize Python packages in developing software applications
BME358B - INTRODUCTION TO VIRTUAL REALITY
Describe how VR systems work and list the applications of VR.
Demonstrate the design and implementation of the hardware that enables VR systems to be built.
Understand the system of human vision and its implication on perception and rendering.
Explain the concepts of motion and tracking in VR systems.
Describe the importance of interaction and audio in VR systems.
BME358C - SPREADSHEET FOR ENGINEERS
DIVIESSOC - SI READSHEET FOR ENGINEERS
Create different plots and charts
Create different plots and charts Compute different functions, conditional functions and make regression analysis
•
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations  BME358D - Tools in Scientific Computing
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations  BME358D - Tools in Scientific Computing
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations  BME358D - Tools in Scientific Computing  Understand the fundamentals of programming in scientific computations.
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations  BME358D - Tools in Scientific Computing  Understand the fundamentals of programming in scientific computations.  Develop programming for curve fitting and solving both linear and nonlinear equations.
Compute different functions, conditional functions and make regression analysis  Carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis  Carryout matrix operations  BME358D - Tools in Scientific Computing  Understand the fundamentals of programming in scientific computations.  Develop programming for curve fitting and solving both linear and nonlinear equations.  Apply the concept of approximate methods and recognize their significance in computing.

CO2	Analyze the gas power cycles to evaluate the overall efficiency of gas turbine plant.
CO3	Apply thermodynamic concepts to analyze the performance of vapour power cycles.
CO4	Analyze the vapour compression and vapour absorption systems to improve refrigeration.
CO5	Determination of various parameters of air compressors and steam nozzles.
Course Code	BME402 - MACHINING SCIENCE & METROLOGY
CO1	Analyze various cutting parameters in metal cutting.
CO2	Understand the construction of machines & machine tools and compute the machining time of various operations.
CO3	Understand the concept of Temperature in Metal Cutting, forms of wear in metal cutting and Cutting fluids
CO4	Understand the objectives of metrology, methods of measurement, standards of measurement & various measurement parameters. Explain tolerance, limits of size, fits, geometric and position tolerances, gauges and their design
CO5	Understand the working principle of different types of comparators, gauges, angular Measurements
CO5 Course Code	Understand the working principle of different types of comparators, gauges, angular Measurements  BME403 - FLUID MECHANICS
Course	
Course Code	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.  Understand and apply the principles of pressure, buoyancy and floatation
Course Code CO1	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.
Course Code CO1 CO2	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.  Understand and apply the principles of pressure, buoyancy and floatation
Course Code CO1 CO2 CO3	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.  Understand and apply the principles of pressure, buoyancy and floatation  Apply the knowledge of fluid dynamics while addressing problems of mechanical and chemical engineering.  Understand the concept of boundary layer in fluid flow and apply dimensional analysis to form dimensionless numbers
Course Code CO1 CO2 CO3	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.  Understand and apply the principles of pressure, buoyancy and floatation  Apply the knowledge of fluid dynamics while addressing problems of mechanical and chemical engineering.  Understand the concept of boundary layer in fluid flow and apply dimensional analysis to form dimensionless numbers in terms of input output variables.
Course Code CO1 CO2 CO3 CO4 CO5	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.  Understand and apply the principles of pressure, buoyancy and floatation  Apply the knowledge of fluid dynamics while addressing problems of mechanical and chemical engineering.  Understand the concept of boundary layer in fluid flow and apply dimensional analysis to form dimensionless numbers in terms of input output variables.  Understand the basic concept of compressible flow and CFD
Course Code CO1 CO2 CO3 CO4 CO5 CO6 Course	BME403 - FLUID MECHANICS  Identify and calculate the key fluid properties used in the analysis of fluid behavior.  Understand and apply the principles of pressure, buoyancy and floatation  Apply the knowledge of fluid dynamics while addressing problems of mechanical and chemical engineering.  Understand the concept of boundary layer in fluid flow and apply dimensional analysis to form dimensionless numbers in terms of input output variables.  Understand the basic concept of compressible flow and CFD  Conduct basic experiments of fluid mechanics and understand the experimental uncertainties.

CO3	To demonstrate measurements using Optical Projector/Tool maker microscope, Optical flats.
CO4	To measure cutting tool forces using Lathe/Drill tool dynamometer.
CO5	To measure Screw thread parameters using 2-Wire or 3-Wire method, gear tooth profile using gear tooth vernier/Gear tooth micrometer.
CO6	To measure surface roughness using Tally Surf/ Mechanical Comparator.
Course Code	BME405A - NON TRADITIONAL MACHINING
CO1	Describe non-traditional machining process and compare with Traditional machining process. Recognize the need for Non-traditional machining process.
CO2	Describe the constructional features, performance parameters, process characteristics, applications, advantages, and limitations of USM, AJM and WJM.
CO3	Characterize the need of Chemical and electro-chemical machining process along with the constructional features, process parameters, process characteristics, applications, advantages, and limitations.
CO4	Illustrate the constructional feature of the equipment, process parameters, process characteristics, applications, advantages and limitations EDM & PAM
Course Code	BME405B - ENVIRONMENTAL STUDIES
CO1	Understand the basic concepts of environmental studies and natural resources.
CO2	Explain about the various eco-systems of nature.
CO3	Discuss different types of environmental pollutions and their control measures.
CO4	Explain the acquired knowledge about the various social aspects related to the environment.
Course Code	BME405C - MEMS-Micro Electro Mechanical Systems
CO1	Understand the working of MEMS technology & Miniaturization.
CO2	Explain the Process of Micro fabrication Techniques.
CO3	Explain the principles of system modelling.
CO4	Understand the working principles of Mechanical sensors and actuators.

Course Code	BME405D - ROBOTICS AND AUTOMATION
CO1	Explain various types of Robotics, automation, robotics motion, sensors and control, machine vision, robotic programming and roles of robots in industry.
CO2	Understand the working methodology of robotics and automation, motion and control, machine vision and programming, application of robots in industry.
CO3	Write the program for robot for various applications.
CO4	Describe the different material handling and Identification technologies used in automation
Course Code	BME456A - INTRODUCTION TO AI & ML
CO1	Understand the implementation procedures for the machine learning algorithms
CO2	Design Java/Python programs for various Learning algorithms.
CO3	Apply appropriate data sets to the Machine Learning algorithms
CO4	Identify and apply Machine Learning algorithms to solve real world problems
CO5	Examine working of PDF and word file formats
Course	BME456B - Digital Marketing
Code Course	
Code	BME456C - INTRODUCTION TO DATA ANALYTICS
CO1	Analyze data using tools and represent for visualization
CO2	Implement various statistical methods.
CO3	Understand and use decision tree and random forest algorithm
CO4	Understand and Implement T test and Anova
Course	BME456D - Introduction to programming in C++
Code	
CO1	Apply Object Oriented Programming concepts in C++ Write a C++ program by applying knowledge of mathematics, science, and engineering.
CO2	Function on multi-disciplinary teams.
CO3	Identify, formulate, and solve engineering problems.
CO7	racinary, formulate, and solve engineering problems.

	M.TECH - THERMAL POWER ENGINEERING (22 SCHEME)	
Course Code	22MTP11- Applied Mathematics	
CO1	Acquire the idea of significant figures, types of errors during numerical computation	
CO2	Develop the mathematical models of thermal system using ODE's and PDE's.	
CO3	Learn the deterministic approach for statistical problems by using probability distributions	
CO4	Classify and analyze mathematical tools applied to thermal engineering study cases.	
Course Code	22MTP12- Theory and Design of Modern IC Engine	
CO1	To explore the knowledge of performance parameters and its characteristics, variables effect the performance of engine and methods of improving engine performance of internal combustion engine.	
CO2	Analyze combustion and apply remedial measures to avoid abnormal combustion in SI and CI Engine	
CO3	Analyze different electronic fuel injection system, supercharging and its effect on performance of SI and CI engine.	
CO4	Apply various emission control system and modification to take corrective actions to reduce pollution	
Course Code	22MTP13- Advanced Fluid Mechanics	
CO1	Illustrate the basic concepts fluid flow and their governing equations	
CO2	Analyse the laminar and turbulent flow problems.	
CO3	Demonstrate the concept of boundary layer equations and drag and lift force	
CO4	Distinguish normal and oblique shocks and their governing Equations.	
CO5	Explain the Propagation of sound waves and Comparison of isentropic and adiabatic processes in fluid mechanics.	
Course Code	22MTP14- Advanced Thermodynamics and Combustion	
CO1	Illustrate the basic concepts on First & Second Law Analysis, entropy, and exergy analysis in thermodynamic systems.	

CO2	Analyse the Thermodynamic property relations and its application to gas mixtures, phase change processes.
CO3	Demonstrate the Combustion fundamentals involving premixed and nonpremixed flames for laminar and turbulent combustion.
CO4	Explain the fundamental of properties of gas mixtures, chemical reactions, and chemistry of combustion.
CO5	Applications of Combustion phenomena in practical occurring applications such IC and GT engines.
Course Code	22MTP15- Finite Element Method in Heat Transfer
CO1	Recall Governing Equations for Heat Conduction for solving 1-D thermal problems using Approximate methods, Rayleigh – Ritz Methods and Galerkin's methods.
CO2	Formulate the element characteristic for linear and Quadratic matrices and vectors for 1-D and 2-D problems.
CO3	Explain the Formulation of Heat Conduction Equations for 1D, 3-D, Fin, and Nonlinear Heat conduction for developing mathematical models
CO4	Demonstrate the Application of numerical methods on heat transfer problems, Convective Heat Transfer and Fluid Mechanics Problems.
Course Code	22RMI16- Research Methodology and IPR
	22RMI16- Research Methodology and IPR  Discuss research methodology and the technique of defining a research problem
Code	
Code CO1	Discuss research methodology and the technique of defining a research problem  Explain the functions of the literature review in research, carrying out a literature search, developing theoretical
Code CO1 CO2	Discuss research methodology and the technique of defining a research problem  Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review.  Explain various research designs, sampling designs, measurement and scaling techniques and different methods
Code CO1 CO2 CO3	Discuss research methodology and the technique of defining a research problem  Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review.  Explain various research designs, sampling designs, measurement and scaling techniques and different methods of data collections.
Code CO1 CO2 CO3 CO4	Discuss research methodology and the technique of defining a research problem  Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review.  Explain various research designs, sampling designs, measurement and scaling techniques and different methods of data collections.  Explain several parametric tests of hypotheses, Chi-square test, art of interpretation and writing research reports  Discuss various forms of the intellectual property, its relevance and business impact in the changing global
Code CO1 CO2 CO3 CO4 CO5 Course	Discuss research methodology and the technique of defining a research problem  Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review.  Explain various research designs, sampling designs, measurement and scaling techniques and different methods of data collections.  Explain several parametric tests of hypotheses, Chi-square test, art of interpretation and writing research reports  Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading International Instruments concerning IPR

CO3	Develop knowledge in simulation of lamina and turbulent flow using ANSYS Workbench.
CO4	Develop MATLAB programme for simulation of IC engine performances.
Course Code	22MTP21- Advanced Power Plant Cycles
CO1	Describe the power generation scenario, the layout components of thermal power plant and analyze the improved Rankin cycle, Cogeneration cycle.
CO2	Analyze the steam condensers, recognize the environmental impacts of thermal power plant and method to control the same.
CO3	Recognize the layout, component details of hydroelectric power plant and nuclear power plant
CO4	Describe the different power plant electrical instruments and basic principles of economics of power generation
Course Code	22MTP22- Advanced Heat Transfer
CO1	Ability to understand modes of heat transfer with energy equation and develop models for physical problems and analyze steady state, fins, and transient heat conduction problems of real-life thermal systems
CO2	Identify and explain the concepts of Boundary layers using Laminar and turbulent conditions.
CO3	Understand and recognize the free and forced convection problems in real time applications.
CO4	Apply different methods for solution of radiative heat transfer problems in nonparticipating and participating medium and applications of boiling and condensation in industry
CO5	Demonstrate the importance of heat exchanger and its applications in industry.
Course Code	22MTP231- Steam and Gas Turbines
CO1	Describe the working principles of Gas and steam turbine nozzles and diffusers
CO2	Designate the working principles of impulse and reaction turbines using velocity triangles
CO3	Use the concepts of State Point Locus Reheat Factor and Identify the various losses associated with the turbines.
CO4	Illustrate the concepts of axial flow and centrifugal compressors and its application in gas turbine.
CO5	Explain the concepts of open and closed cycle gas turbine and its application in jet propulsion.

Course Code	22MTP232- Renewable Energy Technology
CO1	Describe measurement of direct, diffuse, and global solar radiations falling on horizontal and inclined surfaces, Basic earth sun angles, Beam and diffuse radiations, Radiation on titled surfaces.
CO2	Analyze the performance by conducting research on flat plate collector, air heater and concentrating type collector. Understand test procedures and apply these while testing different types of collectors.
CO3	Demonstrate and Design various types of thermal energy storage systems. Analyze payback period and annual solar savings due to replacement of conventional systems
CO4	Demonstrate the importance of solar energy effectively to increase awareness of it in society.
CO5	Describe measurement of direct, diffuse, and global solar radiations falling on horizontal and inclined surfaces, Basic earth sun angles, Beam and diffuse radiations, Radiation on titled surfaces.
Course Code	22MTP233- Design and Optimization of Thermal Energy Systems
CO1	Formulation of design problems related to thermal Systems.
CO2	Apply methods of optimization to solve a linear, non-linear programming problem by various methods.
CO3	Optimize engineering problem of nonlinear programming with/without constraints, by using this technique
CO4	Use of dynamic programming problem in controlling in industrial managements.
CO5	Simulate Thermal engineering system problem. Understand integer programming and stochastic programming to evaluate advanced optimization techniques.
Course Code	22MTP234- Cryogenics
CO1	Understand the working principles and applications of different types of gas liquefaction and refrigeration systems.
CO2	Understanding the governing laws and principles of gas separation
CO3	Illustrate Ideal separation, properties of mixtures, Rectifiers column, separation of air, purification.
CO4	Understanding the importance of cryogenics insulations and Safety in Cryogenics.
CO5	Study and describe Insulation and storage systems in cryogenic engineering
Course Code	22MTP235- Nuclear Engineering in Power Generation

CO1	Understand the basic physics of nuclear reactions
CO2	Basic concepts of nuclear fuel manufacturing and spent fuel handling
CO3	Classification of nuclear reactors
CO4	Understand working principle of thermal reactor
CO5	Analyse the thermal hydraulics of nuclear reactors
Course Code	22MTP241 - Refrigeration and Air Conditioning
CO1	Understand concepts of refrigeration and air-conditioning process and systems.
CO2	Employ the theoretical principles to simple, complex vapour compression and vapour absorption refrigeration systems.
CO3	Understand conventional and alternate refrigerants and their impact on environment.
CO4	Apply the heat load calculation to design the air-conditioning systems.
CO5	Describe the concepts to design air distribution systems.
Course Code	22MTP242 - Hydrogen and Fuel Cell Technologies
CO1	Apply know-how of thermodynamics, electrochemistry, heat transfer, and fluid mechanics principles to design and analysis of this emerging technology.
CO1	
	and analysis of this emerging technology.  Have thorough understanding of performance behaviour, operational issues and challenges for all major types
CO2	and analysis of this emerging technology.  Have thorough understanding of performance behaviour, operational issues and challenges for all major types of fuel cells.  Identify, formulate, and solve problems related to fuel cell technology keeping in mind economic viability.  Use the techniques, skills, and modern engineering tools necessary for design and analysis of innovative fuel cell systems.
CO2	and analysis of this emerging technology.  Have thorough understanding of performance behaviour, operational issues and challenges for all major types of fuel cells.  Identify, formulate, and solve problems related to fuel cell technology keeping in mind economic viability.  Use the techniques, skills, and modern engineering tools necessary for design and analysis of innovative fuel cell systems.  Understand the impact of this technology in a global and societal context. Develop enough skills to design systems or components of fuel cells.
CO2 CO3 CO4	and analysis of this emerging technology.  Have thorough understanding of performance behaviour, operational issues and challenges for all major types of fuel cells.  Identify, formulate, and solve problems related to fuel cell technology keeping in mind economic viability.  Use the techniques, skills, and modern engineering tools necessary for design and analysis of innovative fuel cell systems.  Understand the impact of this technology in a global and societal context. Develop enough skills to design

CO2	Apply knowledge of features and capabilities of chemical and non-chemical rocket propulsion systems.
CO3	Apply the concepts to ramjet ant jet propulsion system.
CO4	Calculate the specific impulse and mass flow for a rocket engine with the fluid considered as an ideal gas with constant specific heats.
CO5	Estimate the specific impulse and mass flow for a rocket engine accounting for chemical reaction and non-constant specific heats.
Course	22MTP244 - Computational Methods in Heat Transfer and Fluid Flow
Code	
CO1	To derive the stepwise procedure to completely solve a fluid dynamics problem using computational methods.
CO2	To explain the governing equations and understand the behaviour of the equations.
CO3	To determine the consistency, stability, and convergence of various discretization schemes for parabolic, elliptic and hyperbolic partial differential equations.
CO4	To verify variations of SIMPLE schemes for incompressible flows and Variations of Flux Splitting algorithms for compressible flows.
CO5	To identify various methods of grid generation techniques and application of finite difference and finite volume methods to various thermal problems.
Course Code	22MTP245 - Energy Conservation and Management
CO1	Understand the various energy conservation and improvement techniques
CO2	Illustrate the Energy scenario.
CO3	Employ the principles of thermal engineering and energy management to improve the Performance of thermal systems.
CO4	Assess energy projects based on economic and financial criteria.
CO5	Describe methods of energy production for improved utilization.
Course	22MTP225 - MINI PROJECT WITH SEMINAR
Code	
Code CO1	Present the mini-project and be able to defend it

	apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.
Course Code	22MTPL26 - CFD and Numerical Lab
CO1	Develop knowledge in coding to simulate the flow in a Lid driven cavity
CO2	Develop skills in coding for natural convection heat transfer in enclosures.
CO3	Develop skills in making geometry and meshing for various configurations using ANSYS Workbench.
CO4	Develop knowledge in CFD simulation of Convective heat transfer and phase change problems using ANSYS Workbench.
CO5	Develop knowledge in simulation of turbulent flow using ANSYS Workbench.
Course Code	22MTP31 - Design of Heat Transfer Equipment's
CO1	Understand the physics and the mathematical treatment of typical heat exchangers and employ LMTD and Effectiveness methods in the design of heat exchangers
CO2	Design, analyze and examine the performance of double-pipe counter flow (hair-pin) and shell and tube heat exchanger
CO3	Understand the fundamental, physical and mathematical aspects of and condensation.
CO4	Demonstrate the importance of Vaporizers, Evaporators and Reboilers as heat exchangers
CO5	Classify cooling towers and explain their technical features.
Course Code	22MTP32 - Alternative Fuels for IC Engines
CO1	Explain about the availability and usage of conventional fuels for IC engines
CO2	Identify possible alternative fuels for IC engines.

CO3	Demonstrate the use of alternative fuels for different types of engines
CO4	Assess the environmental impact standards and procedures of using alternate fuels.
CO5	Describe and analyze Need for alternative fuels such as Ethanol, Methanol, LPG, CNG, Hydrogen and their manufacturing procedure.
Course Code	22MTP322 - Thermal Power Station
CO1	Describe the working principle, operation, and maintenance of a various steam generators.
CO2	Identify the arrangements of different flow systems their operation and maintenance.
CO3	Illustrate the impact of thermal power plant exhaust on environment
CO4	Estimate the working expenses, current scenario and trends in power generation.
CO5	Asses the performance and suitability of thermal power plant.
Course Code	22MTP323 - Convective Heat and Mass Transfer
CO1	Understand the fundamental and advanced principles of forced and natural convection heat transfer processes.
CO2	Formulate and solve convective heat transfer problems
CO3	Relate the principles of convective heat transfer to estimate the heat dissipation from devices.
CO4	Estimate the energy requirements for operating a flow system with heat transfer.
CO5	Relate to the current challenges in the field of convective heat transfer.
Course Code	22MTP324 - Gas Dynamics
CO1	Apply continuity, momentum, and energy equations to compressible flows.
CO2	Analyze isentropic and non-isentropic flows across normal shock waves.
CO3	Solve compressible flow problems involving heat transfer and friction.
CO4	Apply conservation laws to fluid flow problems and gain knowledge about main properties which are used for analyzing or modelling of compressible flow

CO5	Solve flow problems with heat addition and with friction and Simulation of One-dimensional flow in Shock tube.
Course Code	22MTP325 - Measurement Systems in Thermal Engineering
CO1	Understand the concepts of errors in measurements, statistical analysis of data, regression analysis, correlation, and estimation of uncertainty.
CO2	Describe the working principles in the measurement of field and derived quantities.
CO3	Examine sensing requirements for measurement of thermo-physical properties, radiation properties of surfaces, and vibration
CO4	Understand conceptual development of zero, first and second order systems
CO5	Interpret International Standards of measurements (ITS-90) and identify internationally accepted measuring standards for measurands.
Course Code	22MTP331 - Theory of IC Engines
CO1	Understand the concepts of errors in measurements, statistical analysis of data, regression analysis, correlation, and estimation of uncertainty.
CO2	Describe the working principles in the measurement of field and derived quantities.
CO3	Examine sensing requirements for measurement of thermo-physical properties, radiation properties of surfaces, and vibration.
CO4	Understand conceptual development of zero, first and second order systems
CO5	Interpret International Standards of measurements (ITS-90) and identify internationally accepted measuring standards for measurands.
Course Code	22MTP332 - Environmental Engineering and Pollution Control
CO1	Grasp the fundamentals of air pollution and its associated environmental impacts.
CO2	Earn to describe the key concepts of air quality management.
CO3	Do sampling and characterization of solid waste and analysis of hazardous waste constituents including QA/QC issues
CO4	Apply steps in solid waste management-waste reduction at source, collection techniques, materials and resource recovery/recycling, transport, optimization of solid waste transport, treatment and disposal techniques.

CO5	Schemes, incentives, policies on industrial waste management and Overview of product design for waste minimization.
Course Code	22MTP333 - Safety in Engineering Industry
CO1	Describe the theories of accident causation and preventive measures of industrial accidents.
CO2	Explain about personal protective equipment, its selection, safety performance & indicators and importance of housekeeping.
CO3	Explain different issues in construction industries.
CO4	Describe various hazards associated with different machines and mechanical material handling.
CO5	Utilise different hazard identification tools in different industries with the knowledge of different types of chemical hazards.
Course	22MTP334 - Biomass Energy Conversion Techniques
Code	
CO1	Develop knowledge in properties of biomass and energy conversion process
CO2	Compare the characteristics of products obtained from biomass pyrolysis.
CO3	Understand the basics of biomass gasification and gasifier design.
CO4	Assess the potential of electrical power production from biomass.
Course Code	22MTP335 - Non-Conventional Energy Sources
CO1	Demonstrate the generation of electricity from various Non-Conventional sources of energy, have a working knowledge on types of fuel cells.
CO2	Estimate the solar energy, Utilization of it, Principles involved in solar energy collection and conversion of it to electricity generation.
CO3	Explore the concepts involved in wind energy conversion system by studying its components, types and performance.
CO4	Illustrate ocean energy and explain the operational methods of their utilization.
CO5	Acquire the knowledge on Geothermal energy.

Course Code	22MTP34 - PROJECT WORK PHASE – 1
CO1	Demonstrate a sound technical knowledge of their selected project topic.
CO2	Undertake problem identification, formulation, and solution.
CO3	Design engineering solutions to complex problems utilising a systems approach
CO4	Communicate with engineers and the community at large in written an oral forms.
CO5	Demonstrate the knowledge, skills and attitudes of a professional engineer.
Course Code	22MTPI36 - INTERNSHIP
CO1	Gain practical experience within industry in which the internship is done.
CO2	Acquire knowledge of the industry in which the internship is done.
CO3	Apply knowledge and skills learned to classroom work.
CO4	Develop a greater understanding about career options while more clearly defining personal career goals.
CO5	Experience the activities and functions of professionals
CO6	Develop and refine oral and written communication skills
CO7	Identify areas for future knowledge and skill development.
CO8	Expand intellectual capacity, credibility, judgment, intuition.
CO9	Acquire the knowledge of administration, marketing, finance and economics.
Course Code	22MTP41 - PROJECT WORK PHASE -2
CO1	To support independent learning
CO2	To guide to select and utilize adequate information from varied resources maintaining ethics.
CO3	To guide to organize the work in the appropriate manner and present information (acknowledging the sources) clearly
CO4	To develop interactive, communication, organisation, time management, and presentation skills.

CO5	To impart flexibility and adaptability.
CO6	To inspire independent and team working.
CO7	To expand intellectual capacity, credibility, judgement, intuition.
CO8	To adhere to punctuality, setting and meeting deadlines.
CO9	To instill responsibilities to oneself and others.
CO10	To train students to present the topic of project work in a seminar without any fear, face audience confidently, enhance communication skill, involve in group discussion to present and exchange ideas.

	MECHANICAL ENGINEERING ( 21 SCHEME)	
Course Code	21EVN15/25 - Engineering Visualisation	
CO1	Understand and visualize the objects with definite shape and dimensions	
CO2	Analyze the shape and size of objects through different views	
CO3	Develop the lateral surfaces of the object	
CO4	Create a 3D view using CAD software	
CO5	Identify the interdisciplinary engineering components or systems through its graphical representation.	
Course Code	21ME15/25-ELEMENTS OF MECHANICAL ENGINEERING	
CO1	Understand basic concepts of mechanical engineering in the fields of energy and its utilization, materials technology, manufacturing techniques, and transmission	
CO2	Understand the application of energy sources in Power generation and utilization, Engineering materials, manufacturing, and machining techniques leading to the latest	
CO3	Apply the skills in developing simple mechanical elements and processes	
Course Code	21IDT19/29 - INNOVATION and DESIGN THINKING	
CO1	Appreciate various design process procedure	
CO2	Generate and develop design ideas through different technique	
CO3	Identify the significance of reverse Engineering to Understand products	
CO4	Draw technical drawing for design ideas	
Course Code	21MAT 31 TRANSFORM CALCULUS, FOURIER SERIES AND NUMERICAL TECHNIQUES	
CO1	To solve ordinary differential equations using Laplace transform.	
CO2	Demonstrate the Fourier series To study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory.	
CO3	To use Fourier transforms To analyze problems involving continuous-time signals and To apply Z-Transform techniques To solve difference equations	
CO4	To solve mathematical models represented by initial or boundary value problems involving partial differential equations	

CO5	Determine the extremals of functionals using calculus of variations and solve problems arising in dynamics of rigid bodies and vibrational analysis.
Course Code	21ME32 - METAL CASTING FORMING & JOINING PROCESS (IPCC)
CO1	Select appropriate primary manufacturing process and related parameters for obtaining initial shape and size of components.
CO2	Design and develop adequate Tooling linked with casting, welding and forming operations.
CO3	Appreciate the effect of process parameters on quality of manufactured components
CO4	Demonstrate various skills in preparation of molding sand for conducting tensile, shear and compression tests using Universal sand testing machine.
CO5	Demonstrate skills in preparation of forging models involving upsetting, drawing and bending operations.
CO6	Demonstrate skills in preparation of Welding models.
Course	21ME33 - MATERIAL SCIENCE AND ENGINEERING (IPCC)
Code	· · ·
CO1	Understand the aTomic arrangement in crystalline materials and describe the periodic arrangement of aToms in terms of
CO2	Understand the importance of phase diagrams and the phase transformations.
CO3	Know various heat treatment methods for controlling the microstructure
CO4	Correlate between material properties with component design and identify various kinds of defects.
CO5	Apply the method of materials selection, material data and knowledge sources for computer-aided selection of materials.
Course Code	21ME34 - THERMODYNAMICS
CO1	Describe the fundamental concepts and principles of engineering thermodynamics.
CO2	Apply the governing laws of thermodynamics for different engineering applications.
CO3	Analyse the various thermodynamic processes, cycles and results.
CO4	Interpret and relate the impact of thermal engineering practices To real life problems.
Course Code	21MEL35 - MACHINE DRAWING AND GD & T
CO1	Interpret the Machining and surface finish symbols on the component drawings.
CO2	Apply limits and Tolerances To assemblies and choose appropriate fits for given assemblies.
CO3	Illustrate various machine components through drawings
CO4	Create assembly drawings as per the conventions.

Course	24ME294 INTRODUCTION To BYTHON
Code	21ME381 - INTRODUCTION To PYTHON
CO1	Demonstrate proficiency in handling of loops and creation of functions.
CO2	Identify the methods To create and manipulate lists, tuples and dictionaries.
CO3	Discover the commonly used operations involving regular expressions and file system.
CO4	Examine working of PDF and word file formats
Course Code	21ME382 - INTRODUCTION To VIRTUAL REALITY
CO1	Describe how VR systems work and list the applications of VR.
CO2	Understand the design and implementation of the hardware that enables VR systems To be built.
CO3	Understand the system of human vision and its implication on perception and rendering.
CO4	Explain the concepts of motion and tracking in VR systems.
CO5	Describe the importance of interaction and audio in VR systems.
Course	21ME383 - DIGITAL SOCIETY
Code	
CO1	Identify the ways in which digital media shape identity
CO2	Utilize new opportunities for meaningful data collection from and using sophisticated forms of artificial intelligence
CO3	Identify knowledge and truth amongst the abundance of information
Course	21MATME41 - COMPLEX ANALYSIS, PROBABILITY AND LINEAR PROGRAMMING
Code	
CO1	Use the concepts of an analytic function and complex potentials To solve the problems arising in fluid flow.
CO2	Utilize conformal transformation and complex integral arising in aerofoil theory, fluid flow visualization and image
CO3	Apply discrete and continuous probability distributions in analyzing the probability models arising in the engineering
CO4	Analyze and solve linear programming models of real-life situations and solve LPP by the simplex method
CO5	Learn techniques To solve Transportation and Assignment problems.
Course	21ME42 - MACHINING SCIENCE AND JIGS & FIXTURES (IPCC)
Code	
CO1	Demonstrate the Conventional CNC machines and advanced manufacturing process operations
CO2	Determine Tool life, cutting force, and economy of the machining process.
CO3	Analyze the influence of various parameters on machine Tools' performance.
CO4	Select the appropriate machine Tools and process, the Jigs, and fixtures for various applications.
Course	21ME43 - FLUID MECHANICS (IPCC)
Code	
CO1	Understand the basic principles of fluid mechanics and fluid kinematics

CO2	Acquire the basic knowledge of fluid dynamics and flow measuring instruments
CO3	Understand the nature of flow and flow over bodies and the dimensionless analysis
CO4	Acquire the compressible flow fundamental and basics of CFD packages and the need for CFD analysis.
CO5	Conduct basic experiments of fluid mechanics and understand the experimental uncertainties.
Course	21ME44 - MECHANICS OF MATERIALS
Code	
CO1	Understand simple, compound, thermal stresses and strains their relations and strain energy.
CO2	Analyse structural members for stresses, strains and deformations.
CO3	Analyse the structural members subjected To bending and shear loads.
CO4	Analyse shafts subjected To twisting loads.
CO5	Analyse the short columns for stability.
Course	21MEL46 - MECHANICAL MEASUREMENTS AND METROLOGY LABORATORY
Code	
CO1	Understand Calibration of pressure gauge, thermocouple, LVDT, load cell, micrometer.
CO2	Apply concepts of Measurement of angle
CO3	Demonstrate measurements using Optical ProjecTor/Tool maker microscope, Optical flats.
CO4	Analyse Screw thread parameters using 2-Wire or 3-Wire method, gear Tooth profile using gear Tooth Vernier/Gear
CO5	Understand the concepts of measurement of surface roughness.
CO6	Demonstrate the use of Coordinate Measuring Machine (CMM) / Laser Scanner
Course	21MT481 - SPREAD SHEETS FOR ENGINEERS
Code	
CO1	To create different plots and charts
CO2	To compute different functions, conditional functions and make regression analysis
CO3	To carryout iterative solutions for roots, multiple roots, optimization and non-linear regression analysis
CO4	To carryout matrix operations
CO5	To Understand VBA and UDF
CO6	To understand VBA subroutines and Macros
CO7	To carryout numerical integration and solving differential equations using different methods
α	21ME482 - INTRODUCTION To AI AND ML
Course	21WE402 - INTRODUCTION TO AT AND WIL
Code	
Code CO1	Understand the basic principles and goals of AI tasks.
Code CO1 CO2	Understand the basic principles and goals of AI tasks.  Outline the role of AI in different real-time applications.
Code CO1	Understand the basic principles and goals of AI tasks.

CO5	Survey the future development of AI.
Course	21ME483 - Introduction To Augmented Reality
Code	211v1E465 - Introduction to Augmented Reality
CO1	Describe how AR systems work and list the applications of AR.
CO2	Understand and analyse the hardware requirement of AR.
CO3	Use computer vision concepts for AR and describe AR techniques
CO4	Analyse and understand the working of various state of the art AR devices
CO5	Acquire knowledge of mixed reality
Course	21ME51 - THEORY OF MACHINES
Code	
CO1	Knowledge of mechanisms and their motion and the inversions of mechanisms
CO2	Analyse the velocity, acceleration of links and joints of mechanisms
CO3	Analyse the mechanisms for static and dynamic equilibrium.
CO4	Carry out the balancing of rotating and reciprocating masses
CO5	Analyse different types of governors used in real life situation.
CO6	Analyze the free and forced vibration phenomenon.
Course	21ME52 - THERMO-FLUIDS ENGINEERING (IPCC)
Code	
CO1	Apply the concepts of testing of I. C. Engines and evaluate their performance, and evaluate the performance of
CO2	Apply and analyse the concepts related To Refrigeration and Air conditioning, and get conversant with Psychrometric
	Explain the construction, classification and working principle of the Turbo machines and apply of Euler's turbine
CO3	equation To evaluate the energy transfer and other related parameters. Compare and evaluate the performance of positive
	displacement pumps.
CO4	Classify, Explain and analyse the various types of hydraulic turbines and centrifugal pumps.
CO5	Classify, Explain and analyse various types of steam turbines and centrifugal compressor.
Course	21ME53 - FINITE ELEMENT ANALYSIS
	21ME00 THATE ELEMENT ANALTOIG
CO1	Identify the application and characteristics of FEA elements such as bars, beams, plane and isoparametric elements.
CO2	Develop element characteristic equation and generation of global equation.
CO3	Formulate and solve Axi-symmetric and heat transfer problems.
CO4	Apply suitable boundary conditions To a global equation for bars, trusses, beams, circular shafts, heat transfer, fluid
	flow, axi-symmetric and dynamic problems.
CO5 Course Code CO1 CO2	Classify, Explain and analyse the various types of hydraulic turbines and centrifugal pumps.  Classify, Explain and analyse various types of steam turbines and centrifugal compressor.  21ME53 - FINITE ELEMENT ANALYSIS  Identify the application and characteristics of FEA elements such as bars, beams, plane and isoparametric elements.  Develop element characteristic equation and generation of global equation.  Formulate and solve Axi-symmetric and heat transfer problems.

Course Code	21ME54 - MODERN MOBILITY & AUTOMOTIVE MECHANICS
CO1	Understand the working of different systems employed in auTomobile
CO2	Analyse the limitation of present day auTomobiles
CO3	Evaluate the energy sources suitability
CO4	Apply the knowledge for selection of auTomobiles based on their suitability
Course Code	21MEL55 - DESIGN LAB
CO1	Compute the natural frequency of the free and forced vibration of single degree freedom systems, critical speed of shafts.
CO2	Carry out balancing of rotating masses and gyroscope phenomenon.
CO3	Analyse the governor characteristics.
CO4	Determine stresses in disk, beams and plates using phoTo elastic bench.
CO5	Determination of Pressure distribution in Journal bearing
CO6	Analyse the stress and strains using strain gauges in compression and bending test
CO7	To realize different mechanisms and cam motions
Course Code	21ME581 - BASICS OF MATLAB
CO1	Able To implement loops, branching, control instruction and functions in MATLAB programming environment.
CO2	Able To program curve fitting, numerical differentiation and integration, solution of linear equations in MATLAB and
CO3	Able To understand implementation of ODE using ode 45 and execute Solutions of nonlinear equations and DFT in
CO4	Able To simulate MATLAB Simulink examples
Course Code	21ME582- DIGITAL MARKETING
CO1	To identify the importance of the digital marketing for marketing success,
CO2	To manage cusTomer relationships across all digital channels and build better cusTomer relationships
CO3	To create a digital marketing plan, starting from the SWOT analysis and defining a target group, then identifying digital channels, their advantages and limitations,
CO4	To perceive ways of the integration taking inTo consideration the available budget.

Course	21ME583 - VFX: VISUAL EFFECTS
Code	ZIMESOS - VI X. VICOAL EI I EGIO
CO1	Gain good understanding about compositing process.
CO2	Identify major applications of compositing process used in industry.
CO3	Develop a visual effects pipeline.
CO4	Demonstrate an in-depth knowledge of grading and VFX principles, practice and system capabilities.
CO5	Create cusTomized Tools through software or scripting To allow for more creative application of visual effects
Course	21ME61 - PRODUCTION AND OPERATIONS MANAGEMENT
Code	
CO1	Apply the necessary Tools for decision making in operations management.
CO2	Examinevariousapproachesforforecastingthesalesdemandforanorganization.
CO3	ListvariouscapacityandlocationplansTodeterminethesuitablecapacityrequiredformeetingtheforecastdemandofanorganizati
CO4	Analyse the aggregate plan and master production schedule for an organization, given its periodic demand.
CO5	Apply MRP, purchasing and SCM techniques inTo practice.
Course	21ME62 - HEAT TRANSFER (IPCC)
Code	
CO1	Solve steady state heat transfer problems in conduction.
CO2	Solve transient heat transfer problems
CO3	solve convection heat transfer problems using correlations
CO4	Solve radiation heat transfer problems
CO5	Explain the mechanisms of boiling and condensation. And Determine performance parameters of heat exchangers.
Course	21ME63 - MACHINE DESIGN
Code	
CO1	Apply codes and standards in the design of machine elements and select an element based on the Manufacturer's
CO2	Analyse the performance and failure modes of mechanical components subjected To combined loading and fatigue
CO3	Demonstrate the application of engineering design Tools To the design of machine components like shafts, springs,
CO4	Design different types of gears and simple gear boxes for relevant applications.
CO5	Apply design concepts of hydrodynamic bearings for different applications and select Anti friction bearings for different
	applications using the manufacturers, catalogue.
Course	21ME641 - SUPPLY CHAIN MANAGEMENT & INTRODUCTION To SAP
Code	21IVIE041 - SUPPLI CHAIN IVIAINAGEIVIENT & INTRODUCTION TO SAP
CO1	Understand the framework and scope of supply chain management.

CO2	Build and manage a competitive supply chain using strategies, models, techniques and information technology.
CO3	Plan the demand, invenTory and supply and optimize supply chain network.
CO4	Understand the emerging trends and impact of IT on Supply chain.
CO5	Understand the basics of SAP material management system
Course Code	21ME642 - MECHATRONICS SYSTEM DESIGN
CO1	Discuss about Mechatronics design process and select the sensor and ActuaTor for a Mechatronics application
CO2	Explain Modeling and Simulation of mechanical Elements, electrical Elements and fluid systemthe sensors in
CO2	mechatronics systems and Fault detection techniques in Mechatronics.
CO3	Understand the elements of Data Acquisition and Control System, Convert the data in real time interfacing
CO4	Model the dynamic response of first order and second order systems.
Course Code	21ME643 - AUTONOMOUS VEHICLES
CO1	Describe the evolution of AuTomotive Electronics and the operation of ECUs.
CO2	Compare the different type of sensing mechanisms involved in AuTonomous Vehicles.
CO3	Discuss about the use of computer vision and learning algorithms in vehicles.
CO4	Summarize the aspects of connectivity fundamentals existing in a driverless car.
CO5	Identify the different levels of auTomation involved in an AuTonomous Vehicle.
CO6	Outline the various controllers employed in vehicle actuation
Course Code	21ME644 - INTERNET OF THINGS (IOT)
CO1	Explain IoT architecture, interpret the design principles that govern connected devices, summarize the roles of various
CO2	Explain the basics of microcontrollers, outline the architecture of Arduino, develop simple applications using Arduino
CO3	outline the architecture of Raspberry Pi, develop simple applications using Raspberry Pi, select a platform for a particular
CO4	interpret different proTocols and compare them, select which proTocol can be used for a specific application, Utilize the
CO4	select IoT APIs for an application, design and develop a solution for a given application using APIs, test for errors in the
Course Code	21ME651 - PROJECT MANAGEMENT
CO1	Understand the selection, prioritization and initiation of individual projects and strategic role of project management.
CO2	Understand the work breakdown structure by integrating it with organization.
CO3	Understand the scheduling and uncertainty in projects.
CO4	Understand risk management planning using project quality Tools.

CO5	Understand the activities like purchasing, acquisitions, contracting, partnering and collaborations related To performing
CO6	Determine project progress and results through balanced scorecard approach
CO7	Draw the network diagram To calculate the duration of the project and reduce it using crashing.
Course	21ME652 - RENEWABLE ENERGY POWER PLANTS (OPEN ELECTIVE)
Code	
CO1	Describe the various forms of non-conventional energy resources.
CO2	Apply the fundamental knowledge of mechanical engineering To design various renewable energy systems
CO3	Analyze the implications of renewable energy forms for selecting an appropriate system for a specific application
CO4	Discuss on the environmental aspects and impact of non-conventional energy resources, in comparison with various
CO4	conventional energy systems, their prospects and limitations.
Course	21ME653 - MECHATRONICS
Code	21WE055 - WECHATRONICS
CO1	Illustrate various components of Mechatronics systems.
CO2	Assess various control systems used in auTomation.
CO3	Design and conduct experiments To evaluate the performance of a mechatronics system or component with respect To
CO3	specifications, as well as To analyse and interpret data.
CO4	Apply the principles of Mechatronics design To product design.
CO5	Function effectively as members of multidisciplinary teams.
Course	21ME654 - MODERN MOBILITY
Code	
CO1	Understand the working of different systems employed in auTomobile
CO2	Analyse the limitation of present day auTomobiles
CO3	Evaluate the energy sources suitability
CO4	Apply the knowledge for selection of auTomobiles based on their suitability
Course	21MEL66 - CNC PROGRAMMING AND 3-D PRINTING LAB
Code	
CO1	Students will have knowledge of G-code and M-code for machining operations.
CO2	Students will able To perform CNC programming for turning, drilling, milling and threading operation.
CO3	Students will able To visualize the 3D models using CAD software's
CO4	Students will able To use 3D printing technology
CO5	Students are able To understand robotic programming and FMS

Course	ALLED A LUID MARTINAN AND DODORNOG (DCC)
Code	21ME71 - AUTOMATION AND ROBOTICS (PCC)
CO1	Translate and simulate a real time activity using modern Tools and discuss the Benefits of auTomation.
CO2	Identify suitable auTomation hardware for the given application.
CO3	Recommend appropriate modelling and simulation Tool for the given manufacturing Application.
CO4	Explain the basic principles of Robotic technology, configurations, control and Programming of Robots.
CO5	Explain the basic principles of programming and apply it for typical Pick & place, Loading & unloading and palletizing applications
Course Code	21ME72 -CONTROL ENGINEERING
CO1	Identify the type of control and control actions and develop the mathematical model of the physical systems.
CO2	Estimate the response and error in response of first and second order systems subjected standard input signals.
CO3	Represent the complex physical system using block diagram and signal flow graph and obtain transfer function.
CO4	Analyse a linear feedback control system for stability using Hurwitz criterion, Routh's criterion and root Locus technique in complex domain.
CO5	Analyse the stability of linear feedback control systems in frequency domain using polar plots, Nyquist and Bode plots.
Course Code	21ME731 - ADDITIVE MANUFACTURING
CO1	Demonstrate the knowledge of the broad range of AM processes, devices, capabilities and materials that are available.
CO2	Demonstrate the knowledge of the broad range of AM processes, devices, capabilities and materials that are available.
CO3	Understand the various software Tools, processes and techniques that enable advanced/additive manufacturing.
CO4	Apply the concepts of additive manufacturing To design and create components that satisfy product
CO4	development/proTotyping requirements, using advanced/additive manufacturing devices and processes.
CO5	Understand characterization techniques in additive manufacturing.
CO6	Understand the latest trends and business opportunities in additive manufacturing.
Course	21ME732 - ToTAL QUALITY MANAGEMENT
Code	ZIIIZIOZ ZOZIIZ QUIZZI I IIII (I OZIIZI)

CO1	Explain the various approaches of TQM
CO2	Infer the cusTomer perception of quality
CO3	Analyse cusTomer needs and perceptions To design feedback systems.
CO4	Apply statistical Tools for continuous improvement of systems
CO5	Apply the Tools and technique for effective implementation of TQM.
Course Code	21ME733 - REFRIGERATION AND AIR-CONDITIONING
CO1	Illustrate the principles, nomenclature and applications of refrigeration systems.
CO2	Explain vapour compression refrigeration system and identify methods for performance improvement
CO3	Study the working principles of air, vapour absorption, thermoelectric and steam-jet and thermoacoustic refrigeration systems.
CO4	Estimate the performance of air-conditioning systems using the principles of psychrometry.
CO5	Compute and Interpret cooling and heating loads in an air-conditioning system.
CO6	Identify suitable refrigerant for various refrigerating systems.
Course Code	21ME734 - MEMS AND MICROSYSTEM TECHNOLOGY
CO1	Explain MEMS Technology, Present, Future, and Challenges.
CO2	Explain micro-sensors, micro-actuaTors, their types, and applications.
CO3	Explain fabrication processes for producing micro-sensors and actuaTors.
CO4	Apply Reliability and Failure Analysis Testing.
CO5	Understand the operation of microdevices, microsystems, and their applications. Design the microdevices and
	microsystems using the MEMS fabrication process.
Course Code	21ME735 - DESIGN FOR MANUFACTURING & ASSEMBLY
CO1	have knowledge on design principles for manufacturability
CO2	have knowledge Influencing facTors on Design.
CO3	have knowledge on Machining consideration while design.
CO4	have knowledge on casting consideration while design.
CO5	have knowledge on environment consideration while design.
CO6	have ability To understand contemporary issues and their impact on design for manufacturing and assembly.
Course Code	21ME741 - ADVANCED VIBRATIONS AND CONDITION MONITORING
CO1	Identify & classify the vibration systems

CO2	Analyse the vibration parameters through different theoretical methods
CO3	Apply the knowledge of vibration measurement instruments and control system
CO4	Understand the sound generation and propagation arising through vibration
Course Code	21ME742 - Theory and Design of IC Engines
CO1	Understand various types of I.C. Engines, Cycles of operation and Identify fuel metering, fuel supply systems for different types of engines.
CO2	Understand combustion phenomena in SI and CI engines and Analyze the effect of various operating variables on engine performance.
CO3	Evaluate performance Analysis of IC Engine and Justify the suitability for different applications.
CO4	Understand the conventional and non-conventional fuels and effects of emission formation of IC engines, its effects, and the legislation standards
Course Code	21ME743-ADVANCED TURBOMACHINES
CO1	Explain the various thermodynamic processes involved in turbomachines with the application of 1st and 2nd law of Thermodynamics and also apply of the concept of law of conservation of energy for the flow through nozzle and diffuser.
CO2	Demonstrate the concept of two-dimensional cascading and evaluating the cascade performance in compressor and turbines.
CO3	Explain the thermodynamics of axial flow turbines and analyse its performance and characteristics.
CO4	Explain the thermodynamics of axial flow compressor and fans and analyse its performance and characteristics.
CO5	Explain and apply the various vortex flow concepts for designing the blades and describe the process of control and maintenance aspects of turbomachines.
Course Code	21ME744-PRODUCT DESIGN & ERGONOMICS
CO1	To learn the concept of product design and the ergonomics.
CO2	Design the various controls and displays by knowing the anthropometric data's.
CO3	To learn the psychology of visuals effects.
CO4	Learning the different colour combinations for optimal design of engineering equipments.
CO5	Realize the importance of environmental facTors and aesthetics in industrial design.

Course Code	21ME751-NON-TRADITIONAL MACHINING
	Understand the compare traditional and non-traditional machining process and recognize the need for Non- traditional
CO1	machining process.
CO2	Understand the constructional features, performance parameters, process characteristics, applications, advantages and
CO2	limitations of USM, AJM and WJM.
CO3	Identify the need of Chemical and electro-chemical machining process along with the constructional features, process
	parameters, process characteristics, applications, advantages and limitations.
CO4	Understand the constructional feature of the equipment, process parameters, process characteristics, applications,
	advantages and limitations EDM & PAM.
CO5	Understand the LBM equipment, LBM parameters, and characteristics. EBM equipment and mechanism of metal
<b>O</b>	removal, applications, advantages and limitations LBM & EBM.
Course	21ME752-HYDRAULICS AND PNEUMATICS
Code	Here he so ledge of hodge the and an expectic system and the source and
CO1	Have knowledge of hydraulic and pneumatic system and its components.
CO2	Understand the working principle of various hydraulic and pneumatic components.
CO3	Apply working principles of Hydraulic and Pneumatic Systems for various applications.
CO4	Determine cause for hydraulic and pneumatic system break down and performance of hydraulic pumps, moTors.
Course	24MEZES ODEDATIONS DESCAROLL
Code	21ME753-OPERATIONS RESEARCH
CO1	Understand the meaning, definitions, scope, need, phases and techniques of operations research.
CO2	Formulate as L.P.P and derive optimal solutions To linear programming problems by graphical method, Simplex
CO2	method, Big-M method and Dual Simplex method.
CO3	Formulate as Transportation and Assignment problems and derive optimum solutions for transportation, Assignment
	and travelling salesman problems.
CO4	Solve problems on game theory for pure and mixed strategy under competitive environment.
CO5	Solve waiting line problems for M/M/1 and M/M/K queuing models.
CO6	Construct network diagrams and determine critical path, floats for deterministic and PERT networks including crashing
CO6	of Networks

	MECHANICAL ENGINEERING	
Course Code 20MTP12	FINITE ELEMENT METHOD IN HEAT TRANSFER	
CO1	Establish the mathematical models for the complex analysis problems and predict the nature of solution.	
CO2	Formulate the element characteristic for linear and nonlinear matrices and vectors.	
CO3	Identify the boundary conditions and their incorporation in to the FE equations.	
CO4	Solve the problems with simple geometries, with hand calculations involving the fundamental concepts.	
CO5	Interpret the analysis results for the improvement or modification of the system.	
Course Code 20 MTP13	ADVANCED FLUID MECHANICS	
CO1	Illustrate the basic concepts fluid flow and their governing equations	
CO2	Analyse the laminar and turbulent flow problems.	
CO3	Analyse one dimensional incompressible and compressible fluid flow Problems	
CO4	Distinguish normal and oblique shocks and their governing Equations.	
CO5	Describe the instruments and methods for flow measurements	
Course Code 20MTP14	COMBUSTION THERMODYNAMICS	
CO1	Understand the basic thermodynamic concepts for combustion phenomena.	
CO2	Describe the fuel energy conversion systems.	
CO3	Apply the concept of flam flow mechanism in combustion process.	
CO4	knowledge of adiabatic flame temperature in the design of combustion devices.	
CO5	Identify the phenomenon of flame stabilization in laminar and turbulent flames.	
Course Code 20 MTP15	ADVANCED POWER PLANT CYCLES	
CO1	Distinguish the various power plant cycle and their working principles.	
CO2	Describe the working principles of different components of power plant.	
CO3	Explain the concepts of power generation by nuclear power plant.	
CO4	Illustrate the concept of hydroelectric power generation.	
CO5	Explain the concept of pollution and its effects.	

Course Code 20 MTPL16	THERMAL ENGINEERING MEASUREMENT LABORATORY
CO1	Perform experiments to determine the coefficient of discharge of flow measuring devices.
CO2	Conduct experiments on hydraulic turbines and pumps to draw characteristics.
CO3	Test basic performance parameters of hydraulic turbines and pumps and execute the knowledge in real life situations.
CO4	Identify exhaust emission, factors affecting them and report the remedies.
CO5	Determine the energy flow pattern through the hydraulic machines and I C Engine
CO6	Exhibit his competency towards preventive maintenance of IC engines.
Course Code 20RMI17	RESEARCH METHODOLOGY AND IPR
CO1	Discuss research methodology and the technique of defining a research problem
CO2	Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review.
CO3	Explain various research designs, sampling designs, measurement and scaling techniques and also different methods of data collections.
CO4	Explain several parametric tests of hypotheses, Chi-square test, art of interpretation and writing research reports
CO5	Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading International Instruments concerning IPR. ■
Course Code 20 MTP21	ADVANCED HEAT TRANSFER
CO1	Describe the different modes of heat transfer with both physics and the mathematical concept.
CO2	Use the concepts of radiation heat transfer for enclosure analysis.
CO3	Explain the concepts of Boundary layer.
CO4	Formulate mathematical functions for two-dimensional and three dimensional heat conduction problems.
CO5	Describe the free and forced convection problems in real time applications.
Course Code 20 MTP22	STEAM AND GAS TURBINES
CO1	Describe the working principles of Gas and steam turbines nozzle and diffusers.

CO2	Explain the principles of thermodynamic concept to determine the performance of steam and gas turbines.
CO3	Illustrate the concepts of axial flow and centrifugal compressors.
CO4	Differentiate axial flow and radial flow gas turbines for their analysis.
CO5	Identify the various losses associated with the turbines.
Course Code 20MTP23	REFRIGERATION AND AIR CONDITIONING
CO1	Understand concepts of refrigeration and air-conditioning process and systems.
CO2	Employ the theoretical principles to simple, complex vapour compression and vapour absorption refrigeration systems.
CO3	Understand conventional and alternate refrigerants and their impact on environment.
CO4	Apply the heat load calculation to design the air-conditioning systems.
CO5	Describe the concepts to design air distribution systems.
Course Code 20MTP241	ENERGY CONSERVATION AND MANAGEMENT
CO1	Understand the various energy conservation and improvement techniques.
CO2	Illustrate the Energy scenario.
CO3	Employ the principles of thermal engineering and energy management to improve the Performance of thermal systems.
CO4	Assess energy projects on the basis of economic and financial criteria.
CO5	Describe methods of energy production for improved utilization
Course Code	
20MTP251	SOLAR THERMAL TECHNOLOGIES AND ITS APPLICATIONS
CO1	Analyse the energy concepts on solar devices for various thermal properties.
CO2	Analyse the solar thermal devices for various tracking modes.
CO3	Evaluate the performance of various solar thermal technologies.
Course Code 20 MTPL26	SIMULATION LABORATORY
Course Code 20MTP27	TECHNICAL SEMINAR
Course Code 20MTP31	DESIGN OF HEAT TRANSFER EQUIPMENTS FOR THERMAL POWER PLANT
CO1	Understand the physics and the mathematical treatment of typical heat exchangers.
CO2	Employ LMTD and Effectiveness methods in the design of heat exchangers and analyze the importance of LMTD approach over AMTD approach.
CO3	Examine the performance of double-pipe counter flow (hair-pin) heat exchangers.
CO4	Design and analyze the shell and tube heat exchanger.
<u> </u>	•

	Understand the fundamental, physical and mathematical aspects of boiling and
CO5	condensation.
CO6	Classify cooling towers and explain their technical features.
Course Code	THEORY OF IC ENGINES
20MTP322	THEORY OF IC ENGINES
CO1	Distinguish different Fuel-air and actual cycles.
CO2	Demonstrate the different types of injection and carburetor systems
CO3	Formulate the flow and combustion phenomenon for modeling
CO4	Identify the various types of emissions, noise and their control systems
CO5	Recommend the suitable alternative fuel for IC Engine.
Course Code 20MTP332	NON-CONVENTIONAL ENERGY SOURCES
CO1	Describe the need of renewable energy resources, historical and latest developments.
	Describe the use of solar energy and the various components used in the energy
CO2	production with respect to applications like-heating, cooling, desalination, power generation, drying, cooking etc.
CO3	Appreciate the need of Wind Energy, wave power, tidal power, ocean thermal power and geothermal and the various components used in energy generation.
CO4	Understand the concept of Biomass energy resources and their classification, types of biogas Plants applications
Course Code 20MTP34	PROJECT WORK PHASE – 1
CO1	Demonstrate a sound technical knowledge of their selected project topic.
CO2	Undertake problem identification, formulation, and solution.
CO3	Design engineering solutions to complex problems utilising a systems approach.
CO4	Communicate with engineers and the community at large in written an oral forms.
CO5	Demonstrate the knowledge, skills and attitudes of a professional engineer.
Course Code 20MTP35	MINI PROJECT
CO1	Present the mini-project and be able to defend it.
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.
L	<u> </u>

Course Code 20MTPI36	INTERNSHIP / PROFESSIONAL PRACTICE
CO1	Gain practical experience within industry in which the internship is done.
CO2	Acquire knowledge of the industry in which the internship is done.
CO3	Apply knowledge and skills learned to classroom work.
CO4	Develop a greater understanding about career options while more clearly defining personal career goals.
CO5	Experience the activities and functions of professionals.
CO6	Develop and refine oral and written communication skills.
CO7	Identify areas for future knowledge and skill development.
CO8	Expand intellectual capacity, credibility, judgment, intuition.
CO9	Acquire the knowledge of administration, marketing, finance and economics
Course Code 20MTP41	PROJECT WORK PHASE -2
CO1	Present the project and be able to defend it.
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.

	MECHANICAL ENGINEERING	
Course Code	18EGDL15/18EGDL25 - ENGINEERING GRAPHICS AND DESIGN	
CO1	Produce computer generated drawings using CAD software.	
CO2	Prepare drawings as per BIS following the conventions mentioned in the relevant codes.	
CO3	Apply the knowledge of orthographic projections to represent engineering information/concepts and preset the same in the form of drawings.	
CO4	Read and evaluate engineering drawings.	
CO5	Create isometric drawings of simple objects reading the orthographic projections of those objects.	
Course Code	18ME15/25-ELEMENTS OF MECHANICAL ENGINEERING	
CO1	Identify different sources of energy and their conversion process.	
CO2	Explain the working principle of hydraulic turbines, pumps, IC engines and refrigeration.	
CO3	Recognize various metal joining processes and power transmission elements	
CO4	Understand the properties of common engineering materials and their applications in engineering industry.	
CO5	Discuss the working of conventional machine tools, machining processes, tools and accessories.	
CO6	Describe the advanced manufacturing systems.	
Course Code	18ME32 - MECHANICS OF MATERIALS	
CO1	Understand simple, compound, thermal stresses and strains their relations and strain energy.	
CO2	:Analyse structural members for stresses, strains and deformations.	
CO3	Analyse the structural members subjected to bending and shear loads.	
CO4	Analyse shafts subjected to twisting loads.	
CO5	Analyse the short columns for stability.	
Course Code	18ME33 - BASIC THERMODYNAMICS	
CO1	Explain fundamentals of thermodynamics and evaluate energy interactions across the boundary of thermodynamic systems	
CO2	Evaluate the feasibility of cyclic and non-cyclic processes using 2nd law of thermodynamics.	
CO3	Apply the knowledge of entropy, reversibility and irreversibility to solve numerical problems and apply 1st law of thermodynamics to closed and open systems and determine quantity of energy transfers and change in properties	
CO4	. Interpret the behavior of pure substances and its application in practical problems.	
CO5	Recognize differences between ideal and real gases and evaluate thermodynamic properties of ideal and real gas mixtures using various relations.	
Course Code	18ME34 - MATERIAL SCIENCE	
CO1	Understand the mechanical properties of metals and their alloys.	
CO2	Analyze the various modes of failure and understand the microstructures of ferrous and nonferrous materials	
CO3	Describe the processes of heat treatment of various alloys.	
CO4	Acquire the Knowledge of composite materials and their production process as well as applications.	
CO5	Understand the properties and potentialities of various materials available and material selection procedures	

Course Code	18ME35B - METAL CASTING AND WELDING
CO1	Explain the construction & specification of various machine tools.
CO2	Discuss different cutting tool materials, tool nomenclature & surface finish.
CO3	Apply mechanics of machining process to evaluate machining time.
CO4	Analyze tool wear mechanisms and equations to enhance tool life and minimize machining cost.
CO5	Understand the concepts of different metal forming processes.
CO6	Apply the concepts of design of sheet metal dies to design different dies for simple sheet metal components.
Course Code	18ME36B - MECHANICAL MEASUREMENTS AND METROLOGY
CO1	Understand the objectives of metrology, methods of measurement, standards of measurement & various measurement parameters.
CO2	Explain tolerance, limits of size, fits, geometric and position tolerances, gauges and their design
CO3	Understand the working principle of different types of comparators.
CO4	Describe measurement of major & minor diameter, pitch, angle and effective diameter of screw threads.
CO5	Explain measurement systems, transducers, intermediate modifying devices and terminating devices
CO6	Describe functioning of force, torque, pressure, strain and temperature measuring devices
Course Code	18MEL37B - MECHANICAL MEASUREMENTS AND METROLOGY LAB
CO1	Understand Calibration of pressure gauge, thermocouple, LVDT, load cell, micrometer.
CO2	Apply concepts of Measurement of angle using Sine Centre/ Sine Bar/ Bevel Protractor, alignment using Autocollimator/ Roller set.
CO3	Demonstrate measurements using Optical Projector/Tool maker microscope, Optical flats.
CO4	Analyse tool forces using Lathe/Drill tool dynamometer.
CO5	Analyse Screw thread parameters using 2-Wire or 3-Wire method, gear tooth profile using gear tooth Vernier/Gear tooth micrometre
CO6	Understand the concepts of measurement of surface roughness.
Course Code	18MEL38B - FOUNDRY, FORGING AND WELDING LAB
CO1	Demonstrate various skills in preparation of molding sand for conducting tensile, shear and compression tests using Universal sand testing machine.
CO2	Demonstrate skills in determining permeability, clay content and Grain Fineness Number of base sands.
CO3	Demonstrate skills in preparation of forging models involving upsetting, drawing and bending operations.
Course Code	18ME42 - APPLIED THERMODYNAMICS
CO1	Apply thermodynamic concepts to analyze the performance of gas power cycles.
CO2	Apply thermodynamic concepts to analyze the performance of vapour power cycles.
CO3	Understand combustion of fuels and performance of I C engines.
CO4	Understand the principles and applications of refrigeration systems.
CO5	Apply Thermodynamic concepts to determine performance parameters of refrigeration and air conditioning systems.
CO6	Understand the working principle of Air compressors and Steam nozzles, applications, relevance of air and identify methods for performance improvement.

Course Code	18ME43 - FLUID MECHANICS
CO1	Identify and calculate the key fluid properties used in the analysis of fluid behavior.
CO2	Explain the principles of pressure, buoyancy and floatation
CO3	Apply the knowledge of fluid statics, kinematics and dynamics while addressing problems of mechanical and chemical engineering.
CO4	Describe the principles of fluid kinematics and dynamics.
CO5	Explain the concept of boundary layer in fluid flow and apply dimensional analysis to form dimensionless numbers in terms of input output variables.
CO6	Illustrate and explain the basic concept of compressible flow and CFD
Course Code	18ME44 - KINEMATICS OF MACHINES
CO1	Knowledge of mechanisms and their motion.
CO2	Analyse the velocity, acceleration of links and joints of mechanisms.
CO3	Analysis of cam follower motion for the motion specifications.
CO4	Understand the working of the spur gears.
CO5	Analyse the gear trains speed ratio and torque.
CO6	Understand the inversions of four bar mechanisms.
Course Code	18ME45A - METAL CUTTING AND FORMING
CO1	Explain the construction & specification of various machine tools
CO2	Discuss different cutting tool materials, tool nomenclature & surface finish.
CO3	Apply mechanics of machining process to evaluate machining time.
CO4	Analyze tool wear mechanisms and equations to enhance tool life and minimize machining cost.
CO5	Understand the concepts of different metal forming processes.
CO6	Apply the concepts of design of sheet metal dies to design different dies for simple sheet metal components.
Course Code	18ME46A - COMPUTER AIDED MACHINE DRAWING
CO1	Identify the national and international standards pertaining to machine drawing.
CO2	Understand the importance of the linking functional and visualization aspects in the preparation of the part drawings
CO3	Apply limits and tolerances to assemblies and choose appropriate fits for given assemblies.
CO4	Interpret the Machining and surface finish symbols on the component drawings.
CO5	Preparation of the part or assembly drawings as per the conventions.
Course Code	18MEL47A - MATERIAL TESTING LAB
CO1	Acquire experimentation skills in the field of material testing.
CO2	Develop theoretical understanding of the mechanical properties of materials by performing experiments.
CO3	Apply the knowledge to analyze a material failure and determine the failure inducing agent/s.
CO4	Apply the knowledge of testing methods in related areas.

Columbia	CO5	Understand how to improve structure/behavior of materials for various industrial applications.
Prepare fitting models according to drawings using hand tools- V-block, marking gauge, files, hack saw, drills etc.  OHERSTAND INTERPREPARED STATES A PRIVATE OF THE PRIVAT		18MEL48A - WORKSHOP AND MACHINE SHOP PRACTICE
Understand integral parts of lathe, shaping and milling machines and various accessories and attachments used.   CO4	CO1	To read working drawings, understand operational symbols and execute machining operations.
Select cutting parameters like cutting speed, feed, depth of cut, and tooling for various machining operations.   Perform cylindrical turning operations such as plain turning, taper turning, step turning, thread Cutting, facing, kourling, internal thread cutting, eccentric turning activation of the stability of the content of the stability of the content of the	CO2	Prepare fitting models according to drawings using hand tools- V-block, marking gauge, files, hack saw, drills etc.
Perform eylindrical turning operations such as plain turning, taper turning, thread Cutting, facing, knurling, internal thread cutting time.  Perform eylindrical turning operations such as plain shaping, inclined shaping, keyway cutting, Indexing and Gear cutting and estimate cutting time.    Ismest	CO3	Understand integral parts of lathe, shaping and milling machines and various accessories and attachments used.
Apply the concepts of selection of materials for given mechanical components.    Course Code	CO4	Select cutting parameters like cutting speed, feed, depth of cut, and tooling for various machining operations.
Course Code Col Understand needs, functions, roles, scope and evolution of Management Co2 Understand importance, purpose of Planning and hierarchy of planning and alsoS4nalyse its types. Co3 Discuss Decision making, Organizing, Staffing, Directing and Controlling. Select the best economic model from various available alternatives. Co5 Understand various interest rate methods and implement the suitable one. Co6 Estimate various depreciation values of commodities. Co7 Prepare the project reports effectively.  Course Code Co1 Apply the concepts of selection of materials for given mechanical components. Co2 List the functions and uses of machine elements used in mechanical systems. Co3 Apply codes and standards in the design of machine elements and select an element based on the Manufacturer's catalogue. Analyze the performance and failure modes of mechanical components subjected to combined loading and fatigue loading using the concepts of theories of silure. Co4 Demonstrate the application of engineering design tools to the design of machine components like shafts, couplings, power screws, fasteners, welded and riveted oints Co4 Understand the art of working in a team. CO5 Demonstrate the application of engineering design tools to the design of machine components like shafts, couplings, power screws, fasteners, welded and riveted joints  CO6 Understand the art of working in a team.  CO1 Analyse the mechanisms for static and dynamic equilibrium.  CO2 Carry out the balancing of rotating and reciprocating masses  CO3 Analyse different types of governors used in real life situation.  CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  CO8 18ME54 - TURBO MACHINES	CO1	Apply the concepts of selection of materials for given mechanical components.
Analyze the performance and failure modes of mechanical components subjected to combined loading and fatigue loading using the concepts of theories of failure.  Demonstrate the application of engineering design tools to the design of machine components like shafts, couplings, power screws, fasteners, welded and riveted joints  CO6 Understand the art of working in a team.  Course Code  18ME53 - DYNAMICS OF MACHINES  CO1 Analyse the mechanisms for static and dynamic equilibrium.  CO2 Carry out the balancing of rotating and reciprocating masses  CO3 Analyse different types of governors used in real life situation.  CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  18ME54 - TURBO MACHINES	CO2	List the functions and uses of machine elements used in mechanical systems.
failure.  CO5 Demonstrate the application of engineering design tools to the design of machine components like shafts, couplings, power screws, fasteners, welded and riveted joints  CO6 Understand the art of working in a team.  CO1 Analyse the mechanisms for static and dynamic equilibrium.  CO2 Carry out the balancing of rotating and reciprocating masses  CO3 Analyse different types of governors used in real life situation.  CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  18ME54 - TURBO MACHINES	CO3	
Course Code Col Analyse the mechanisms for static and dynamic equilibrium. CO2 Carry out the balancing of rotating and reciprocating masses CO3 Analyse different types of governors used in real life situation. CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers CO5 Understand the free and forced vibration phenomenon. CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code Course Code Code Code Code Code Code Code Cod	CO4	failure.
Code  18ME53 - DYNAMICS OF MACHINES  Col Analyse the mechanisms for static and dynamic equilibrium.  Co2 Carry out the balancing of rotating and reciprocating masses  Co3 Analyse different types of governors used in real life situation.  Co4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  Co5 Understand the free and forced vibration phenomenon.  Co6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  18ME54 - TURBO MACHINES	CO5	
Code  Analyse the mechanisms for static and dynamic equilibrium.  CO2 Carry out the balancing of rotating and reciprocating masses  CO3 Analyse different types of governors used in real life situation.  CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  CO01	CO6	Understand the art of working in a team.
CO2 Carry out the balancing of rotating and reciprocating masses  CO3 Analyse different types of governors used in real life situation.  CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  18ME54 - TURBO MACHINES		18ME53 - DYNAMICS OF MACHINES
CO3 Analyse different types of governors used in real life situation.  CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers  CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  CO6 18ME54 - TURBO MACHINES	CO1	Analyse the mechanisms for static and dynamic equilibrium.
CO4 Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers CO5 Understand the free and forced vibration phenomenon. CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code CO6 CO6 CO6 CO6 CO7 CO6 CO7	CO2	Carry out the balancing of rotating and reciprocating masses
CO5 Understand the free and forced vibration phenomenon.  CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code  18ME54 - TURBO MACHINES	CO3	Analyse different types of governors used in real life situation.
CO6 Determine the natural frequency, force and motion transmitted in vibrating systems.  Course Code 18ME54 - TURBO MACHINES	CO4	Analyse the gyroscopic effects on disks, airplanes, stability of ships, two and four wheelers
Course Code 18ME54 - TURBO MACHINES	CO5	Understand the free and forced vibration phenomenon.
Code 16ME54 - TURBO MACHINES	CO6	Determine the natural frequency, force and motion transmitted in vibrating systems.
CO1: Model studies and thermodynamics analysis of turbomachines.		18ME54 - TURBO MACHINES
	CO1	CO1: Model studies and thermodynamics analysis of turbomachines.

CO2	Analyse the energy transfer in Turbo machine with degree of reaction and utilisation factor.
CO3	Classify, analyse and understand various type of steam turbine.
CO4	Classify, analyse and understand various type of hydraulic turbine.
CO5	Understand the concept of radial power absorbing machine and the problems involved during its operation.
Course Code	18ME55 - FLUID POWER ENGINEERING
CO1	CO1: Identify and analyse the functional requirements of a fluid power transmission system for a given application.
CO2	Visualize how a hydraulic/pneumatic circuit will work to accomplish the function.
CO3	Design an appropriate hydraulic or pneumatic circuit or combination circuit like electro-hydraulics, electro- pneumatics for a given application.
CO4	Select and size the different components of the circuit.
CO5	Develop a comprehensive circuit diagram by integrating the components selected for the given application.
Course Code	18ME56 - OPERATIONS MANAGEMENT
CO1	Explain the concept and scope of operations management in a business context
CO2	Recognize the role of Operations management among various business functions and its role in the organizations' strategic planning and gaining competitive advantage
CO3	Analyze the appropriateness and applicability of a range of operations management systems/models in decision making.
CO4	Assess a range of strategies for improving the efficiency and effectiveness of organizational operations.
CO5	Evaluate a selection of frameworks used in the design and delivery of operations
Course Code	18MEL57 - FLUID MECHANICS AND MACHINES LAB
CO1	Perform experiments to determine the coefficient of discharge of flow measuring devices.
CO2	Conduct experiments on hydraulic turbines and pumps to draw characteristics.
CO3	Test basic performance parameters of hydraulic turbines and pumps and execute the knowledge in real life situations.
CO4	Determine the energy flow pattern through the hydraulic turbines and pumps.
CO5	Exhibit his competency towards preventive maintenance of hydraulic machines.
Course Code	18MEL58 - ENERGY CONVERSION LABORATORY
CO1	Perform experiments to determine the properties of fuels and oils.
CO2	Conduct experiments on engines and draw characteristics
CO3	
000	Test basic performance parameters of I.C. Engine and implement the knowledge in industry.
CO4	Test basic performance parameters of I.C. Engine and implement the knowledge in industry.  Identify exhaust emission, factors affecting them and exhibit his competency towards preventive maintenance of IC engines.
CO4 Course	Identify exhaust emission, factors affecting them and exhibit his competency towards preventive maintenance of IC engines.
CO4 Course Code	Identify exhaust emission, factors affecting them and exhibit his competency towards preventive maintenance of IC engines.  18MEL59 - ENVIRONMENTAL STUDIES
CO4 Course Code CO1	Identify exhaust emission, factors affecting them and exhibit his competency towards preventive maintenance of IC engines.  18MEL59 - ENVIRONMENTAL STUDIES  Understand the principles of ecology and environmental issues that apply to air, land, and water issues on a global scale
CO4 Course Code CO1 CO2	Identify exhaust emission, factors affecting them and exhibit his competency towards preventive maintenance of IC engines.  18MEL59 - ENVIRONMENTAL STUDIES  Understand the principles of ecology and environmental issues that apply to air, land, and water issues on a global scale  Develop critical thinking and/or observation skills, and apply them to the analysis of a problem or question related to the environment.

Course Code	18ME61 - FINITE ELEMENT METHODS
CO1	Identify the application and characteristics of FEA elements such as bars, beams, plane and isoparametric elements.
CO2	Develop element characteristic equation and generation of global equation.
CO3	Formulate and solve Axi-symmetric and heat transfer problems.
CO4	Apply suitable boundary conditions to a global equation for bars, trusses, beams, circular shafts, heat transfer, fluid flow, axi-symmetric and dynamic problems
Course Code	18ME62 - DESIGN OF MACHINE ELEMENTS II
CO1	Apply design principles for the design of mechanical systems involving springs, belts, pulleys, and wire ropes.
CO2	Design different types of gears and simple gear boxes for relevant applications.
CO3	Understand the design principles of brakes and clutches.
CO4	Apply design concepts of hydrodynamic bearings for different applications and select Anti friction bearings for different applications using the manufacturers, catalogue
CO5	Apply engineering design tools to product design.
CO6	Become good design engineers through learning the art of working in a team.
Course Code	18ME63 - HEAT TRANSFER
CO1	Understand the modes of heat transfer and apply the basic laws to formulate engineering systems.
CO2	Understand and apply the basic laws of heat transfer to extended surface, composite material and unsteady state heat transfer problems.
CO3	Analyze heat conduction through numerical methods and apply the fundamental principle to solve radiation heat transfer problems.
CO4	Analyze heat transfer due to free and forced convective heat transfer.
CO5	Understand the design and performance analysis of heat exchangers and their practical applications, Condensation and Boiling phenomena
Course Code	18ME641 - NON-TRADITIONAL MACHINING
CO1	Understand the compare traditional and non-traditional machining process and recognize the need for Non- traditional machining process.
CO2	Understand the constructional features, performance parameters, process characteristics, applications, advantages and limitations of USM, AJM and WJM.
CO3	Identify the need of Chemical and electro-chemical machining process along with the constructional features, process parameters, process characteristics, applications, advantages and limitations.
CO4	Understand the constructional feature of the equipment, process parameters, process characteristics, applications, advantages and limitations EDM & PAM.
CO5	Understand the LBM equipment, LBM parameters, and characteristics. EBM equipment and mechanism of metal removal, applications, advantages and limitations LBM & EBM.
Course Code	18ME653 - RENEWABLE ENERGY RESOURCES (OPEN ELECTIVE)
CO1	Discuss causes of energy scarcity and its solution, energy resources and availability of renewable energy.
CO2	Outline energy from sun, energy reaching the Earth's surface and solar thermal energy applications.
CO3	Discuss types of solar collectors, their configurations, solar cell system, its characteristics and their applications.
CO4	Explain generation of energy from hydrogen, wind, geothermal system, solid waste and agriculture refuse.
CO5	Discuss production of energy from biomass, biogas.
CO6	Summarize tidal energy resources, sea wave energy and ocean thermal energy.

Course Code	18MEL66 - COMPUTER AIDED MODELLING AND ANALYSIS LAB
CO1	Use the modern tools to formulate the problem, create geometry, descritize, apply boundary conditions to solve problems of bars, truss, beams, and plate to find stresses with different-loading conditions.
CO2	Demonstrate the ability to obtain deflection of beams subjected to point, uniformly distributed and varying loads and use the available results to draw shear force and bending moment diagrams.
CO3	Analyze and solve 1D and 2D heat transfer conduction and convection problems with different boundary conditions.
CO4	Carry out dynamic analysis and finding natural frequencies of beams, plates, and bars for various boundary conditions and also carry out dynamic analysis with forcing functions.
Course Code	18MEL67 - HEAT TRANSFER LAB
CO1	Determine the thermal conductivity of a metal rod and overall heat transfer coefficient of composite slabs.
CO2	Determine convective heat transfer coefficient for free and forced convection and correlate with theoretical values.
CO3	Evaluate temperature distribution characteristics of steady and transient heat conduction through solid cylinder experimentally.
CO4	Determine surface emissivity of a test plate and Stefan Boltzmann constant
CO5	Estimate performance of a refrigerator and effectiveness of a fin and Double pipe heat exchanger
Course Code	18ME71 - CONTROL ENGINEERING
CO1	Identify the type of control and control actions.
CO2	Develop the mathematical model of the physical systems.
CO3	Estimate the response and error in response of first and second order systems subjected standard input signals.
CO4	Represent the complex physical system using block diagram and signal flow graph and obtain transfer function
CO5	Analyse a linear feedback control system for stability using Hurwitz criterion, Routh's criterion and root Locus technique in complex domain.
Course Code	18ME72 - COMPUTER AIDED DESIGN AND MANUFACTURING
CO1	CO1: Define Automation, CIM, CAD, CAM and explain the differences between these concepts. Solve simple problems of transformations of entities on computer screen
CO2	Explain the basics of automated manufacturing industries through mathematical models and analyzedifferent types of automated flow lines.
CO3	Analyse the automated flow lines to reduce time and enhance productivity.
CO4	Explain the use of different computer applications in manufacturing, and able to prepare part programs for simple jobs on CNC machine tools and robot programming.
CO5	Visualize and appreciate the modern trends in Manufacturing like additive manufacturing, Industry 4.0 and applications of Internet of Things leading to Smart Manufacturing.
Course Code	18ME732 - AUTOMATION & ROBOTICS
CO1	Translate and simulate a real time activity using modern tools and discuss the Benefits of automation.
CO2	Identify suitable automation hardware for the given application
CO3	Recommend appropriate modelling and simulation tool for the given manufacturing Application.
CO4	Explain the basic principles of Robotic technology, configurations, control and Programming of Robots.
CO5	Explain the basic principles of programming and apply it for typical Pick & place, Loading & unloading and palletizing applications
Course Code	18ME741 - ADDITIVE MANUFACTURING

CO1	Demonstrate the knowledge of the broad range of AM processes, devices, capabilities and materials that are available.
CO2	Demonstrate the knowledge of the broad range of AM processes, devices, capabilities and materials that are available.
CO3	Understand the various software tools, processes and techniques that enable advanced/additive manufacturing.
CO4	Apply the concepts of additive manufacturing to design and create components that satisfy product development/prototyping requirements, using advanced/additive manufacturing devices and processes.
CO5	Understand characterization techniques in additive manufacturing.
CO6	Understand the latest trends and business opportunities in additive manufacturing.
Course Code	18ME753 - DISASTERS MANAGEMENT (OPEN ELECTIVE)
CO1	Discuss disaster management plan, cyclones and their hazard potential
CO2	Understand the role of IMD and cyclone prediction and cyclone warning system in India
CO3	Understand the role of different institutions defence and other services in natural disaster management
CO4	Understand the role of Central Water Commission in river water sharing, Draught, its assessment and draught management plan
CO5	Understand occurrence of earth quake, Tsunamis and thunderstorms.
Course Code	18MEL76 - COMPUTRE AIDED MANUFACTURING LAB
Course Code	18MEL77 - DESIGN LAB
CO1	Compute the natural frequency of the free and forced vibration of single degree freedom systems, critical speed of shafts.
CO2	Carry out balancing of rotating masses
CO3	Analyse the governor characteristics.
CO4	Determine stresses in disk, beams, plates and hook using photo elastic bench.
CO5	Determination of Pressure distribution in Journal bearing
CO6	Analyse the stress and strains using strain gauges in compression and bending test and stress distribution in curved beams.
Course Code	18ME81 - ENERGY ENGINEERING
CO1	Understand the construction and working of steam generators and their accessories.
CO2	Identify renewable energy sources and their utilization.
CO3	Understand principles of energy conversion from alternate sources including wind, geothermal, ocean, biomass, nuclear, hydel and tidal.
Course Code	18ME822 - TRIBOLOGY
CO1	Understand the fundamentals of tribology and associated parameters.
CO2	Apply concepts of tribology for the performance analysis and design of components experiencing relative motion
CO3	Analyse the requirements and design hydrodynamic journal and plane slider bearings for a given application.
CO4	Select proper bearing materials and lubricants for a given tribological application.
CO5	Apply the principles of surface engineering for different applications of tribology.

	MECHANICAL ENGINEERING	
Course Code 20MTP12	FINITE ELEMENT METHOD IN HEAT TRANSFER	
CO1	Establish the mathematical models for the complex analysis problems and predict the nature of solution.	
CO2	Formulate the element characteristic for linear and nonlinear matrices and vectors.	
CO3	Identify the boundary conditions and their incorporation in to the FE equations.	
CO4	Solve the problems with simple geometries, with hand calculations involving the fundamental concepts.	
CO5	Interpret the analysis results for the improvement or modification of the system.	
Course Code 20 MTP13	ADVANCED FLUID MECHANICS	
CO1	Illustrate the basic concepts fluid flow and their governing equations	
CO2	Analyse the laminar and turbulent flow problems.	
CO3	Analyse one dimensional incompressible and compressible fluid flow Problems	
CO4	Distinguish normal and oblique shocks and their governing Equations.	
CO5	Describe the instruments and methods for flow measurements	
Course Code 20MTP14	COMBUSTION THERMODYNAMICS	
CO1	Understand the basic thermodynamic concepts for combustion phenomena.	
CO2	Describe the fuel energy conversion systems.	
CO3	Apply the concept of flam flow mechanism in combustion process.	
CO4	knowledge of adiabatic flame temperature in the design of combustion devices.	
CO5	Identify the phenomenon of flame stabilization in laminar and turbulent flames.	
Course Code 20 MTP15	ADVANCED POWER PLANT CYCLES	
CO1	Distinguish the various power plant cycle and their working principles.	
CO2	Describe the working principles of different components of power plant.	
CO3	Explain the concepts of power generation by nuclear power plant.	
CO4	Illustrate the concept of hydroelectric power generation.	
CO5	Explain the concept of pollution and its effects.	

Course Code 20 MTPL16	THERMAL ENGINEERING MEASUREMENT LABORATORY
CO1	Perform experiments to determine the coefficient of discharge of flow measuring devices.
CO2	Conduct experiments on hydraulic turbines and pumps to draw characteristics.
CO3	Test basic performance parameters of hydraulic turbines and pumps and execute the knowledge in real life situations.
CO4	Identify exhaust emission, factors affecting them and report the remedies.
CO5	Determine the energy flow pattern through the hydraulic machines and I C Engine
CO6	Exhibit his competency towards preventive maintenance of IC engines.
Course Code 20RMI17	RESEARCH METHODOLOGY AND IPR
CO1	Discuss research methodology and the technique of defining a research problem
CO2	Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review.
CO3	Explain various research designs, sampling designs, measurement and scaling techniques and also different methods of data collections.
CO4	Explain several parametric tests of hypotheses, Chi-square test, art of interpretation and writing research reports
CO5	Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading International Instruments concerning IPR. ■
Course Code 20 MTP21	ADVANCED HEAT TRANSFER
CO1	Describe the different modes of heat transfer with both physics and the mathematical concept.
CO2	Use the concepts of radiation heat transfer for enclosure analysis.
CO3	Explain the concepts of Boundary layer.
CO4	Formulate mathematical functions for two-dimensional and three dimensional heat conduction problems.
CO5	Describe the free and forced convection problems in real time applications.
Course Code 20 MTP22	STEAM AND GAS TURBINES
CO1	Describe the working principles of Gas and steam turbines nozzle and diffusers.

CO2	Explain the principles of thermodynamic concept to determine the performance of steam and gas turbines.
CO3	Illustrate the concepts of axial flow and centrifugal compressors.
CO4	Differentiate axial flow and radial flow gas turbines for their analysis.
CO5	Identify the various losses associated with the turbines.
Course Code 20MTP23	REFRIGERATION AND AIR CONDITIONING
CO1	Understand concepts of refrigeration and air-conditioning process and systems.
CO2	Employ the theoretical principles to simple, complex vapour compression and vapour absorption refrigeration systems.
CO3	Understand conventional and alternate refrigerants and their impact on environment.
CO4	Apply the heat load calculation to design the air-conditioning systems.
CO5	Describe the concepts to design air distribution systems.
Course Code 20MTP241	ENERGY CONSERVATION AND MANAGEMENT
CO1	Understand the various energy conservation and improvement techniques.
CO2	Illustrate the Energy scenario.
CO3	Employ the principles of thermal engineering and energy management to improve the Performance of thermal systems.
CO4	Assess energy projects on the basis of economic and financial criteria.
CO5	Describe methods of energy production for improved utilization
Course Code	
20MTP251	SOLAR THERMAL TECHNOLOGIES AND ITS APPLICATIONS
CO1	Analyse the energy concepts on solar devices for various thermal properties.
CO2	Analyse the solar thermal devices for various tracking modes.
CO3	Evaluate the performance of various solar thermal technologies.
Course Code 20 MTPL26	SIMULATION LABORATORY
Course Code 20MTP27	TECHNICAL SEMINAR
Course Code 20MTP31	DESIGN OF HEAT TRANSFER EQUIPMENTS FOR THERMAL POWER PLANT
CO1	Understand the physics and the mathematical treatment of typical heat exchangers.
CO2	Employ LMTD and Effectiveness methods in the design of heat exchangers and analyze the importance of LMTD approach over AMTD approach.
CO3	Examine the performance of double-pipe counter flow (hair-pin) heat exchangers.
CO4	Design and analyze the shell and tube heat exchanger.
<u> </u>	•

	Understand the fundamental, physical and mathematical aspects of boiling and
CO5	condensation.
CO6	Classify cooling towers and explain their technical features.
Course Code	THEORY OF IC ENGINES
20MTP322	THEORY OF IC ENGINES
CO1	Distinguish different Fuel-air and actual cycles.
CO2	Demonstrate the different types of injection and carburetor systems
CO3	Formulate the flow and combustion phenomenon for modeling
CO4	Identify the various types of emissions, noise and their control systems
CO5	Recommend the suitable alternative fuel for IC Engine.
Course Code 20MTP332	NON-CONVENTIONAL ENERGY SOURCES
CO1	Describe the need of renewable energy resources, historical and latest developments.
	Describe the use of solar energy and the various components used in the energy
CO2	production with respect to applications like-heating, cooling, desalination, power generation, drying, cooking etc.
CO3	Appreciate the need of Wind Energy, wave power, tidal power, ocean thermal power and geothermal and the various components used in energy generation.
CO4	Understand the concept of Biomass energy resources and their classification, types of biogas Plants applications
Course Code 20MTP34	PROJECT WORK PHASE – 1
CO1	Demonstrate a sound technical knowledge of their selected project topic.
CO2	Undertake problem identification, formulation, and solution.
CO3	Design engineering solutions to complex problems utilising a systems approach.
CO4	Communicate with engineers and the community at large in written an oral forms.
CO5	Demonstrate the knowledge, skills and attitudes of a professional engineer.
Course Code 20MTP35	MINI PROJECT
CO1	Present the mini-project and be able to defend it.
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.
L	<u> </u>

Course Code 20MTPI36	INTERNSHIP / PROFESSIONAL PRACTICE
CO1	Gain practical experience within industry in which the internship is done.
CO2	Acquire knowledge of the industry in which the internship is done.
CO3	Apply knowledge and skills learned to classroom work.
CO4	Develop a greater understanding about career options while more clearly defining personal career goals.
CO5	Experience the activities and functions of professionals.
CO6	Develop and refine oral and written communication skills.
CO7	Identify areas for future knowledge and skill development.
CO8	Expand intellectual capacity, credibility, judgment, intuition.
CO9	Acquire the knowledge of administration, marketing, finance and economics
Course Code 20MTP41	PROJECT WORK PHASE -2
CO1	Present the project and be able to defend it.
CO2	Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
CO3	Habituated to critical thinking and use problem solving skills
CO4	Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
CO5	Work in a team to achieve common goal.
CO6	Learn on their own, reflect on their learning and take appropriate actions to improve it.

DEPARTMENT OF PHYSICS	
2022 Scheme	
Course	BPHYC102/202 – APPLIED PHYSICS FOR CV STREAM
Code CO1	To understand the types of oscillation, shock waves & its generation, and applications.
CO2	To Study the elastic properties of materials and failures of engineering materials
CO3	To Study the acoustics buildings and the essentials of radiometry and photometry.
CO4	To understand the principles photonic devices and their application relevant to civil engineering.
CO5	To understand the various natural disaster and safety.
Course Code	BPHYS102/202 – APPLIED PHYSICS FOR CSE STREAM
CO1	Describe the principles of LASERS and Optical fibers and their relevant applications.
CO2	Discuss the basic principles of the Quantum Mechanics and its application in Quantum Computing.
CO3	Summarize the essential properties of superconductors and its applications in qubits.
CO4	Illustrate the application of physics in design and data analysis.
CO5	Practice working in groups to conduct experiments in physics and perform precise andhonest measurements.
Course Code	BPHYE102/202 - APPLIED PHYSICS FOR EEE STREAM
CO1	Describe the fundamental principles of the Quantum Mechanics and the essentials of Photonics.
CO2	Elucidate the concepts of conductors, dielectrics and superconductivity.
CO3	Discuss the fundamentals of vector calculus and their applications in Maxwell's Equations and EM Waves.
CO4	Summarize the properties of semiconductors and the working principles of semiconductor devices.
CO5	Practice working in groups to conduct experiments in physics and Perform precise and honest
Course Code	BPHYM102/202 - APPLIED PHYSICS FOR ME STREAM
CO1	Elucidate the concepts in oscillations, waves, elasticity and material failures.
CO2	Discuss the fundamentals of Thermoelectric materials and their application
CO3	Summarize the low temperature phenomena and generation of low temperature.
CO4	Explain the various material characterization techniques.
CO5	Practice working in groups to conduct experiments in physics and perform precise and honest measurements.

	DEPARTMENT OF CHEMISTRY				
	2022 Scheme				
Course	BCHEC102/202 – APPLIED CHEMISTRY FOR CIVIL ENGINEERING STREAM				
Code CO1	Identify the terms and applications processes involved in scientific and engineering applications				
CO2	Explain the phenomena of chemistry to describe the methods of engineering				
CO3	Solve for the problems in chemistry that are pertinent in engineering applications				
CO4	Apply the basic concepts of chemistry to explain the chemical properties and processes				
CO5	Analyze properties and processes associated with chemical substances in multi disciplinary situations.				
Course Code	BCHES102/202 – APPLIED CHEMISTRY FOR CS ENGINEERING STREAM				
CO1	Identify the terms and applications processes involved in scientific and engineeringapplications				
CO2	Explain the phenomena of chemistry to describe the methods of engineering processes				
CO3	Solve the problems in chemistry that are pertinent in engineering applications				
CO4	Apply the basic concepts of chemistry to explain the chemical properties and processes				
CO5	Analyze properties and processes associated with chemical substances in multi-disciplinary situations.				
Course Code	BCHEE102/202 – APPLIED CHEMISTRY FOR EE AND EC ENGINEERING STREAM				
CO1	Identify the terms and applications processes involved in scientific and engineering				
CO2	Explain the phenomena of chemistry to describe the methods of engineering processes				
CO3	. Solve the problems in chemistry that are pertinent in engineering applications				
CO4	Apply the basic concepts of chemistry to explain the chemical properties and processes				
CO5	Analyze properties and processes associated with chemical substances in multi Disciplinary situations.				
Course Code	BCHEM102/202 – APPLIED CHEMISTRY FOR MECHANICAL ENGINEERING STREAM				
CO1	Identify the terms and applications processes involved in scientific and engineering applications				
CO2	Explain the phenomena of chemistry to describe the methods of engineering processes				
CO3	Solve the problems in chemistry that are pertinent in engineering applications				
CO4	Apply the basic concepts of chemistry to explain the chemical properties and processes				
CO5	Analyze properties and processes associated with chemical substances in multi-disciplinary Situations.				

## **DEPARTMENT OF MATHEMATICS**

## 2022 Scheme

_	CTI	FTC	
	C II II	MES	
_			

I SEMESTER		
Course Code	BMATC101 – MATHEMATICS-I (CIVIL STREAM)	
CO1	Apply the knowledge of calculus to solve problems related to polar curves.	
CO2	Learn the notion of partial differentiation to compute rate of change of multivariate functions.	
CO3	Analyze the solution of linear and nonlinear ordinary differential equations	
CO4	Make use of matrix theory for solving for system of linear equations and compute Eigen values and eigenvectors	
CO5	Familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB/ PYTHON/SCILAB.	
Course Code	BMATS101- MATHEMATICS -I (CSE STREAM)	
CO1	Apply the knowledge of calculus to solve problems related to polar curves and learn the notion of partia differentiation to compute rate of change of multivariate functions	
CO2	Analyze the solution of linear and nonlinear ordinary differential equations	
CO3	Get acquainted and to apply modular arithmetic to computer algorithms.	
CO4	Make use of matrix theory for solving for system of linear equations and compute Eigen values and eigenvectors	
CO5	Familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/ PYTHON/ SCILA	
Course Code	BMATE101 – MATHEMATICS-I (EC & EEE STREAM)	
	Apply the knowledge of calculus to solve problems related to polar curves and learn the notion of partia	
CO1	differentiation to compute rate of change of multivariate functions	
CO2	Analyze the solution of linear and nonlinear ordinary differential equations	
CO3	Apply the concept of change of order of integration and variables to evaluate multiple integrals and the usage in computing area and volume	
CO4	: Make use of matrix theory for solving for system of linear equations and compute Eigen values and	
CO4	eigenvectors	
CO5		
	eigenvectors Familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB/	
CO5 Course	eigenvectors Familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB/ PYTHON/SCILAB	
CO5 Course Code	eigenvectors  Familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB/ PYTHON/SCILAB  BMATM101 – MATHEMATICS-I (MECHANICAL STREAM)	
CO5 Course Code CO1	eigenvectors  Familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB/ PYTHON/SCILAB  BMATM101 – MATHEMATICS-I (MECHANICAL STREAM)  Apply the knowledge of calculus to solve problems related to polar curves.	
CO5 Course Code CO1 CO2	eigenvectors  Familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB/ PYTHON/SCILAB  BMATM101 – MATHEMATICS-I (MECHANICAL STREAM)  Apply the knowledge of calculus to solve problems related to polar curves.  Learn the notion of partial differentiation to compute rate of change of multivariate functions.	

	II SEMESTER			
Course Code	BMATC201 – MATHEMATICS - II FOR CIVIL STREAM			
CO1	Apply the knowledge of multiple integrals to compute area and volume			
CO2	Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and surface integral.			
CO3	Demonstrate partial differential equations and their solutions for physical interpretations.			
CO4	Apply the knowledge of numerical methods in solving physical and engineering phenomena.			
CO5	Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/SCILAB.			
Course Code	BMATS201 - MATHEMATICS - II FOR CSE STREAM			
CO1	Apply the concept of change of order of integration and variables to evaluate multiple integrals and their usage in computing area and volume			
CO2	Understand the applications of vector calculus refer to solenoidal, and irrotational vectors. Orthogonal curvilinear coordinates			
CO3	Demonstrate the idea of Linear dependence and independence of sets in the vector space, and linear transformation			
CO4	Apply the knowledge of numerical methods in analysing the discrete data and solving the physical and engineering problems.			
CO5	Get familiarize with modern mathematical tools namely MATHEMATICA/ MATLAB /PYTHON/ SCILAB.			
Course Code	BMATE201 - MATHEMATICS - II FOR EC & EEE STREAM			
CO1	Understand the applications of vector calculus refer to solenoidal, irrotational vectors, Line integral and surface integral			
CO2	Demonstrate the idea of Linear dependence and independence of sets in the vector space, and linear transformation			
CO3				
003	To understand the concept of Laplace transform and to solve initial value problems.			
CO4	Apply the knowledge of numerical methods in solving physical and engineering phenomena			
CO4	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/			
CO4 CO5 Course	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB			
CO4 CO5 Course Code	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM			
CO4 CO5 Course Code CO1	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM  Apply the knowledge of multiple integrals to compute area and volume.  Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and			
CO4 CO5 Course Code CO1 CO2	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM  Apply the knowledge of multiple integrals to compute area and volume.  Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and surface integral.			
CO4 CO5 Course Code CO1 CO2 CO3	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM  Apply the knowledge of multiple integrals to compute area and volume.  Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and surface integral.  Demonstrate partial differential equations and their solutions for physical interpretations.			
CO4 CO5 Course Code CO1 CO2 CO3 CO4	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM  Apply the knowledge of multiple integrals to compute area and volume.  Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and surface integral.  Demonstrate partial differential equations and their solutions for physical interpretations.  Apply the knowledge of numerical methods in solving physical and engineering phenomena.			
CO4 CO5 Course Code CO1 CO2 CO3 CO4	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM  Apply the knowledge of multiple integrals to compute area and volume.  Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and surface integral.  Demonstrate partial differential equations and their solutions for physical interpretations.  Apply the knowledge of numerical methods in solving physical and engineering phenomena.  Get familiarize with modern mathematical tools namely Mathematics/MatLab/Python/Scilab			
CO4 CO5 Course Code CO1 CO2 CO3 CO4 CO5	Apply the knowledge of numerical methods in solving physical and engineering phenomena  Get familiarize with modern mathematical tools namely MATHEMATICA/MATLAB/PYTHON/ SCILAB  BMATM201 - MATHEMATICS - II FOR MECHANICAL STREAM  Apply the knowledge of multiple integrals to compute area and volume.  Understand the applications of vector calculus refer to solenoidal, irrotational vectors, line integral and surface integral.  Demonstrate partial differential equations and their solutions for physical interpretations.  Apply the knowledge of numerical methods in solving physical and engineering phenomena.  Get familiarize with modern mathematical tools namely Mathematics/MatLab/Python/Scilab  III SEMESTER			

CO3	Apply the notion of a discrete-time Markov chain and n-step transition probabilities to solve the given problem	
CO4	Use statistical methodology and tools in the engineering problem-solving process.	
CO5	Compute the confidence intervals for the mean of the population.	
CO6	Apply the ANOVA test related to engineering problems.	
Course Code	BMATEC301 - AV Mathematics-III for EC Engineering	
CO1	Demonstrate the Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing, and field theory.	
CO2	To use Fourier transforms to analyze problems involving continuous-time signals	
CO3	To apply Z-Transform techniques to solve difference equations	
CO4	Understand that physical systems can be described by differential equations and solve such equations	
CO5	Make use of correlation and regression analysis to fit a suitable mathematical model for statistical data	
Course Code	BMATE301 - MATHEMATICS-III FOR EE ENGINEERING	
CO1	Understand that physical systems can be described by differential equations and solve such equations	
CO2	Make use of correlation and regression analysis to fit a suitable mathematical model for statistical data	
CO3	Demonstrate the Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing, and field theory.	
CO4	To use Fourier transforms to analyze problems involving continuous-time signals and to apply Z-Transform techniques to solve difference equations	
CO5	Apply discrete and continuous probability distributions in analyzing the probability models arising in the engineering field. Demonstrate the validity of testing the hypothesis.
